from the professionals of the maternity hospital and then of the nursery where she was placed after a dramatic episode of psychological coma During the first year of her life in order to escape the insecurity generated by her parents Melanie fell asleep as soon as they want to carry her but woke up as if by magic as soon as she was in other safer even unknown arms Lorenzo barely two weeks old cried during a consultation and quickly calmed down in the arms of a nursery nurse while his mother admitted that she could never calm him down at home For the next two weeks his crying quickly subsided because in order not to be mistreated by his father who was exasperated by his cries Lorenzo had learned to cry quietly Placed in an institution at the age of one month he was a very gentle baby shying away from relationships silent but he changed completely when he found himself facing his father who had shaken him His whole body stiffened and he stared at his father with a hypnotic and worrying look It would be several weeks before he re established quality Wi Fi connections with his mothering Eric was not lucky enough to be separated early enough from his parents who abandoned him in his bed deprived of emotional and sensory life deprived of Wi Fi Removed from his family at the age of three he was a little boy who lost interest in humans but was fascinated by beeps the fridge lamp toy batteries electric buttons He became an electronic baby looped disconnected from the web of humans These stories tell us how babies from birth have this skill to test by themselves the quality of the connections of the human network that surrounds them and to choose their first emotional attachments according to the quality of the signals received in return without worrying about their filiation or their biological reality A shock They reveal to us through this unheard of skill what is human in a person and how the little person becomes human A new and modern vision of the human baby These babies show us the intense efforts they make from the moment they are born to relate and to be kind to make themselves light in the arms that carry them to exist in the brains they cram into to ensure their safety and to download the knowledge of the world they need to survive Babies very actively adapt to their new life as earthlings through the Wi Fi connections they make in the first few minutes of their lives The author concludes his book with a call to consider the reality of the psychic suffering of abused babies Twenty five years ago the medical world finally discovered that babies could feel physical pain which has since been recognized and treated Before that they were operated on without any anesthesia From today s perspective this is barbaric It is urgent to make the same intellectual revolution for the psychological pain and emotional distress of the infant which is detectable and curable if we know how to spot the signs from birth The psychological future of thousands of babies every year depends on it Let s save human babies A child psychiatrist in France for 25 years the author has received three awards for his work on children from the Aide Sociale l Enfance the Fondation pour la Recherche M dicale and the Observatoire National de l Enfance en Danger He was also the winner of a short story contest on psychiatry He has worked for more than 20 years in a nursery in Maine et Loire in the west of France *The London and Paris Observer* ,1826 **A Companion to Jean-Luc Godard** Tom Conley,T.
