Concepts Of Space Ancient And Modern:

Concepts of Space, Ancient and Modern Kapila Vatsyayan, 1991 *Concepts of Space in Greek Thought* Keimpe Algra, 2016-06-21 Concepts of Space in Greek Thought studies ancient Greek theories of physical space and place in particular those of the classical and Hellenistic period These theories are explained primarily with reference to the general philosophical or methodological framework within which they took shape Special attention is paid to the nature and status of the sources Two introductory chapters deal with the interrelations between various concepts of space and with Greek spatial terminology including case studies of the Eleatics Democritus and Epicurus The remaining chapters contain detailed studies on the theories of space of Plato Aristotle the early Peripatetics and the Stoics The book is especially useful for historians of ancient physics but may also be of interest to students of Aristotelian dialectic ancient metaphysics doxography and medieval and early modern physics *Concepts of Space* Max Jammer, 2013-08-16 Historical surveys consider Judeo Christian notions of space Newtonian absolute space perceptions from 18th century to the present more Numerous quotations and references Admirably compact and swiftly paced style Philosophy of Science **Handbook of Happiness** Saamdu Chetri, Tanusree Dutta, Manas Kumar Mandal, Priyadarshi Patnaik, 2023-07-18 This book contains contributions from diverse perspectives and traditions that focus on reflections and happiness practices It addresses diversity in happiness and eastern and western thoughts and practices by contributing authors from around the world from varied backgrounds The book provides ample avenue for readers and researchers to broaden their horizons and deepen their understanding of various aspects of happiness culturally and conceptually It opens opportunities for exploring and understanding how happiness can be practiced experienced taught and learned in various contexts thus assisting both educators and interested readers to create opportunities for themselves or their students to engage in diverse and creative happiness explorations This book is a crucial resource for teachers educators students and researchers involved in the science and practice of happiness It enables them to find new avenues to understand happiness from different perspectives understanding inner and outer spaces and other dimensions of happiness It serves as an essential reference for academicians in related fields of psychology such as cross cultural social and developmental as well as in the upcoming field of happiness studies *Kalāatattvakoāsa: Primal elements-Mahāabhāuta* Kapila Vatsyayan, Bettina Ba umer, 1988 **Space and Political Universalism in Early Modern Physics and Philosophy** Pablo Bustinduy, 2024-03-05 How did early modern philosophy of space shape the modern concept of political universalism In this book Pablo Bustinduy persuasively argues that political universalism emerged from both the developments of Newtonian science and the formulation of the modern philosophy of the State In the metaphysics of an open empty abstract and absolute space Bustinduy suggests the universalist project of modern politics found its logical model and foundation There the anxiety of a dislocated world was overcome and the ontology of modern physics found a specific political expression that despite being besieged by multiple crises still animates our political imagination By offering a

political reading of early modern philosophy of space Space and Political Universalism in Early Modern Physics and Philosophy reveals the connections between the logical development of early modern science the contemporary elaborations of the philosophy of the State and the historical articulations of the Westphalian system early capitalist social formations and the European colonial project In doing so it offers a powerful reflection on how we might detach democracy from the perilous metaphysics of infinite space that has engendered political violence and domination positing space as an emptiness that prevents the closure of the political itself

Space and Spatialization in Contemporary Music: History and Analysis, Ideas and Implementations Maria Anna Harley, 2016-06-08 This dissertation presents the history of space in the musical thought of the 20th century from Kurth to Clifton from Varese to Xenakis and outlines the development of spatialization in the theory and practice of contemporary music after 1950 The text emphasizes perceptual and temporal aspects of musical spatiality thus reflecting the close connection of space and time in human experience A new definition of spatialization draws from Ingarden's notion of the musical work a typology of spatial designs embraces music for different acoustic environments movements of performers and audiences various positions of musicians in space etc The study of spatialization includes a survey of the composers's writings Ives Boulez Stockhausen Cage etc and an examination of their works The final part presents three unique approaches to spatialization Brant's simultaneity of sound layers Xenakis's movement of sound and Schafer's music of ritual and soundscape

