Concepts Andy Blunden, 2012-07-20 Andy Blunden presents a critical review of theories of Concepts in cognitive psychology analytical philosophy linguistics conceptual change theory and other disciplines The problems in these disciplines has led many to abandon the idea of Concepts altogether particularly those taking an interactionist approach Blunden responds with an historical review focussing on the idealist philosophy of Hegel its reception and transformation in the development of positive science and finally the cultural psychology of Lev Vygotsky He then proposes an approach to Concepts which draws on Activity Theory Concepts are equally subjective and objective units of consciousness and of the cultural formation of which one is a part This continues the author's earlier work in *An Interdisciplinary Theory of Activity* Brill 2010

Avoiding a Parental Freak-Out Michael Bozack, 2020-09-03 Students across America have learned that the transition from high school to college is one of the toughest assignments they have ever received And for a Christian student achieving success in a secular university is even harder Did you know that Only 32% of high school seniors graduate with the skills they

need for college Only 20% of entering college students have the basic quantitative skills necessary to compare ticket prices or calculate the cost of food By the end of their freshman year 30% of college students drop out The four year graduation rate for students attending public colleges and universities is currently 33% The six year rate is 58% More than 85% of college students feel overwhelmed and 51% report that things are hopeless Christian students are not immune to the bad statistics They should be our best college students but many are falling prey to the same forces that derail secular students What is a parent to do Help is here In this book we give Christian parents the straight scoop on how to prepare your kids for college Far more Christian students end up at secular colleges and universities than Christian colleges but there are few resources to help parents We show you what to do what to avoid what critical information you need and which battles to fight We offer tons of talking points to share with your kids And best we save you sleep frustration money heartaches pints of Baskin Robbins double chocolate and hours of watching the Hallmark Channel to chill out Related keywords Christian college planning parent college planning

Conspiracy and Contingency Thorsten Botz-Bornstein, 2025-05-13 What do conspiracy theories algorithms and meritocracy have in common All three avoid contingency and frantically look for necessities The COVID 19 crisis has brought about a proliferation of conspiracy theories that reject among other things official accounts of the virus s origins and remedies and sometimes even the existence of the virus itself Conspiratorial thinking usually links events to secret plots concocted by powerful conspirators whether it be Bill Gates or Big Pharma In this book I point to another dominant driving force the desire to find simple and apparently reasonable explanations for phenomena that are actually purely random and contingent Often unfounded conspiracy theories emerge because contingency is not accepted and necessities are looked for at all costs Nothing happens by chance and there must be a plan or an intelligent design behind everything This book deals with contingency phobia This special phobia is not only manifest in most unwarranted conspiracy theories but it also appears in Western culture as a recurrent psychological cognitive and scientific pattern It is the cause of

a variety of other phenomena that have become emblematic for liberal democracies such as the contemporary algorithm culture or the obsession with merit and ranking Not only the conspiratorial mindset rejects a world of contingency and strives to create a universe structured by a necessary order life coaches algorithm engineers and neoliberal meritocrats all do the same This book analyses these phenomena by using the same criteria how do humans deal with contingency and how do they try to establish necessities Some philosophies such as Daoism and Zen Buddhism make unwarranted conspiracy theories quasi impossible because they find original ways of combining contingency with ontological theological or cosmological premises I identify sources that other disciplines examining conspiracy theories for example political science anthropology psychology or sociology have rarely seen as primary Political scientists focus on the macro level and construe conspiracy theories mostly as national or regional phenomena whereas anthropologists psychologists and sociologists tend to focus on the micro level The present study is an example of practical philosophy depicting conspiratorial thinking as an organic or a dynamic phenomenon by crystallising cognitive and cultural necessity contingency patterns that can be found in politics culture religion and science
