Armoured Crusader:

Armoured Crusader Kenneth Macksey, 1967 **Armoured Crusader**, 1967 **British Armoured Divisions and Their Commanders, 1939-1945** Richard Doherty, 2013-07-16 A total of eleven British armoured divisions were formed during the 1939 1945 war but as this highly informative book reveals just eight saw action In 1940 only 1st Armoured Division faced the German blitzkrieg and it was in the North African desert that armoured divisions came into their own The terrain was ideal and six such divisions of Eighth Army fought Rommel's Panzers into submission Three were disbanded prior to the invasion of Sicily and Italy The campaign from D Day onwards saw the Guards Armoured 7th Armoured the Desert Rats 11th and Percy Hobart's 79th Armoured Division in the thick of the action Of particular interest are the men who commanded these elite formations and the way their characters contributed to the outcome of operations While some such as Dick McCreery went onto greater heights others did not make the grade the stakes were high A number such as Pip Roberts were just perfectly suited in the role Written by a leading military historian this book describes many fascinating aspects of armoured warfare from its uncertain beginnings through the development of tactics and the evolving tank design Due to British deficiencies reliance had to be placed on US Grants and Shermans with the Comet coming late and the Centurion too late The combination of gripping historical narrative and well researched fact make this an invaluable and highly readable work on the contribution of British Armoured Divisions to victory in the Second World War *Armoured Crusader. A Biography of Major-General Sir Percy Hobart, Etc. [With Plates, Including Portraits, and with Maps.]*. Kenneth John MACKSEY, Sir Percy HOBART, 1967 *Armoured Warfare in the British Army 1939-1945* Dick Taylor, 2022-10-21 The second volume in Dick Taylor's three volume illustrated history of the evolution of armored maneuver warfare in the British army covers the period of the Second World War in which the tank came of age and developed into the principal land weapon of decision He describes how during the first half of the war the British army came close to disaster from the armored warfare perspective and how the bitter lessons of failure were learned in time to deliver success in 1944 and 1945 As well as providing a fascinating overview of the tactical use of armor during the main campaigns he considers such much neglected aspects as the role of training and organization officer selection and recruitment and the mechanization of other arms His wide ranging book also features extensive well laid out tables giving key information about British armor during this period This expert account quotes heavily from the vivid recollections of soldiers who served in armor and is not afraid to criticize as well as praise **Armoured Warfare in the British Army, 1914-1939** Richard Taylor, 2022-04-06 This is the first volume in a three volume illustrated history of the evolution of armored manoeuvre warfare in the British army covering the period from 1914 until 1939 Author Dick Taylor's tour de force covers the evolution of the tank and armored cars in response to the specific conditions created by trench warfare the history of the use of tanks during the war as well as the critical period between the wars in which the tank was both refined and neglected He also looks in detail at the amalgamations and

mechanization of the horsed cavalry which led to the formation of the Royal armored Corps in 1939 His detailed and absorbing narrative covers the social and human aspects of the story as well as the technology and explains how the nation that invented and first fielded the tank in 1916 struggled to maintain the lead after the Armistice **Armor** ,2005

