Around The World With Chemistry:

Teaching Chemistry Around the World Björn Risch,2010 As teachers we often tend to expect other countries to teach chemistry in much the same way as we do but educational systems differ widely At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world Teaching Chemistry around the World 25 countries have participated in the project The resulting country studies are presented in this book This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries Especially in the case of the school subject chemistry which is very unpopular on the one hand and occupies an exceptional position on the other hand due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving we have to learn from each others educational systems **Around the World with Chemistry** Kurt Lanz,1980 *Chemical Engineering Around the World* Edgar Lambert Piret,1958 Chemistry and World Food Supplies: Perspectives and Recommendations CHEMRAWN 2 ,
