Conventional arms control theory and practice matured during the prolonged period of the Cold War Treaties agreements mandated inspections and the institutions that managed them became and remain almost routine and entrenched However the end of the Cold War has resulted in a limited re evaluation of arms control objectives processes and institutions Many agreements were based on East West or NATO Warsaw Pact divisions Since the Warsaw Pact no longer exists and Cold War era tensions between East and West are markedly reduced several questions concerning existing arms control agreements arise Does arms control serve the same purpose today as it did during the Cold War What measures of effectiveness should be applied to arms control in the post Cold War and the post 9 11 era How does arms control help serve United States security interest in the current world order Assuming the United States wants to continue conventional arms control in the post Cold War and post 9 11 world where should the United States policy go To answer these questions an examination of United States policies regarding large numbers of conventional armaments both in necessary standing forces and those excess to a nation s requirements stockpiles of aging and excess munitions the control and management of stockpiles of

Schedule of Courses Foreign Service Institute (U.S.), 1986 **Competitive Arms Control** John D. Gender and International Security Laura Sjoberg, 2009-10-16 This book defines the relationship between gender and international security analyzing and critiquing international security theory and practice from a gendered perspective Gender issues have an important place in the international security landscape but have been neglected both in the theory and practice of international security The passage and implementation of UN Security Council Resolution 1325 on Security Council operations the integration of gender concerns into peacekeeping the management of refugees post conflict disarmament and reintegration and protection for non combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally in order to demonstrate the importance of gender analysis to the study of international security and to expand the feminist research program in Security Studies The chapters included in this book not only challenge the assumed irrelevance of gender they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue Rather the contributors argue that gender is conceptually empirically and normatively essential to studying international security They do so by critiquing and reconstructing key concepts of and theories in international security by looking for the increasingly complex roles women play as security actors and by looking at various contemporary

security issues through gendered lenses Together these chapters make the case that accurate rigorous and ethical scholarship of international security cannot be produced without taking account of women s presence in or the gendering of world politics This book will be of interest to all students of critical security studies gender studies and International Relations in general Laura Sjoberg is Assistant Professor of Political Science at the University of Florida She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of Gender Justice and the Wars in Iraq 2006 and with Caron Gentry Mothers Monsters Whores Women s Violence in Global Politics 2007