Crusader and Covenanter Cruiser Tanks 1939-45 David Fletcher,2012-05-20 The Covenanter which never saw active service and Crusader Cruiser tanks were developed between 1939 and 1940 The Crusader first saw action in the North African desert in June 1941 its speed and sleek design made it a hard target to hit and the tank was well respected by the Afrikakorps for its velocity in combat But its hurried development prior to World War II also made it prone to mechanical failure This book examines the Covenanter and the many variants of the Crusader tank detailing the designs developments and disappointments of these infamous World War II tanks *Hobart's 79th Armoured Division at War* Richard Doherty,2012-02-29 This WWII history chronicles the remarkable career of a brilliant British Army commander and the innovative armored vehicles he created Joining the Royal Tank Corps in 1923 Major General Percy Hobart quickly established himself as one of the foremost thinkers on armored warfare By 1938 he was GOC Mobile Division later 7th Armored Division in Egypt He was also known for not suffering fools a tendency that got him briefly relieved of his command But during World War II Winston Churchill called Hobart back to Army service with orders to train the now legendary 11th Armored Division He was then tasked with designing specialist armored fighting vehicles capable of breaching the Atlantic Wall Known as Hobart s Funnies these unique vehicles included mine clearing tanks bridge carrying tanks flamethrowers swimming tanks and amphibious assault vehicles Operated by Hobart s 79th Armored Division they played a major part in the D Day landings and the subsequent European campaigns Hobart s skills played a significant part in the final Allied victory and the specialized funnies he introduced to modern warfare have since been adopted by all armies all over the world Drawing on official records and personal recollections historian Richard Doherty tells the incredible story of Percy Hobart and his 79th Armored Division *Armoured Fighting Vehicles of the World: British and Commonwealth AFVs, 1940-46* Duncan Crow,1971 **Military Training in the British Army, 1940-1944** Dr Timothy Harrison Place,Timothy Harrison Place,2016-01-20 In this study the author traces the reasons for the British Army s tactical weakness in Normandy to flaws in its training in Britain The armour suffered from failures of experience Disagreements between General Montgomery and the War Office exacerbated matters **British Armour in the Normandy Campaign** John Buckley,2004-07-22 This book is an innovative study of the Normandy campaign and the perceived failure of British forces there It is essential reading for all students of military history and general readers with an interest in the subject **Crusader vs M13/40** David Greentree,2024-08-15 This illustrated study assesses the British Crusader and the Italian M13 40 two medium tanks that played crucial roles in World War II s Desert War Making its combat debut in North Africa during December 1940 Italy s M13 40 medium tank was armed with a 47mm main gun Its British opposite number the Crusader I was armed with a 2 pdr

40mm main gun it entered the fighting in June 1941 While the M13 40 could fire armour piercing rounds but also high explosive ammunition against infantry and towed gun targets the Crusader could only fire armour piercing ammunition In this book David Greentree charts the evolution of these two tanks as the Desert War raged on While the Crusader III making its debut at the Second Battle of El Alamein in October 1942 was armed with the much more effective 6 pdr 57mm the M13 40 could not be upgunned or uparmoured new types such as the US built M3 Grant tipped the balance in favour of the British Joined in the front line by the similar M14 41 the M13 40 soldiered on as the M4 Sherman also entered British service the Italian tanks were largely wiped out as the Axis forces retreated from Egypt Featuring all new full colour artwork archive photographs and expert analysis this engaging study assess the origins development and combat effectiveness of these two mainstays of the Desert War during 1941 42

Blitzkrieg to Desert Storm Robert Michael Citino, 2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals the lessons of India s blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War Citino especially considers the evolution of U S doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms Brimming with new insights Citino s study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9 11 era

Collision of Empires A. D. Harvey, 1992-01-01 The only previous war to match the world wars of the twentieth century in scale and impact was the French War of 1793 1815 This book is the first book to compare these conflicts which together shaped the history of the modern world A D Harvey relates the causes conduct and outcome of these wars to the fundamental nature of the societies which fought them Political decisions economic power and social

