Condors Egg:

Oology and Ralph's Talking Eggs Carrol L. Henderson, 2009-02-17 Before modern binoculars and cameras made it possible to observe birds closely in the wild many people collected eggs as a way of learning about birds Serious collectors called their avocation oology and kept meticulous records for each set of eggs the bird's name the species reference number the quantity of eggs in the clutch the date and location where the eggs were collected and the collector's name These documented egg collections which typically date from the nineteenth and early twentieth centuries now provide an important baseline from which to measure changes in the numbers distribution and nesting patterns of many species of birds In *Oology and Ralph's Talking Eggs* Carrol L Henderson uses the vast egg collection of Ralph Handsaker an Iowa farmer as the starting point for a fascinating account of oology and its role in the origins of modern birdwatching scientific ornithology and bird conservation in North America Henderson describes Handsaker's and other oologists collecting activities which included not only gathering bird eggs in the wild but also trading and purchasing eggs from collectors around the world Henderson then spotlights sixty of the nearly five hundred bird species represented in the Handsaker collection using them to tell the story of how birds such as the Snowy Egret Greater Prairie Chicken Atlantic Puffin and Wood Duck have fared over the past hundred years or so since their eggs were gathered Photos of the eggs and historical drawings and photos of the birds illustrate each species account Henderson also links these bird histories to major milestones in bird conservation and bird protection laws in North America from 1875 to the present California Condor ,1998 **Endangered Species Technical Bulletin** ,1990

Sutherland, Ian Newton, Rhys Green, 2004-06-17 The aim of this book is to outline the main methods and techniques available to ornithologists A general shortage of information about available techniques is greatly hindering progress in avian ecology and conservation Currently this sort of information is disparate and difficult to locate with much of it widely dispersed in books journals and grey literature Sutherland and his editorial team bring together in a single authoritative source all the ornithological techniques the avian community will ever need For use by graduate students researchers and practising conservationists worldwide *Bird Ecology and Conservation* is the first title in a new series of practical handbooks which include titles focusing on specific taxonomic groups as well as those describing broader themes and subjects The series editor is William J Sutherland **The California Condor, 1966-76** Sanford R.
