System Analysis and Modeling: Theory and Practice Oystein Haugen,Rick Reed,Reinhard Gotzhein,2013-02-11 This book constitutes revised papers of the proceedings of the 7th International Workshop on System Analysis and Modeling SAM 2012 held in Innsbruck Austria in October 2012 The 12 papers presented were carefully reviewed and selected from 27 submissions In addition the book contains two keynote speeches in full paper length The contributions are organized in topical sections named test and analysis language enhancements fuzzy subjects components and composition and configuring and product lines **Self-Sustaining Systems** Robert Hirschfeld,Kim Rose,2008-10-22 This book constitutes the refereed proceedings of the First Workshop on Self sustaining Systems S3 held in Potsdam Germany in May 2008 S3 is a forum for discussion of topics relating to computer systems and languages that are able to bootstrap implement modify and maintain themselves One property of these systems is that their implementation is based on small but powerful abstractions examples include amongst others Squeak Smalltalk COLA Klein Self PyPy Python Rubinius Ruby and Lisp Such systems are the engines of their own replacement giving researchers and developers great power to experiment with and explore future directions from within their own small language kernels

Reflection and Software Engineering Walter Cazzola,Robert J. Stroud,Francesco Tisato,2003-05-15 This book presents the state of the art of research and development of computational reflection in the context of software engineering Reflection has attracted considerable attention recently in software engineering particularly from object oriented researchers and professionals The properties of transparency separation of concerns and extensibility supported by reflection have largely been accepted as useful in software development and design reflective features have been included in successful software development technologies such as the Java language The book offers revised versions of papers presented first at a workshop held during OOPSLA 99 together with especially solicited

contributions The papers are organized in topical sections on reflective and software engineering foundations reflective software adaptability and evolution reflective middleware engineering Java based reflective languages and dynamic reconfiguration through reflection

Flexible, Reliable Software Henrik B. Christensen, 2011-06-21 Flexible Reliable Software Using Patterns and Agile Development guides students through the software development process By describing practical stories explaining the design and programming process in detail and using projects as a learning context the text helps readers understand why a given technique is required and why techniques must be combined to overcome the challenges facing software developers The presentation is pedagogically organized as a realistic development story in which customer requests require introducing new techniques to combat ever increasing software complexity After an overview and introduction of basic terminology the book presents the core practices concepts tools and analytic skills for designing flexible and reliable software including test driven development refactoring design patterns test doubles and responsibility driven and compositional design It then provides a collection of design patterns leading to a thorough discussion of frameworks exemplified by a graphical user interface framework MiniDraw The author also discusses the important topics of configuration management and systematic testing In the last chapter projects lead students to design and implement their own frameworks resulting in a reliable and usable implementation of a large and complex software system complete with a graphical user interface This text teaches how to design program and maintain flexible and reliable software Installation guides source code for the examples exercises and projects can be found on the author s website

Encyclopedia of Information Science and Technology, Third Edition Khosrow-Pour, D.B.A., Mehdi, 2014-07-31 This 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology Provided by publisher

Distributed Event-Based Systems Gero Mühl, Ludger Fiege, Peter Pietzuch, 2006-08-02 In today s world services and data are integrated in ever new constellations requiring the easy flexible and scalable integration of autonomous heterogeneous components into complex systems at any time Event based architectures inherently decouple system components Event based components are not designed to work with specific other components in a traditional request reply mode but separate communication from computation through asynchronous communication mechanisms via a dedicated notification service Mühl Fiege and Pietzuch provide the reader with an in depth description of event based systems They cover the complete spectrum of topics ranging from a treatment of local event matching and distributed event forwarding algorithms through a more practical discussion of software engineering issues raised by the event based style to a presentation of state of the art research topics in event based systems such as composite event detection and security Their presentation gives researchers a comprehensive overview of the area and lots of hints for future research In addition they show the power of event based architectures in modern system design thus encouraging

professionals to exploit this technique in next generation large scale distributed applications like information dissemination network monitoring enterprise application integration or mobile systems Digital Transformation Birgit

Vogel-Heuser,Manuel Wimmer,2023-02-02 Digital Transformation in Industry 4 0 5 0 requires the effective and efficient application of digitalization technologies in the area of production systems This book elaborates on concepts techniques and technologies from computer science in the context of Industry 4 0 5 0 and demonstrates their possible applications Thus the book serves as an orientation but also as a reference work for experts in the field of Industry 4 0 5 0 to successfully advance digitization in their companies **ECOOP '88 European Conference on Object-Oriented Programming** Stein