attitudes interfaced with the demands of military technology to determine the outcome of each case Britain is the centre of focus but is seen against a background of the other combatants Harvey's ability to make large scale generalisations is backed up by a wealth of fascinating and carefully documented detail making this outstanding and exceptionally well written book a pleasure to read The author has tackled a huge subject and has not been afraid to face up to either its complexities or its implications By asking new questions and using a range of unfamiliar sources this book provides an unusually profound analysis not only of these wars but also of the nature of modern society and of our understanding of the past Aleppo Ross Burns, 2016-08-25 Aleppo is one of the longest surviving cities of the ancient and Islamic Middle East Until recently it enjoyed a thriving urban life in particular an active traditional suq whose origins can be traced across many centuries Its tangle of streets still follow the Hellenistic grid and above it looms the great Citadel which contains recently uncovered remains of a Bronze Iron Age temple complex suggesting an even earlier role as a high place in the Canaanite tradition In the Arab Middle Ages Aleppo was a strongpoint of the Islamic resistance to the Crusader presence Its medieval Citadel is one of the most dramatic examples of a fortified enclosure in the Islamic tradition In Mamluk and Ottoman times the city took on a thriving commercial role and provided a base for the first European commercial factories and consulates in the Levant Its commercial life funded a remarkable building tradition with some hundreds of the 600 or so officially declared monuments dating from these eras and its diverse ethnic mixture with significant Kurdish Turkish Christian and Armenian communities provide a richer layering of influences on the city's life In this volume Ross Burns explores the rich history of this important city from its earliest history through to the modern era providing a thorough treatment of this fascinating city history accessible both to scholarly readers as well as to the general public interested in a factual and comprehensive survey of the city's past

Allied Armour, 1939-1945 Anthony Tucker-Jones, 2020-12-02 An important review of armoured warfare armoured vehicle design tactics and operational issues during World War 2 it comes highly commended Dr Stuart C Blank Military Archive Research During the first years of the Second World War Allied forces endured a series of terrible defeats at the hands of the Germans Italians and Japanese Their tanks were outclassed their armored tactics were flawed But the advent of new tank designs and variants especially those from the United States turned the tables Although German armor was arguably still superior at the end of the war the competence of Allied designs and the sheer scale of their production gave them a decisive advantage on the armored battlefield This is the fascinating story that Anthony Tucker Jones tells in this book which is part of a three volume history of armored warfare during the Second World War Chapters cover each major phase of the conflict from the early blitzkrieg years when Hitler's Panzers overran Poland France and great swathes of the Soviet Union to the Allied fight back in tank battles in North Africa Italy and northern Europe He also covers less well known aspects of the armored struggle in sections on Allied tanks in Burma India and during the Pacific campaign Technical and design armored are a key element in the story but so are changes in tactics and the role of the tanks in the integrated all arms forces that

overwhelmed the Axis The matter of armoured vehicles and their role in the turning of the tide against Germany is covered brilliantly in Anthony Tucker Jones s excellent treatise Books Monthly Very Highly Recommended Firetrench The Engineer ,1985 Royal Armoured Corps Journal ,1958 A History of the Mediterranean Air War, 1940-1945. Volume 2 Christopher Shores,Giovanni Massimello,Russell Guest, Frank Olynky,Winfried Bock,2014-07-19 This second volume in the seminal series on aerial combat pilots and tactics in Libya and Egypt in the middle of World War II In volume two of this series historian Christopher Shores begins by exploring the 8th Army s movements after Operation Crusader when they were forced back to the Gazala area in northeastern Libya as well as their defeat in June 1942 the loss of Tobruk and the efforts of Allied air forces to protect their retreating troops Shores continues with the heavy fighting that followed in the El Alamein region This features the Western Desert Air Force and the arrival of the first Spitfires The buildup of both army and air forces and the addition of new commanders on the ground aided the defeat of Rommel s Deutsche Afrika Korps at Alam el Halfa after which came the Second Battle of El Alamein With the arrival of the United States Army Air Force the Allied air forces gained dominance over the Axis Shores recounts the lengthy pursuit of the Italo German forces right across Libya including the capture of Tripoli and the breakthrough into Southern Tunisia This allowed a linkup with other Allied forces in Tunisia whose story appears in Volume 3 Included with the action are stories of some of the great fighter aces of the Desert campaign such as Jochen Marseille and Otto Schulz of the Luftwaffe Franco Bordoni Bisleri of the Regia Aeronautica and Neville Duke Billy Drake and Eddie Edwards of the Commonwealth air forces Finally Shores touches on the Allied and Axis night bombing offensives and the activities of the squadrons cooperating with the naval forces in the Mediterranean
