Science as a Quest for Truth Bengt Kristensson Uggla, 2024-01-05 This book presents a unified theory of science by challenging some of the lingering myths and anachronisms associated with our understanding of what it means to be scientific The book presents a new science narrative focused on the dialectics of discovering inventing new worlds in an age of hermeneutics and as an alternative to the prevailing view of the history of science as largely a confrontation between science and religion It argues that the development of modern science is in a complex way intertwined with the history of the university a knowledge institution that throughout the centuries has repeatedly managed to reinvent itself so successfully indeed that it has paradoxically led to a fundamental crisis of identity today The book suggests that in order to recognize science as a quest for truth in a globalizing world of cognitive horizontalization we need to transcend the false alternatives of objectivistic certitude possessing the Truth and relativistic resignation post truth by means of a new focus on collegial practices

Husserl and the Promise of Time Nicolas de Warren, 2009-11-05 This book examines Husserl s treatment of time consciousness and its significance for his conception of subjectivity
