**CONCUR '92** Walter R. Cleaveland, 1992-08-12 This book contains a selection of research papers describing recent advances in the theory of concurrent systems and their applications. The papers were all presented at the CONCUR 92 conference which has emerged as the premiere conference on formal aspects of concurrency. The authors include such prominent researchers as R Milner, A Pnueli, N Lynch, and V R Pratt. The results represent advances in the mathematical understanding of the behavior of concurrent systems. Topics covered include process algebras, models of true concurrency, compositional verification techniques, temporal logic verification, case studies, models of probabilistic and real time systems, models of systems with dynamic structure and algorithms, and decidability results for system analysis. A key feature of CONCUR is its breadth: in one volume it presents a snapshot of the state of the art in concurrency theory. As such, it is indispensable to researchers and would be researchers in the formal analysis of concurrent systems.

**CONCUR 2000 - Concurrency Theory** Catuscia Palamidessi, 2003-06-26 This volume contains the proceedings of the 11th International Conference on Concurrency Theory, CONCUR 2000, held in State College, Pennsylvania, USA, during 22-25 August 2000. The purpose of the CONCUR conferences is to bring together researchers, developers, and students in order to advance the theory of concurrency and promote its applications. Interest in this topic is continuously growing as a consequence of the importance and ubiquity of concurrent systems and their applications and of the scientific relevance of their foundations. The scope covers all areas of semantics, logics, and verification techniques for concurrent systems. Topics include concurrency-related aspects of models of computation, semantic domains, process algebras, Petri nets, event structures, real time systems, hybrid systems, decidability, model checking, verification techniques, re-nement techniques, term and graph rewriting, distributed programming, logic constraint programming, object-oriented programming, typing systems, and algorithms, case studies, tools, and environments for programming and verification. The first two CONCUR conferences were held in Amsterdam, NL, in 1990 and 1991. The following ones in Stony Brook
