Hitler's Party Comrades Jürgen W. Falter,2025-08-19 This study is the first to analyze both the Nazi party s membership development and composition as well as the motives for joining and the exoneration strategies of former party members chosen during the denazification process This book examines how many members joined the party between 1919 and 1945 over 10 million how many left more than 750 000 and how many the party lost through death in World War II Furthermore the question of whether the NSDAP was a middle class or a catch all party the latter being closer to the truth is linked to the thesis of whether party members predominantly belonged to the front line fighter generation or the generation of war children born between 1900 and 1915 The study is based on the most comprehensive sample to date more than 50 000 cases from both central NSDAP membership registers covering Germany Austria and the occupied Czech territories This book also presents a unique analysis of the influence of the denominational context the dominant local economic sector and the extent of mass unemployment on the recruitment success of the National Socialists Hitler s Party *Comrades* is a comprehensive guide to understanding the Nazi party and will be of interest to scholars and students of World War II and European history
