neoclassical style Given the timing of the evolution of art supplies and the shift in artistic subject matter I wondered whether the economic effects of France's industrial revolution were able to influence art In order to understand how depicted subject matter changed I turned to the Paris Salon catalogs that recorded the artwork exhibited throughout 19th century Paris I digitized the 1865 Paris Salon catalog and compiled it with categorizations made by Jon Whiteley and digitized by Diana Greenwald I recorded the artist's name gender and birthplace along with their Salon entry number the title of the painting and who the artist apprenticed to if applicable From there I divided the artists by birthplace into two groups Parisians and non Parisians to determine if artists born in Paris who were exposed to more urbanization and modernity chose to paint more urban or rural scenes in art This project takes an economic approach to examine how industrialization influenced art More specifically I focus on the question of how the subject matter being depicted in the 1865 Paris Salon exhibition was impacted by the industrial revolution Were Parisian artists able to paint more rural or urban scenes Is it possible industrialization influenced the scenes painters depict My argument is deeply rooted in economic history the art history data I have collected and the intersection between the two The interdisciplinary work has been a phenomenal exploration of combining quantitative and creative disciplines to determine how the art world hinges on the economy and its developments