Space, Imagination and the Cosmos from Antiquity to the Early Modern Period Frederik A. Bakker, Delphine Bellis, Carla Rita Palmerino, 2019-02-05 This volume provides a much needed historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century It studies conceptions of space that were implicitly or explicitly entailed by ancient medieval and early modern representations of the cosmos The authors reassess Alexandre Koyr's groundbreaking work From the Closed World to the Infinite Universe 1957 and they trace the permanence of arguments to be found throughout the Middle Ages and beyond By adopting a long timescale this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space Readers may explore the work of a variety of authors including Aristotle Epicurus Henry of Ghent John Duns Scotus John Wyclif Peter Auriol Nicholas Bonet Francisco Suarez Francesco Patrizi Giordano Bruno Libert Froidmont Marin Mersenne Pierre Gassendi Gottfried Wilhelm Leibniz and Samuel Clarke We see how reflections on space imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations This volume is a useful resource for historians of philosophy those with an interest in the history of science and particularly those seeking to understand the historical

background of the philosophy of space The Poetics of Perspective James Elkins, 2018-10-18 Perspective has been a divided subject orphaned among various disciplines from philosophy to gardening In the first book to bring together recent thinking on perspective from such fields as art history literary theory aesthetics psychology and the history of mathematics James Elkins leads us to a new understanding of how we talk about pictures Elkins provides an abundantly illustrated history of the theory and practice of perspective Looking at key texts from the Renaissance to the present he traces a fundamental historical change that took place in the way in which perspective was conceptualized first a technique for constructing pictures it slowly became a metaphor for subjectivity That gradual transformation he observes has led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic cognitive or epistemological metaphor Elkins considers how the principal concepts of perspective have been rewritten in work by Erwin Panofsky Hubert Damisch Martin Jay Paul Ricoeur Jacques Lacan Maurice Merleau Ponty and E H Gombrich The Poetics of Perspective illustrates that perspective is an unusual kind of subject it exists as a coherent idea but no one discipline offers an adequate exposition of it Rather than presenting perspective as a resonant metaphor for subjectivity a painter's tool without meaning a disused historical practice or a model for vision and representation Elkins proposes a comprehensive revaluation The perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world Historical Epistemology of Space Matthias Schemmel, 2015-12-11 This monograph investigates the development of human spatial knowledge by analyzing its elementary structures and studying how it is further shaped by various societal conditions By taking a thoroughly historical perspective on knowledge and integrating results from various disciplines this work throws new light on long standing problems in epistemology such as the relation between experience and preformed structures of cognition What do the orientation of apes and the theory of relativity have to do with each other Readers will learn how different forms of spatial thinking are related in a long term history of knowledge Scientific concepts of space such as Newton's absolute space or Einstein's curved spacetime are shown to be rooted in pre scientific structures of knowledge while at the same time enabling the integration of an ever expanding corpus of experiential knowledge This work addresses all readers interested in questions of epistemology in particular philosophers and historians of science It integrates forms of spatial knowledge from disciplines including anthropology developmental psychology and cognitive sciences amongst others Space, Time, World Michael Fortescue, 2024-02-15 Although major cognitively based studies of SPACE and TIME in language have appeared in terms of Frames of Reference these do not extend to a wide selection of the world's languages nor do they combine SPACE and TIME in the overarching concept of WORLD which has its own corresponding frames of reference The aim of relating and unifying these concepts and their expression across languages constitutes the unique thrust of the present book which will represent a significant extension of earlier approaches Among its main conclusions will be that the complete separation of terms for SPACE and TIME is a

relatively recent cultural phenomenon rather than just a metaphorical extension of the latter from the former The book will be of interest to all students and practitioners of Linguistics in particular Cognitive Linguistics and Linguistic typology but also to a more general readership interested in the historical evolution of concepts of SPACE and TIME

Space and Self in Early Modern European Cultures David Warren Sabean,Malina Stefanovska,2012-01-01 The notion of selfhood conjures up images of self sufficiency integrity introspectiveness and autonomy characteristics typically associated with modernity The seventeenth century marks the crucial transition to a new form of bourgeois selfhood although the concept goes back to the pre modern and early modern period A richly interdisciplinary collection Space and Self integrates perspectives from history history of literature and history of art to link the issue of selfhood to the new and vital literature on space As Space and Self shows there have at all times been multiple paths and alternative possibilities for forming identities marking personhood and experiencing life as a concrete singular individual Positioning self and space as specific and evolving constructs a diverse group of contributors explore how persons become embodied in particular places or inscribed in concrete space Space and Self thus sets the terms for current discussion of these topics and provides new approaches to studying their cultural specificity
