Conceptual Design of Distillation Systems Michael F. Doherty, Michael F. Malone, 2001 *Recent Advances In Sustainable Process Design And Optimization (With Cd-rom)* Mahmoud M El-halwagi, Dominic Chwan Yee Foo, Raymond Girard R Tan, 2012-05-24 This book is a compilation of the various recently developed techniques emphasizing better chemical processes and products with state of the art contributions by world renowned leaders in process design and optimization. It covers various areas such as grass roots design, retrofitting, continuous and batch processing, energy efficiency, separations and pollution prevention, striking a balance between fundamental techniques and applications. The book also contains industrial applications and will serve as a good compilation of recent industrial experience for which the process design and optimization techniques were applied to enhance sustainability. Academic researchers and industrial practitioners will find this book useful as a review of systematic approaches and best practices in sustainable design and optimization of industrial processes. The book is accompanied by some electronic supplements i.e. models and programs for selected chapters.

Food Process Design Zacharias B. Maroulis, George D. Saravacos, 2003-05-09 This timely reference utilizes simplified computer strategies to analyze, develop and optimize industrial food processes and offers procedures to assess various operating conditions, engineering and economic relationships and the physical and transport properties of foods for the design of the most efficient food manufacturing technologies and eq. *Robust Control Design with MATLAB®* Da-Wei Gu, Petko H. Videodisc Compendium, 1995 Product and Process Design Jan Harmsen, André B. de Haan, Pieter L. J. Swinkels, 2024-05-20 Product and process design driving sustainable innovation is the 2nd edition of a comprehensive textbook for product and process design courses at BSc, MSc, EngD and PhD level. It covers both heuristics based design methods as well as systems engineering approaches. It contains specific methods to co design products and processes so that both designs are better than when these designs are made separately. This integrated combination makes the book unique.

For making designs that contribute to the Sustainable Development Goals of the United Nations specific methods are provided for the People Planet and Prosperity dimensions This second edition of the book includes examples and exercises for each design method which makes it very suitable for teaching purposes The book is furthermore of interest to industrial process and product developers for many industry branches as it provides methods for design modelling and experimental validation for each innovation stage It is also very useful for R D managers as it provides guidelines for essential activities in each innovation stage discovery concept feasibility development detailed engineering leading to successful implementations of new processes and new products Selected Water Resources Abstracts ,1970 *Solar Energy Update* ,1981-04
