Conceptual Modeling - ER 2005 Christian Kop, Heinrich C. Mayr, John Mylopoulos, Óscar Pastor, 2005-10-11 Conceptual modeling is fundamental to any domain where one must cope with complex real world situations and systems because it fosters communication between technology experts and those who would benefit from the application of those technologies Conceptual modeling is the key mechanism for understanding and representing the domains of information system and database engineering but also increasingly for other domains including the new virtual environments and the information system that support them The importance of conceptual modeling in software engineering is evidenced by recent interest in model driven architecture and extreme programming Conceptual modeling also plays a

prominent role in various technical disciplines and in the social sciences The Annual International Conference on Conceptual Modeling referred to as the ER Conference provides a central forum for presenting and discussing current research and applications in which conceptual modeling is the major emphasis In keeping with this tradition ER 2005 the 24th ER Conference spanned the spectrum of conceptual modeling including research and practice in areas such as theories of concepts and ontologies underlying conceptual modeling methods and tools for developing and communicating conceptual models and techniques for transforming conceptual models into effective information system implementations Moreover new areas of conceptual modeling including Semantic Web services and the interdependencies of conceptual modeling with knowledge based logical and linguistic theories and approaches were also addressed *Conceptual Modeling* Isabelle Comyn-Wattiau, Katsumi Tanaka, Il-Yeol Song, Shuichiro Yamamoto, Motoshi Saeki, 2016-11-07 This book constitutes the refereed proceedings of the 34th International Conference on Conceptual Modeling ER 2016 held in Gifu Japan in November 2016 The 23 full and 18 short papers presented together with 3 keynotes were carefully reviewed and selected from 113 submissions The papers are organized in topical sections on Analytics and Conceptual Modeling Conceptual Modeling and Ontologies Requirements Engineering Advanced Conceptual Modeling Semantic Annotations Modeling and Executing Business Processes Business Process Management and Modeling Applications and Experiments of Conceptual Modeling Schema Mapping Conceptual Modeling Guidance and Goal Modeling
