Arrow and the Ascent of Modern Economic Theory George R. Feiwel,1987 **Arrow and the Ascent of Modern Economic Theory/Arrow and the Foundation of the Theory of Economic Policy** George R. Feiwel,1987-05-01

Modern Theories of Justice Serge-Christophe Kolm,2002 This first book in English by Serge Christophe Kolm provides an overview of his far reaching vision of distributive justice Kolm derives justice from considerations of rationality Justice cannot be defined by one all encompassing principle or set of a few principles It has the general form of an equality of individuals liberties in a broad sense with different applications and specific adjustments when several liberties conflict or when everybody prefers another outcome Kolm describes the theory of justice and presents and evaluates each of the various modern theories principles or criteria of justice He shows how some complement each other how some are unworkable and how some could be rescued The result is an intensive introduction to the general theory of justice for economists and noneconomists alike

The Collected Papers of Leonid Hurwicz Samiran Banerjee,2022 Introduces non specialist readers to the life and work of Leonid Hurwicz a major contributor to modern theoretical economics Includes papers covering talks Hurwicz gave over the last 4 decades of his life providing a detailed and nuanced understanding of economic systems and the informational and incentive issues in designing mechanisms Contains reviews and essays on decision theory and game theory for lay readers Brings together reminiscences from co authors and colleagues offering insights into Hurwicz as a person and scholar Book jacket

Collected Papers Robert J. Aumann,2000 Robert Aumann s career in game theory has spanned over research from his doctoral dissertation in 1956 to papers as recent as January 1995 Threaded through all of Aumann s work symbolized in his thesis on knots is the study of relationships between different ideas between different phenomena and between ideas and phenomena When you look closely at one scientific idea writes Aumann you find it hitched to all others It is these hitches that I have tried to study

Entrepreneurship, Innovation, and the Growth Mechanism of the Free-Enterprise Economies Eytan Sheshinski, Robert J. Strom, William J. Baumol, 2021-03-09 How much credit can be given to entrepreneurship for the unprecedented innovation and growth of free enterprise economies In this book some of the world's leading economists tackle this difficult and understudied question and their responses shed new light on how free market economies work and what policies most encourage their growth The contributors take as their starting point William J Baumol's 2002 book *The Free Market Innovation Machine* Princeton which argued that independent entrepreneurs are far more important to growth than economists have traditionally thought and that an implicit partnership between such entrepreneurs and large corporations is critical to the success of market economies The contributors include the editors and Robert M Solow Kenneth J Arrow Michael M Weinstein Douglass C North Barry R Weingast Ying Lowrey Nathan Rosenberg Melissa A Schilling Corey Phelps Sylvia Nasar Boyan Jovanovic Peter L Rousseau Edward N Wolff Deepak Somaya David J Teece Naomi R Lamoreaux Kenneth L Sokoloff Yochanan Shachmurove Ralph E Gomory Jonathan Eaton Samuel S Kortum Alan S Blinder Robert J Shiller Burton G Malkiel and Edmund S Phelps The Role of Scientific and Technical Data and Information in the Public Domain National Research Council, Policy and Global Affairs, Board on International Scientific Organizations, Office of International Scientific and Technical Information Programs, Steering Committee on the Role of Scientific and Technical Data and Information in the Public Domain, 2003-08-29 This symposium brought together leading experts and managers from the public and private sectors who are involved in the creation dissemination and use of scientific and technical data and information STI to 1 describe and discuss the role and the benefits and costs both economic and other of the public domain in STI in the research and education context 2 to identify and analyze the legal economic and technological pressures on the public domain in STI in research and education 3 describe and discuss existing and proposed approaches to preserving the public domain in STI in the United States and 4 identify issues that may require further analysis **Innovation,**

Organization and Economic Dynamics Giovanni Dosi, 2000-01-01 Conventional economic analysis of property rights in natural resources is too narrow and restrictive to allow for effective comparisons between alternative institutional structures In this book a conceptual framework is developed for the analysis of the *Price Dynamics in Equilibrium Models* Jan Tuinstra, 2001 This text considers a number of adjustment processes in different economic models and investigates their dynamical behaviour in order to approach the question of how economic equilibria are attained The theory of non linear dynamics is used to analyze the dynamics of the different economic models **Organization with Incomplete Information** Mukul Majumdar, Roy Radner, 1998-09-13 There have been systematic attempts over the last twenty five years to explore the implications of decision making with incomplete information and to model an economic man as an information processing organism These efforts are associated with the work of Roy Radner who joins other analysts in this collection to offer accessible overviews of the existing literature on topics such as Walrasian equilibrium with incomplete markets rational expectations equilibrium learning Markovian games dynamic game theoretic models of organization and experimental work on mechanism selection Some essays also take up relatively new themes related to bounded rationality complexity of decisions and economic survival The collection overall introduces models that add to the toolbox of economists expand the boundaries of economic analysis and enrich our understanding of the inefficiencies and complexities of organizational design in the presence of uncertainty *Economic Evolution, Learning, and Complexity* Uwe Cantner, Horst Hanusch, Steven Klepper, 2012-12-06 The twelve papers in this collection grew out of the workshop on Economic Evolution Learning and Complexity held at the University of Augsburg Augsburg Germany on May 23 25 1997 The Augsburg workshop was the second of two events in the Euroconference Series on Evolutionary Economics the first of which was held in Athens Greece in September 1993 A special issue of the Journal of Evolutionary Economics 1993 4 edited by Yannis Katsoulacos on Evolutionary and Neo classical Perspectives on Market Structure and Economic Growth contains selected papers from the Athens conference The Athens conference explored neoclassical and evolutionary perspectives on technological competition and increasing returns It helped to identify the distinguishing features of evolutionary scholarship The Augsburg workshop was more oriented toward exploring methodological issues in evolution of the papers employed new methodology and related scholarship A number of methods such as genetic programming and experimental analysis some developed new econometric techniques or raised new empirical issues in evolutionary economics and some relied on simulation techniques Twelve papers covering a range of areas were selected for this collection The papers address central issues in evolutionary and Schumpeterian accounts of industrial competition learning and innovation Information and Learning in Markets Xavier Vives, 2010-01-25 The ways financial analysts traders and other specialists use information and learn from each other are of fundamental importance to understanding how markets work and prices are set This graduate level textbook analyzes how markets aggregate information and examines the impacts of specific market arrangements or microstructure on the

