Inside Conducting Christopher Seaman, 2013. What does a conductor actually do? How much effect does he or she have? Can the orchestra manage without one? Why don't the players look at the conductor more? Is it necessary for the conductor to play every instrument? What about interpretation? What happens at rehearsals? Why do some conductors thrash around more than others? Who's the boss in a concerto, the soloist or the conductor? These are some of the questions that receive lively and informative answers in this book by renowned conductor Christopher Seaman. Composed of short articles on individual topics, it is easy to consult and accessible. Each article begins with an anecdote or saying and ends with quotes from musicians, often expressing opposing views. There are many books on the art of conducting, but none like this. Music lovers wondering what the figure on the podium actually does, and aspiring conductors eager to learn more about the art and craft of leading an orchestra, will all treasure this wise yet humorous book.

A History of Orchestral Conducting Elliott W. Galkin, 1988. Although the bibliography of literature about personalities in the conducting world is extensive, a comprehensive scholarly study of the history of conducting has been sorely lacking. Georg Sch nemann's respected study published in 1913 was brief and restricted to the procedures of time beating. No work has attempted to examine the role of the orchestral conductor and to document the evolution of his art from historical, technical, and aesthetic perspectives. Dr. Elliott W. Galkin, musicologist, conductor, and critic, twice winner of the Deems Taylor award for distinguished writing about music, has produced such a work in *A History of Orchestral Conducting*. The central historical section of the book, which examines chronologically the theories and functions of time beating and interpretative concepts of performance, is preceded by discussions of rhythm, development of the orchestral medium, and the evolving characteristics of orchestration. Conductors of unusual pivotal influence are examined in depth, as is the increasingly complex psychology of the podium. Critical writings since the time of Monteverdi and the birth of the orchestra are surveyed and compared. Analyses of conducting as an art and craft by musicians from Berlioz to Bernstein and commentators from Mattheson, Bernard Shaw, and Thomas Mann to Jacques Barzun are described and discussed. A fascinating collection of engravings, wood cuts, photographs, and caricatures contributes to the richness of this work.
