Switchbacks explores how the Nuxalk of Bella Coola British Columbia negotiate such complex questions as Who owns culture How should culture be transmitted to future generations Where does selling and buying Nuxalk art fit into attempts to regain control of heritage To answer these questions Jennifer Kramer undertook participant observation at Nuxalk artists studios in the Nuxalk run band school s cultural education classes and during the everyday activities of Nuxalk in their homes She charts the fluid character of tangible material culture such as masks and other regalia and intangible material culture such as songs and dances as they moved in and out of the cultural education curriculum the Western art market and the Western legal system In addition Kramer analyzes the ambivalent reactions of the Nuxalk to ownership appropriation and repatriation of Nuxalk culture The Nuxalk oscillate between essential stances a process Kramer likens to switchbacks on a mountain road Through these recurrent movements they create recreate and validate contemporary Nuxalk identity Kramer demonstrates that loss of cultural objects proves that Nuxalk culture is valuable through external affirmation In this way the Nuxalk use their cultural patrimony to assert their collective national identity At stake are not only definitions of alienable and inalienable property but also a unified national identity that affords the Nuxalk a strong position from whence to reclaim traditional territory and regain self determination in British Columbia Switchbacks will appeal to scholars and students interested in questions of cultural ownership and identity in general and in Nuxalk culture in particular

Kroeber, 1999-01-01 In this pioneering study Paul D Kroeber examines the history of an array of important syntactic constructions in the Salish language family This group of some twenty three languages centrally located in the Northwest Coast and Plateau Regions is noted for its intriguing differences from European languages including the possible irrelevance of a noun verb distinction to grammatical structure and the existence of distinctive systems of articles which also often function as marks of subordination Kroeber draws on and analyzes data from a wide range of textual and other sources Centering his detailed investigation on patterns of subordination and focusing he situates these against the broader background of Salish syntax examines their interrelationships and reconstructs their historical development The result is a study that significantly enhances understanding of the structure and history of Salish As important Kroeber s critical command of sources and well considered historical proposals are exemplary setting a methodological standard for Americanist scholarship

The Bungling Host Daniel Clément, 2018-08-01 The Bungling Host motif appears in countless indigenous cultures in North America and beyond In this groundbreaking work Daniel Clément has gathered nearly four hundred North American variants of the story to examine how myths acquire meaning for their indigenous users and explores how seemingly absurd narratives can prove to be a rich source of meaning when understood within the appropriate context In analyzing the Bungling Host tales Clément considers not only material culture but also social economic and cultural life Native knowledge of the environment and the world of plants and animals Clément s analysis uncovers four operational modes in myth construction and clarifies the relationship between mythology and science Ultimately he demonstrates how science may have developed out of an operational mode that already existed in the mythological mind

Makúk John Sutton Lutz, 2009-01-01 John Lutz traces Aboriginal people s involvement in the new economy and their displacement from it from the arrival of the first Europeans to the 1970s Drawing on an extensive array of oral histories manuscripts newspaper accounts biographies and statistical analysis Lutz shows that Aboriginal people flocked to the workforce and prospered in the late nineteenth century He argues that the roots of today s widespread unemployment and welfare dependency date only from the 1950s when deliberate and inadvertent policy choices what Lutz terms the white

problem drove Aboriginal people out of the capitalist wage and subsistence economies offering them welfare as compensation The Phonology and Morphology of Reduplication Eric Raimy, 2012-10-25 This book proposes a new representational analysis of reduplication based on making explicit precedence relations in phonological representations The main claim is that reduplication results from loops in the precedence structure of phonological representations Modular rule based analyses of overapplication and underapplication effects including backcopying are presented to argue against the McCarthy and Prince 1995 claim that a derivational model of reduplication is conceptually and empirically inadequate Other sections of the book discuss the implications of explicit precedence information for the concatenation of morphemes the analysis of infixation and templates in reduplication Analyses of relevant phenomena from Indonesian Tohono Oodham Chaha Chumash and Nancowry among other languages are provided Indigenous Literacies in the Americas Nancy H. Hornberger, 2012-10-25 CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students researchers and practitioners in all of the social and language related sciences carefully selected book length publications dealing with sociolinguistic theory methods findings and applications It approaches the study of language in society in its broadest sense as a truly international and interdisciplinary field in which various approaches theoretical and empirical supplement and complement each other The series invites the attention of linguists language teachers of all interests sociologists political scientists anthropologists historians etc to the development of the sociology of language International Books in Print, 1997