aggregation process and overall performance of financial markets Xavier Vives bridges the gap between the two primary views of markets informational efficiency and herding and uses a coherent game theoretic framework to bring together the latest results from the rational expectations and herding literatures Vives emphasizes the consequences of market interaction and social learning for informational and economic efficiency He looks closely at information aggregation mechanisms progressing from simple to complex environments from static to dynamic models from competitive to strategic agents and from simple market strategies such as noncontingent orders or quantities to complex ones like price contingent orders or demand schedules Vives finds that contending theories like informational efficiency and herding build on the same principles of Bayesian decision making and that irrational agents are not needed to explain herding behavior booms and crashes As this book shows the microstructure of a market is the crucial factor in the informational efficiency of prices Provides the most complete analysis of the ways markets aggregate information Bridges the gap between the rational expectations and herding literatures Includes exercises with solutions Serves both as a graduate textbook and a resource for researchers including financial analysts

The Nobel Memorial Laureates in Economics Howard R. Vane, Chris Mulhearn, 2005 this book will continue to share shelf space next to my current textbooks As a librarian such utility makes this a desirable addition to any educator's collection As a history of economic thought book Vane and Mulhearn have brought together a breadth of information that can be found through disparate sources but at a cost of effort and especially for students qualitative decisions regarding sources The convenience of their starting methodology breadth over depth coverage and clear intention of writing to an audience of students makes this a useful text Kirk Douglas Johnson *Journal of the History of Economic Thought* The essays summarizing the main achievements of the prize winners are well written and to the point They are short enough that they never cause the reader to lose interest but substantive enough to let you know what the winners' accomplishments amount to These compact factually accurate essays mark the real value of the book as a reference work there is little for which to fault the authors Vane and Mulhearn have done a very nice job with the book and it is an added bonus that it includes a formal portrait photograph of each prize winner Bradley W Bateman *History Political Economy* Vane and Mulhearn have produced a useful reference work John Quiggin *Economic Analysis and Policy* This collection has the capacity to surprise the reader You learn all sorts of new and sometimes admirable things about these economists and about the richness of the profession that is often obscured from students of the subject John Lodewijks *History of Economics Review* This volume provides a non technical description of the main published works of every Nobel Memorial Economics winner from the first annual award in 1969 to 2004 This is a reference book par excellence it will interest not only those having some involvement with economics past or present but it should also attract more general readers wanting to unravel some of the mysteries surrounding economics and economists *Economic Outlook and Business Review* Vane and Mulhearn have produced an introduction to the careers and major publications of the 55 economists awarded the Bank of Sweden Prize

in Economic Sciences in Memory of Alfred Nobel between 1969 and 2004 The short essays on each economist are readable and accurate they provide a discussion of the subjects major contributions and an introduction to the secondary literature often with the outstanding reports on the laureates work provided to the Economic Prize Committee of the Royal Swedish Academy of Sciences The collection is introduced with a review of the prize and the common characteristics of the winners thus far all neatly summarized in a table with each laureate s year and country of birth university year of first and higher degrees affiliation at the time of the award field of study and a summary citation This volume provides a very useful introduction to the development of economic ideas in the last three quarters of the 20th century Highly recommended D E Moggridge Choice Every serious research economist will want to have a look at this comprehensive work Edwin Burmeister Research Professor of Economics Duke University US The award of the Nobel Prize has for more than thirty years been economists way of informing the public at large about what work most of them think is important and about who has done it Anyone seeking to understand the development of recent economic ideas and the profession that has created them must deal with the Prize s history and Vane and Mulhearn have provided an indispensable guide to it brief readable and accurate David Laidler Professor Emeritus and Bank of Montreal Professor University of Western Ontario Canada This is a splendid account of the personal stories of the Nobel Laureates in Economics the diversity of practice of recent economists and perhaps above all the nature o

Economics and National Security Craufurd D. Goodwin, 1991 This is an examination of the interaction between economics and national security which explores why the area of security studies has long been neglected by economists even though defence and wartime expenditures regularly consume large portions of government income The contributors demonstrate that the history of the relationship between economics and national security is far richer than previously thought
