Art Craft And Science Of Evaluation Capacity Building New Directions For Evaluation:

Evaluating Capacity Development Douglas Horton, 2003 The perspective that informs this important book is that every evaluation of a capacity development effort should itself contribute to the capacity development effort and ultimately to the organization's performance This is a revolutionary idea in evaluation With the idea have come the questions Can it be done And if it is done what will be the consequences This book elucidates and deepens the idea shows it can be done and examines the consequences both intended and unintended of engaging in capacity development evaluation *The Art, Craft, and Science of Evaluation Capacity Building* Donald W. Compton, Michael L. Baizerman, Stacey Hueftle-Stockdill, 2002-04-23 Evaluation Capacity Building ECB is now being given attention but as yet there is only a small literature about this necessary and seemingly rare process ECB is the often invisible work carried out within or between organizations to sustain the evaluation unit and evaluation studies It is the ongoing everyday work necessary to ensure quality evaluation practice It is the vision the political and administrative effort and management craft which continues to make possible over time the organizational conditions in which professional evaluation work is completed and used requested carried out and used ad infinitum This issue is given over to the conceptualization and illumination of the evaluation capacity building process Four case studies written by contributors show the complexity of the ECB process and its variation in different organizational structures and environments Included are a federal agency The Center for Disease Control and Prevention a nationwide voluntary health organization The American Cancer Society an international development agency The World Bank and a local school district The Anoka Hennepin School District Minnesota The editors introduce and define ECB compare it to evaluation practice and draw out ECB themes from the case studies These sections are used to suggest a practical framework for understanding the core ECB checklist and to provide a conceptual model for theory building and the collection of ECB case studies The Evaluation Handbook Debra J. Rog, Leonard Bickman, 2025-03-26 This pragmatic evaluator's companion from leaders in the field provides essential guidance for designing implementing and managing exemplary evaluations using established and emerging methods designs and analyses With contributions from skilled experts the Handbook has a unique focus on the competencies identified by the American Evaluation Association as critical for evaluators Balancing rigor with practical mentor style guidance chapters build the reader's skills for tailoring studies creatively to address specific evaluation situations and contexts optimizing communication and collaborative decision making and centering equity and justice This insider's guide is replete with detailed examples real world scenarios and other helpful features including chapter overviews and an end of book glossary Evaluation in Action Jody L. Fitzpatrick, Christina Christie, Melvin M. Mark, 2009 An innovative approach to program evaluation that takes readers behind the scenes of real evaluations and the decisions the evaluators made Designing and Implementing Effective Evaluations Kenneth J. Linfield, Steven Kniffley, 2022-12-06 Designing and Implementing Effective Evaluations provides extensive real life examples of program

evaluations that illustrate the various elements and steps in conducting a successful evaluation. The detailed and diverse range of case studies show the common elements, methods, approaches, and processes of program evaluations while also demonstrating the way that good evaluators adapt and tailor those methods to the specific characteristics and needs of a given program. The chapters explore the process of problem solving while navigating multiple stakeholders, competing agendas, and varying environments. The book introduces conversations concerning how to adapt evaluation processes and concepts with culturally different individuals and communities. It discusses the role of culture in navigating a meaningful evaluation process when significant cultural differences exist between the evaluator and individuals that make up the organization. The text is a vital resource for postgraduate students in program evaluation courses in Psychology, Education, Public Health, Social Work, and related fields.

Interactive Evaluation Practice Jean A. King, Laurie Stevahn, 2012-04-12 You're about to start your first evaluation project. Where do you begin? Or you're a practicing evaluator faced with a challenging situation. How do you proceed? How do you handle the interactive components and processes inherent in evaluation practice? Use *Interactive Evaluation Practice* to bridge the gap between the theory of evaluation and its practice. Taking an applied approach, this book provides readers with specific interactive skills needed in different evaluation settings and contexts. The authors illustrate multiple options for developing skills and choosing strategies systematically, highlighting the evaluator's three roles as decision maker, actor, and reflective practitioner. Case studies and interactive examples stimulate thinking about how to apply interactive skills across a variety of evaluation situations. From beginning to end, this book is an indispensable resource for those responsible for the evaluation process. In essence, here's a chance to learn from masters about acquiring mastery. The reader will learn how to view the EAG as a structure of expertise, its use for political legitimacy, and as a response to a variety of constituencies. Guidelines on how to recruit, select, orient, train, monitor, assess, and evaluate EAG members are also included.
