Conditions Of Visibility:

Conditions of Visibility Richard T. Neer, 2019 We often assume that works of visual art are meant to be seen Yet that assumption may be a modern prejudice The ancient world from China to Greece Rome to Mexico provides many examples of statues paintings and other images that were not intended to be visible Instead of being displayed they were hidden buried or otherwise obscured In this third volume in the Visual Conversations in Art it concerns ancient societies and modern disciplines and encompasses material circumstances perceptual capacities technologies of visualization protocols of classification and a great deal more The emerging field of archaeological art history is uniquely suited to address such questions Intrinsically comparative this approach cuts across traditional ethnic religious and chronological categories to confront the academic present with the historical past The goal is to produce a new art history that is at once cosmopolitan in method and global in scope and in doing so establish new ways of seeing new conditions of visibility for shared objects of study

In-visibility Anna Vind, Iben Damgaard, Kirsten Busch Nielsen, Sven Rune Havsteen, Christopher B. Brown, Günter Frank, Bruce Gordon, Barbara Mahlmann-Bauer, Tarald Rasmussen, Violet Soen, Zsombor Tóth, Günther Wassilowsky, Siegrid Westphal, 2020-10-05 The content of the book reconsiders the relation between visibility and transcendence The focus is especially on the contribution to this issue from the theological tradition in protestant Europe between the 16th and the 21st Centuries In the book a thematically broad field is covered embracing more than five centuries and a plurality of methods drawn from theology philosophy and the history and theory of art The book is divided into five sub themes In the first and more fundamental part The phenomenology of in visibility questions underlying the other four themes are sought defined or narrowed down Here the modes of appearing revealing or hiding of phenomena are reflected In the second section of the book dealing with Language as a mode of revealing and hiding the specific role of verbal expressions understood in a very broad sense is at the core What is the fundamental understanding and use of language when speaking of the ineffable The third section about Human existence between visibility and invisibility focuses on theological anthropology its features and norms The ambiguity of anthropological categories such as faith rationality imagination memory and emotion play a prominent role in this context The fourth section concerning The manifestation of a beyond in the arts investigates transcendence in the arts What are the theological discourses behind the religious uses of the different artistic media i e images music liturgical inventory architecture Finally in the fifth section concerning Visible community and invisible transcendence one finds contributions working with the idea of vicarious representation *Federal Register*, 2014
