Basic Books on Industry and Labour International Labour Office,1989 Conciliation and arbitration procedures in labour disputes International Labour Office,1980 **Conciliation and Arbitration Procedures in Labour Disputes** Bureau international du travail,1980 **Conciliation and Arbitration Procedures in Labour Disputes** International Labour Office,1980 *Grievance Arbitration* Arnold Zack,International Labour Office,1977 Not all industrial disputes are about claims for better conditions than those to which the workers may already be entitled A large proportion are so called grievance disputes over difficulties in the application of labour legislation collective agreements or individual contracts of employment Disputes over the application of collective agreements can often be most easily settled if labour and management agree to submit them to arbitration by an independent impartial outsider The present guide which is a companion volume to Conciliation in industrial disputes published by the ILO in 19 *A Handbook of Dispute Resolution* Karl J Mackie,Karl Mackie,2013-01-11 A Handbook of Dispute Resolution examines the theoretical and practical developments that are transforming the practice of lawyers and other professionals engaged in settling disputes grievance handling and litigation The book explains what distinguishes ADR from other forms of dispute resolution and examines the role ADR can play in a range of contexts where litigation would once have been the only option such as family law and company law In some areas like industrial relations ADR is not an alternative but the main method of conflict intervention and several contributors draw on their experience of negotiating between management and unions A wide variety of methods is open to the non litigious including resort to Ombudsmen negotiation small claims courts and mini trials these and other options receive detailed attention Given the newness of ADR as a discipline questions about the training of mediators and about the role of central government have not yet been resolved The final section of the book is devoted to discussion of these issues Case studies are drawn from the international arena examples from China Canada Australia Germany and North America place ADR in a cultural and historical perspective **Labour Information** International Labour Office,1991 This reference book provides a core list of publications in the labour field covering both reference materials and selected ILO publications in English It covers employment training labour relations labour administration working conditions and environment social security promotion of equality and workers education **The Expert Negotiator, 4th Revised Edition** Raymond Saner,2012-05-31 In this book the social scientist and economist Professor Dr Raymond Saner draws on his long years of experience as a negotiation adviser teacher trainer researcher and university lecturer to show that two thirds of negotiation practice is learnable The author treats the different aspects of negotiation practice in a way that is useful to both academics and practitioners such that the general laws and principles gradually become evident as and of themselves

Labor Literature United States. Department of Labor. Library,1981 Labor Literature ,1981 The Expert Negotiator, 4th Edition Raymond Saner,2012-05-31 Success in negotiation is not a matter of chance but the result of careful

planning and specialized skills Some of these skills are inborn others need to be learnt In this book the social scientist and economist Professor Dr Raymond Saner draws on his long years of experience as a negotiation adviser teacher trainer researcher and university lecturer to show that two thirds of negotiation practice is learnable Yet very few people are specifically trained in this everyday task Without sacrificing scientific accuracy Professor Saner offers a highly readable and fascinating guide to the subject In so doing he does not limit himself to the over simplified tips generally put out on successful bargaining in every imaginable situation Rather he treats the different aspects of negotiation practice in a way that is useful to both academics and practitioners such that the general laws and principles gradually become evident as and of themselves The aim of this approach is to reveal the essence of negotiation through the experience of both the author and the reader Such an understanding of the processes involved in negotiation is of far greater practical value than a mere collection of recipes with no discussion of the underlying theory while the most comprehensive treatment of the theory without reference to its application in practice would be only half the story Thus the text is supplemented by a series of illustrative examples and case studies from the business political NGO and international organization arenas plus some seventy figures and tables With all this the author has paid considerable attention to writing a text that is both entertaining to read and rigorous in content
