Arming The Two Koreas State Capital And Military Power:

Arming the Two Koreas Taik-Young Hamm, 2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea of Korea's military strength is partly a myth created by South Korea to justify a huge programme of rearmament North Korea's Military-Diplomatic Campaigns, 1966-2008 Narushige Michishita, 2009-10-16 This book examines North Korea's nuclear diplomacy over a long time period from the early 1960s setting its dangerous brinkmanship in the wider context of North Korea's military and diplomatic campaigns to achieve its political goals It argues that the last four decades of military adventurism demonstrates Pyongyang's consistent calculated use of military tools to advance strategic objectives vis vis its adversaries It shows how recent behavior of the North Korean government is entirely consistent with its behavior over this longer period the North Korean government's conduct rather than being haphazard or reactive is rational in the Clausewitzian sense of being ready to use force as an extension of diplomacy by other means The book goes on to demonstrate that North Korea's calculated adventurism has come full circle what we are seeing now is a modified repetition of earlier events such as the Pueblo incident of 1968 and the nuclear and missile diplomacy of the 1990s Using extensive interviews in the United States and South Korea including those with defected North Korean government officials alongside newly declassified first hand material from U S South Korean and former Communist bloc archives the book argues that whilst North Korea's military diplomatic campaigns have intensified its policy objectives have become more conservative and are aimed at regime survival normalization of relations with the United States and Japan and obtaining economic aid The Routledge Handbook of Civil-military Relations Thomas C. Bruneau, Florina Cristiana Matei, 2013 The Routledge Handbook of Civil Military Relations not only fills this important lacuna but offers an up to date comparative analysis which identifies three essential components in civil military relations 1 democratic civilian control 2 operational effectiveness and 3 the efficiency of the security institutions This Handbook will be essential reading for students and practitioners in the fields of civil military relations **The US Versus the North Korean Nuclear Threat** Er-Win Tan, 2013-11-26 Although the current world order is still dominated by the US there is increasing international concern over the possibility of regional security dilemmas arising from smaller powers attempts to develop Weapons of Mass Destruction A study of US North Korean interaction using the security dilemma as a conceptual frame of analysis is thus not only hugely topical but also particularly relevant for the 21st century on theoretical as well as empirical grounds Is there the prospect of a security dilemma contagion if North Korea acquire nuclear weapons capability leading to an Asia Pacific wide nuclear arms race This book examines this contentious issue in depth and explores the difficult choices policymakers face as a result of the uncertainty in international politics Singapore Politics Under the People's Action Party Diane K. Mauzy, Robert Stephen Milne, 2002 The

party has coped successfully with the needs of a multiethnic population claims for more extensive human rights the nascent development of a civil society and the problems of defending a small country in a turbulent region *Cornerstone of the Nation* Peter Banseok Kwon,2024-09-01 *Cornerstone of the Nation* is the first historical account of the complex alliance of military and civilian forces that catapulted South Korea's conjoined militarization and industrialization under Park Chung Hee 1961-1979 Kwon reveals how Park's secret program to build an independent defense industry spurred a total mobilization of business, science, labor, and citizenry all of which converged in military-civilian forces that propelled an unprecedented model of modernization in Korea Drawing on largely untapped declassified materials from Korea and personal interviews with contemporaneous participants in the nascent defense industry as well as declassified US documents and other external sources Kwon weaves together oral histories and documentary evidence in an empirically rich narrative that details how militarization shaped the nation's rapid economic, technological, political, and social transformation *Cornerstone of the Nation* makes the case that South Korea's arms development under Park may be the most durable and yet least acknowledged factor behind the country's rise to economic prominence in the late twentieth century Through an analysis that simultaneously engages some of the most contested issues in Korean historiography, development literature, contemporary politics, and military affairs, this book traces Korea's distinct pathway to becoming a global economic force

Asian States Richard Boyd, Tak-Wing Ngo, 2005-01-26 A team of international leading experts provide a much needed re-examination of the theoretical claims and the empirical foundation of developmental state theory *Asian States* argues that regardless of the merits of the developmental state as an explanation of economic growth, it falls far short of being an adequate theory of the state in Asia The contributors critically review claims about agency, state, society, and state-market relations that shape developmental projects It broadens the analysis of state involvement in developmental projects and considers the variety of political and social bases for state projects across East and Southeast Asia in a theoretically sensitive, thematic, and empirically rich way *Political Cultures in Asia and Europe* Jean Blondel, Takashi Inoguchi, 2006-09-27

Drawing on data from the largest cross-national survey on political culture for the last half a century, this is an original and comprehensive study of the attitudes to political and social life among the citizens of eighteen countries in Europe and Asia

Reforming Civil-Military Relations in New Democracies Aurel Croissant, David Kuehn, 2017-03-20 This book addresses the challenge of reforming defense and military policy making in newly democratized nations By tracing the development of civil-military relations in various new democracies from a comparative perspective, it links two bodies of scholarship that thus far have remained largely separate: the study of emerging or failed civilian control over armed forces on the one hand, and work on the roots and causes of military effectiveness to guarantee the protection and security of citizens on the other The empirical and theoretical findings presented here will appeal to scholars of civil-military relations, democratization, and security issues as well as to defense policy makers ***The Korean Peace Process and Civil Society*** Dong Jin

Isolationist States in an Interdependent World Helga Turku, 2016-05-06 States that withdraw from the international system provide insight into an unexplored area of international relations in terms of rationality self interest power politics cooperation and alliances Indeed isolationism in an interdependent state system goes against the logic of modern society and state systems Using historical comparative and inductive analysis Helga Turku explains why states may choose to isolate themselves both domestically and internationally using comparative historical analysis to flesh out isolationism as a concept and in practice The book examines extreme forms of self imposed domestic and international isolation in an interdependent international system noting the effects on both the immediate interests of a ruling regime and the long term national interests of the state and the populace

Korean Studies, 2001 **South Korean Engagement Policies and North Korea** Key-young Son, 2006-11-22 A fresh historical and theoretical exploration of the much debated but still elusive question of the Korean divide In contrast to much of the literature on the divide which deals with state building on the two sides of the Demilitarized Zone this book sheds light on the slow but steady process of homogenization between the two estranged peoples as accelerated after the end of the Cold War and especially after the inauguration of President Kim Dae jung in 1998 Providing immense empirical detail as well as theoretical debate on the ideas in policy shaping in South Korea the book presents a rich history of enemies and covers issues including an overview of the structural shift and the rise and fall of identity groups in South Korea history of enemy making and peace building North Korea s external relations with the US Japan and Europe Hyundai s groundbreaking cross border tourism and other economic cooperation projects the lingering nuclear weapons crises By focusing on the question of identities the book presents a new approach on one of the most important legacies of the Cold War and threat to peace in the contemporary world the divided Korean peninsula As such it fills a major gap in the literature utilizing new theoretical and empirical frameworks to deal with the Korean division and its future implications in East Asia
