Concepts in Judgement and Decision Research Barry F. Anderson, 1981 **Concepts in Judgement and Decision Research. Definitions, Sources, Interrelations, Comments**, 1981 Judgement and decision making is an intellectual crossroad Researchers and practitioners from all fields come to exchange ideas Yet the exchange is only partial for the participants speak in a variety of dialects They use the same word risk tradeoff utility for differing concepts They use different words composition rule and organizing principle synergistic and nondecomposable and classical and canonical probability for the same concepts This book is designed to remedy this problem The authors discuss the basics needed for translation and transliteration by defining each major concept and providing its source usage current status and relationship with other concepts Risk Allocation and Distributive Justice in the Energy Industry Smith I Azubuike, 2024-09-30 Brings the concept of gross negligence to the fore and highlights how distributive justice forms a better foundation for risk allocation in the offshore energy industry Assessed the practice of risk allocation in gross negligence cases in offshore petroleum drilling contracts Presented a public policy perspective on risk allocation in offshore drilling contracts Discussed gross negligence as a sui generis risk and provides a definitional pathway for determining when gross negligence has occurred and how it should apply to offshore energy drilling contracts to encourage a pollution free drilling operation Advanced the concept of distributive justice as a basis for risk allocation between participants when a downside arises due to gross negligence This book examines the practice of risk allocation in the offshore energy industry through the public policy lens and offers a novel perspective on the concept of gross negligence in risk allocation This perspective is founded on the proportionality element of distributive justice in burden distribution The assessment of how mutual indemnity clauses apply as an absolute shield against liability arising from gross negligence reveals that moral hazard can result from the practice In the analysis this book considers the risk allocation practice in PSC and Concession regimes and how parties liability is determined in drilling contracts This book considers gross negligence a sui generis risk and provides a definitional pathway for determining when gross negligence occurs and how it should apply to offshore drilling contracts Thus it advances an environmental sustainability approach to offshore petroleum drilling operations This book will be useful to operators and contractors resource rich countries insurance companies practitioners scholars and academics interested in risk allocation in the petroleum industry Frontiers of Mathematical Psychology Donald R. Brown, J.E. Keith Smith, 2012-12-06 The papers in this volume were prepared after a preliminary symposium held at The University of Michigan in honor of Clyde Coombs Following the symposium each paper was extensively revised and in many instances completely rewritten to provide a timely and provocative survey of current works in mathematical psychology in the style of Clyde Coombs All of the authors were students or colleagues who were closely influenced by Coombs and our intention was not to cover all approaches to the field but rather to illustrate the continuing influence of Coombs s work and approach to the application of mathematics to basic

psychological phenomena If we are successful it is because of his influence on the contributors v Acknowledgements The preparation of this volume in memory of Clyde Coombs owes much to the many friends students and colleagues of Clyde Coombs who generously provided their support and encouragement Funding was provided by Dean John D Arms of the Horace H

Unity from Diversity Ray W. Cooksey, 2024-07-15 This book is about the choices that researchers can make when building knowledge in social and behavioural spaces Knowledge is the unity we seek and given that social and behavioural research is a human endeavour focusing on human lives and experiences there are diverse and ever evolving pathways towards achieving that unity Any one pathway will only ever yield partial glimpses into human life and diversity of potential choices serves to enrich expand and enlarge those glimpses in pursuit of more complete understanding The book shows that researchers and the researched are far more connected than disconnected in this world and those connections are spread out through a network of interlinked complex systems The book argues that pluralist systemic thinking provides the means by which a researcher s methodological choices for navigating the Data Triangle comprising data source data gathering and data analysis strategies and the learning they provide can be fully and robustly contextualised with respect to those systems and the expectations and

influences that emerge from them Such contextualisations facilitate the refinement augmentation and or narrowing of those choices during the researcher s journey Anticipating choices downstream may have implications for more immediate choices and more immediate choices may create a cascade of necessary downstream choices An essential part of contextualisation involves making choices about patterns of guiding assumptions modes of knowledge building and research frames Researchers must develop the capacity to be flexible and adapt to unanticipated emergent events obstacles and political influences making trade offs where necessary throughout their research journey always with an eye on both feasibility and quality Importantly research has no meaning unless the researcher can ensure that it connects with intended audiences via specific research outcomes especially since the ultimate judgments about the convincingness meaningfulness quality and utility of the research are vested in those audiences Throughout the book special attention is devoted to the role s that stakeholders and gatekeepers play in shaping the researcher s journey as well as to what can be learned from Indigenous First Nations perspectives on social and behavioural research
