Kierkegaard's International Reception: The Near East, Asia, Australia and the Americas Jon Stewart,2008-06-01

provides a provocative and insightful presentation of the subject of impasses as well as dealing with associated issues including the role of values in psychotherapy community spirituality and therapist responsibility It will be of great interest to counsellors and psychotherapists

Existentialism and Phenomenology Leonard Orr,1978 The compiling of a bibliography requires both a thorough knowledge of the subject and the ability to discriminate effectively Success depends as much on the clear definition of focus as on the evaluation of the texts considered Orr succeeds on each count thereby rendering an invaluable service to students and scholars alike Particularly interesting is the inclusion of works devoted to the interrelatedness of existentialism and the political and social sciences And extremely helpful are the notations referring the researcher to sections of a work either of particular significance or pertinent to a specific point of view An excellent introduction emphasizes the movement away from the fundamental ontological concerns of existential thought Orr s effort to resituate the research within the original dimensions of existentialism and phenomenology as exploratory processes as opposed to intellectual systems is most commendable

FRENCH REVIEW *The Routledge International Handbook of Existential Human Science* Huon Wardle,Nigel Rapport,Albert Piette,2023-08-01 This volume is the first handbook to explore existentialism as epistemology and method Transdisciplinary in scope it considers the nature of human subjectivity and how human experience ought to be studied examining the connections that exist between the individual s imagining of the world and their everyday practice within it With attention to the question of whether humans are ultimately alone in their self knowledge or whether what they know of themselves is constructed in common with others it enables the reader to recognize core questions that frame the methods and orientation of an existential inquiry In addition to historical exposition it offers a variety of chapters from around the world that explore the diverse global spaces for and different types of existential focus and discussion thus questioning the view that the existential problem may be singularly a matter for the post enlightenment West The fullest and most comprehensive survey to date of what human beings can and should make of themselves The Routledge International Handbook of Existential Human Science will appeal to scholars across the humanities and social sciences with interests in anthropology sociology philosophy and research methods

Locative and existential predication Chris Lasse Däbritz,Josefina Budzisch,Rodolfo Basile,2025-09-29 Locative and existential predications are fundamental linguistic constructions that exhibit significant formal overlap while serving distinct communicative functions Locative clauses typically anchor a definite referent to a spatial context whereas existential clauses introduce new often indefinite referents into discourse Despite their central role in syntactic and typological research the cross linguistic diversity of these predications remains largely underexplored This collective volume originates from workshops held in 2023 at the Annual SLE Meeting in Athens and the International Conference on Historical Linguistics in Heidelberg It brings together in depth analyses of locative and existential predications across a wide range of languages drawing on diverse methodological and theoretical

approaches Rather than imposing a single framework the volume deliberately allows for variation in how these constructions are defined and analyzed reflecting the complexity and diversity of linguistic structures A key theme of the book is the relationship between locative existential and possessive predication Many of the included studies highlight the formal and functional connections between these domains illustrating how different languages encode possession through structures that overlap with locative and existential constructions The volume also challenges conventional assumptions about structural distinctions between these predications showing that in many languages such boundaries are blurred or even nonexistent The introductory chapter reviews key findings from prior research and offers a refined typology of locative and existential predications It also highlights the major insights from the remaining chapters each of which provides a detailed empirical analysis of these constructions in one or several underdescribed languages The contributions address i the structural and functional properties of locative and existential clauses ii criteria for distinguishing these constructions in languages where formal differentiation is minimal iii their frequency and usage in natural discourse and iv grammaticalization pathways that link locative existential and possessive predication By integrating data from a broad range of languages and perspectives this volume advances our understanding of locative and existential predication and offers a foundation for future research in typology syntax and historical linguistics