Gjessing,Kristen Nygaard,2007-03-11 object oriented seems to be becoming in the 1980s what structured programming was in the 1970s Brian Randell and Pete Lee This quotation is from the invitation to the annual Newcastle University Conference on Main Trends in Computing September 1988 It seems to capture the situation quite well only that the object orientation is being materialised in languages and language constructs as well as in the style of programming and as a perspective upon the task considered The second European Conference on Object Oriented Programming ECOOP 88 was held in Oslo Norway August 15 17 1988 in the city where object oriented programming was born more than 20 years ago when the Simula language appeared The objectives of ECOOP 88 were to present the best international work in the field of object oriented programming to interested participants from industry and academia and to be a forum for the exchange of ideas and the growth of professional relationships *Self-Aware Computing Systems* Samuel Kounev,Jeffrey O. Kephart,Aleksandar

Milenkoski,Xiaoyun Zhu,2017-01-23 This book provides formal and informal definitions and taxonomies for self aware computing systems and explains how self aware computing relates to many existing subfields of computer science especially software engineering It describes architectures and algorithms for self aware systems as well as the benefits and pitfalls of self awareness and reviews much of the latest relevant research across a wide array of disciplines including open research challenges The chapters of this book are organized into five parts Introduction System Architectures Methods and Algorithms Applications and Case Studies and Outlook Part I offers an introduction that defines self aware computing systems from multiple perspectives and establishes a formal definition a taxonomy and a set of reference scenarios that help to unify the remaining chapters Next Part II explores architectures for self aware computing systems such as generic concepts and notations that allow a wide range of self aware system architectures to be described and compared with both isolated and interacting systems It also reviews the current state of reference architectures architectural frameworks and languages for self aware systems Part III focuses on methods and algorithms for self aware computing systems by addressing issues pertaining to system design like modeling synthesis and verification It also examines topics such as adaptation benchmarks and metrics Part IV then presents applications and case studies in various domains including cloud computing data centers cyber physical systems and the degree to which self aware computing approaches have been adopted within those domains

Lastly Part V surveys open challenges and future research directions for self aware computing systems It can be used as a handbook for professionals and researchers working in areas related to self aware computing and can also serve as an advanced textbook for lecturers and postgraduate students studying subjects like advanced software engineering autonomic computing self adaptive systems and data center resource management Each chapter is largely self contained and offers plenty of references for anyone wishing to pursue the topic more deeply *Readings in Groupware and Computer-Supported Cooperative Work* Ronald M. Baecker,1993-01-13 This comprehensive introduction to the field represents the best of the published literature on groupware and computer supported cooperative work CSCW The papers were chosen for their breadth of coverage of the field their clarity of expression and presentation their excellence in terms of technical innovation or behavioral insight their historical significance and their utility as sources for further reading Taken as a whole the papers and their introductions are a complete sourcebook to the field This book will be useful for computer professionals involved in the development or purchase of groupware technology as well as for researchers and managers It should also serve as a valuable text for university courses on CSCW groupware and human computer interaction

Reusability for Intelligent Realtime Interactive Systems Dennis Wiebusch,2016-09-20 With recent releases of affordable hardware devices the fields of Virtual Mixed and Augmented Reality gained considerable attention wherefore the creation of corresponding software becomes increasingly important In the absence of a common model for flexibly combining and reusing appropriate software modules such Realtime Interactive Systems are commonly implemented from scratch Borrowing from the fields of Software Engineering and Knowledge Representation this work develops a model for the creation of reusable components from existing software modules With a Knowledge Representation Layer at its core the model additionally enables the utilization of methods from the field of Artificial Intelligence thereby supporting the creation of Intelligent Realtime Interactive Systems *Objects, Agents, and Features* Mark Ryan,John-Jules Ch. Meyer,Hans-Dieter Ehrich,2004-11-11 In recent years concepts in object oriented modeling and programming have been extended in several directions giving rise to new paradigms such as age orientation and feature orientation This volume came out of a Dagstuhl seminar exploring the relationship tween the original paradigm and the two new ones Following the success of the seminar the idea emerged to edit a volume with contributions from parti pants including those who were invited but could not come The participants reaction was very positive and so we the organizers of the seminar felt couraged to edit this volume All submissions were properly refereed resulting in the present selection of high quality papers in between the topics of objects agents and features The editors got help from a number of additional reviewers viz Peter Ahlbrecht Daniel Amyot Lynne Blair Jan Broersen Mehdi Dastani Virginia Dignum Dimitar Guelev Benjamin Hirsch Maik Kollmann Alice Miller Stephan Rei Marganiec Javier Vazquez Salceda and Gerard Vreeswijk Finally we would like to take this opportunity to thank all the persons volvedintherealizationoftheseminarandthisbook attendees authors revi ers and last but not least the sta from Schloss
