Medicinal and Aromatic Plants: The Basics of Industrial Application M. Paz Arraiza, 2017-10-31 This book provides

readers a fundamental understanding of the science and applications of medicinal and aromatic plant materials. Chapters of this handbook cover the basics of ethnobotany, bioactive compounds and their natural sources. Information about the cosmetic, nutritional, medicinal and industrial uses, dyes, tannins and biocides is also presented. Readers will also learn about concepts central to quality control processes, sustainable management, wild harvesting and the economic valuation of the industrial impact of endemic plants. The volume also presents a case study of the wormwood *Artemisia absinthium* L. which is helpful in explaining the above concepts. This book is intended as a handbook for undergraduate students and teaching professionals in research and higher education institutions involved in agricultural engineering, pharmacy, forestry, natural product chemistry. Non-experts interested in aromatic and medicinal plant agriculture transformation and commercialization will also find the content informative.

Breeding Research on Aromatic and Medicinal Plants Christopher B Johnson, Chlodwig Franz, 2002-10-08. The field of medicinal aromatic plant breeding is growing and changing; this resource will help you stay up to date. In this essential book, researchers from large and small laboratories and institutions throughout Europe and the Mediterranean region explore recent developments in the selection and breeding of aromatic and medicinal plants. They take varied approaches from traditional breeding to the use of molecular markers and complement them with up to date information on biodiversity and resource conservation. From the editors: It is widely recognized that a strategy of conservation through use by which plant collection via wild harvesting is replaced by controlled cultivation is the best way forward if we are to balance human demands with the necessary conservation of the biodiversity represented by these species. That provides one major driving force for research in this field. Another concern is the very real need for improving the quality control of products on the market both to satisfy consumer demand and to conform with the justifiably increasing requirements for standardization and precise identification of the composition of the plant materials being sold for human use. We hope that this volume will give readers a taste of the exciting developments in the field. **Breeding Research on Aromatic and Medicinal Plants** examines breeding for resistance and abiotic factors, manipulating natural product accumulation through genetic engineering, biochemical and molecular regulation of essential oil accumulation, economic and legal considerations that breeders will encounter, the ethical aspects of breeding these plants.

Medicinal and Aromatic Plants of the World Ákos Máthé, 2015-09-30. Medicinal and aromatic plants (MAPs) have accompanied mankind from its very early beginnings. Their utilization has co-evolved with *Homo sapiens* itself, bringing about a profound increase in our scientific knowledge of these species, enabling them to be used in many facets of our life, e.g. pharmaceutical products, feed and food additives, cosmetics, etc. Remarkably, despite the new renaissance of MAPs usage, ca. 80 % of the world's population is relying on natural substances of plant origin, with most of these botanicals sourced from the wild state. This first volume and ultimately the series provides readers with a wealth of information on medicinal and aromatic plants.

Medicinal and Aromatic Plants Tariq Aftab, Khalid Rehman Hakeem, 2021-03-27. Before the concept of history began, humans undoubtedly

acquired life benefits by discovering medicinal and aromatic plants MAPs that were food and medicine Today a variety of available herbs and spices are used and enjoyed throughout the world and continue to promote good health The international market is also quite welcoming for MAPs and essential oils The increasing environment and nature conscious buyers encourage producers to produce high quality essential oils These consumer choices lead to growing preference for organic and herbal based products in the world market As the benefits of medicinal and aromatic plants are recognized these plants will have a special role for humans in the future Until last century the production of botanicals relies to a large degree on wild collection However the increasing commercial collection largely unmonitored trade and habitat loss lead to an incomparably growing pressure on plant populations in the wild Therefore medicinal and aromatic plants are of high priority for conservation Given the above we bring forth a comprehensive volume Medicinal and Aromatic Plants Healthcare and Industrial Applications highlighting the various healthcare industrial and pharmaceutical applications that are being used on these immensely important MAPs and its future prospects This collection of chapters from the different areas dealing with MAPs caters to the need of all those who are working or have interest in the above topic
