Architecture for Spain's Recovered Democracy Manuel López Segura, 2023-03-30 Historical studies on the involvement of architecture in twentieth century politics have overlooked its contribution to building Spain's democracy This pioneering book seeks to fill that void Between the late 1970s and early 1990s Spain founded representative institutions launched its welfare state and devolved autonomy to its regions The study brings forth the architectural incarnation of that threefold program as it deployed in the Valencian Country a Catalan speaking region on Spain's Mediterranean shores There social democratic authorities mobilized architects planners and graphic artists to devise a newly open public sphere and to recover a local identity that Franco's dictatorship had repressed for decades The research follows the impetus of reform and its contradictions through urban projects designs for cultural amenities and the renovation of governmental and professional bodies Architecture for Spain's Recovered Democracy contributes to current debates on nationalism and the arts the environments of democratic socialism and postmodernism and neoliberalism As a result it widens our understanding of how peripheral regions may yield egalitarian architectures of resistance This book is written for students and researchers in architecture and planning art history spatial politics and Hispanic studies as well as for a general readership interested in inclusive politics in the built environment

Civic Buildings after the Spanish-American War Maria Eugenia Achurra G., 2023-11-27 Following the 1898 Spanish American War the United States constructed federal buildings in its newly acquired territories

including Cuba Puerto Rico and the Philippines Over a century later many of these grand Beaux Arts style edifices are still in use In Civic Buildings after the Spanish American War Maria Eugenia Achurra G examines this architecture and urban design as a backdrop for US exceptionalism and expansionism The book defines exceptionalism and its role in US Beaux Arts federal architecture Subsequent chapters compare specific examples of Beaux Arts civic architecture in the continental US and Latin America The book also studies architectural and urban design from other US possessions of the Progressive Era such as the former Panama Canal Zone and occupied territories like the Dominican Republic Reviewing the work of relevant designers and architects Achurra G argues that architectural examples epitomize the rich expansionist intentions of twentieth century Progressive America These lingering buildings function as intriguing material evidence of the United States geopolitical historical and commercial meddling in the internal affairs of the Americas and elsewhere

Sculpture Collections in Early Modern Spain Kelley Helmstutler Di Dio, Rosario Coppel, 2016-04-01 In the past decade there has been a surge of Anglophone scholarship regarding Spain in the sixteenth and seventeenth centuries which has led to a reframing of the discourses around Spanish culture of this period Despite this new interest in which painting in particular has been singled out for treatment a comprehensive study of sculpture collections and the status of sculpture in Spain has yet to be produced Sculpture Collections in Early Modern Spain is the first book to assess the phenomenon of sculpture collecting and in doing so it alters the previously held notion that Spanish society placed little value in this art form Di Dio and Coppel reveal that due to the problems and expense of their transport from Italy sculptures were in fact status symbols in the culture Thus they were an important component of the collections formed by the royal family cultivated noble collectors humanists and artists who had pretensions of high status This book is especially useful to specialists for its discussion of the typologies of collections and objects and of the mechanics of state gifts transport and collection display in this period An appendix presents extensive archival documentation most of which has never before been published The authors have uncovered hundreds of new documents about sculpture in Spain and new documentary evidence allows them to propose several new identifications and attributions Firmly grounded in extensive archival research Sculpture Collections in Early Modern Spain redefines the socio political and art historical importance of sculpture in early modern Spain Most importantly it entirely transforms our knowledge regarding the presence of sculpture in a wide range of Spanish collections of the period which until now has been erroneously characterized as close to non existent

Philip II of Spain and the Architecture of Empire Laura Fernández-González, 2021-05-08 Philip II of Spain was a major patron of the arts best known for his magnificent palace and royal mausoleum at the Monastery of San Lorenzo of El Escorial However

neither the king's monastery nor his collections fully convey the rich artistic landscape of early modern Iberia. In this book, Laura Fernández González examines Philip's architectural and artistic projects, placing them within the wider context of Europe and the transoceanic Iberian dominions. Philip II of Spain and the Architecture of Empire investigates ideas of empire and globalization in the art and architecture of the Iberian world during the sixteenth century, a time when the Spanish Empire was one of the largest in the world. Fernández González illuminates Philip's use of building regulations to construct an imperial city in Madrid and highlights the importance of his transformation of the Simancas fortress into an archive. She analyzes the refashioning of his imperial image upon his ascension to the Portuguese throne and uses the Hall of Battles in El Escorial as a lens through which to understand visual culture, history writing, and Philip's kingly image as it was reflected in the funeral commemorations mourning his death across the Iberian world. Positioning Philip's art and architectural programs within the wider cultural context of politics, legislation, religion, and theoretical trends, Fernández González shows how design and images traveled across the Iberian world and provides a nuanced assessment of Philip's role in influencing them. Original and important, this panoramic work will have a lasting impact on Philip II's artistic legacy. Art historians and scholars of Iberia and sixteenth-century history will especially value Fernández González's research. [Ancient Origins of the Mexican Plaza](#) Logan Wagner, Hal Box, Susan Kline Morehead, 2013-01-16 Extensively illustrated with detailed site plans and photographs, this architectural history of the Mexican plaza reveals why this central public space has been the heart of the community from ancient Mesoamerican times until the present. *Religion and Politics in Europe and Latin America* Andrés Pérez-Baltodano, 2025-09-22 This book presents a comparative interpretation of the socio-emotional histories of Europe and Latin America, offering a novel perspective on the roles of religion and politics in managing collective fear and insecurity in these two regions. Emphasizing the historical fears and insecurities faced by underprivileged sectors of Latin American society, the book draws on cognitive and social sciences to compile political, socioeconomic, and cultural landmarks, identifying continuities and ruptures in European and Latin American histories. The volume highlights Europe's success and Latin America's relative failure in crafting political visions capable of taming fear and insecurity. It shows how this largely correlates with how meticulous providentialism—the belief that God governs history—has been supplanted by general providentialism, the belief that God does not intervene in history, in the religious cultures of the two regions. This shift corresponds to the degree of control individuals feel they have over their history and destiny, which typically aligns with their actual social affordances. At the heart of these discussions is the notion that the authenticity of the theoretical foundations of political visions is conditioned by society's view of the divine, which ultimately determines the capacity of these visions to impact history. *Religion and Politics in Europe and Latin America* is a useful resource for students and academics interested in Latin American and European history, politics, and culture. Jackson, Leonardo Meraz Quintana, 2024-12-02 In the sixteenth century Franciscan Dominican and Augustinian missionaries attempted to evangelize the indigenous peoples of central Mexico Indigenous peoples incorporated the new faith into their belief system on their own terms and continued to conceptualize a sacred geography that ordered their world and regulated time At the same time the missionaries had new sacred complexes built but the question remains why did indigenous peoples dedicate labor and community resources to these projects This study analyzes the urban plan of indigenous communities the construction of new sacred complexes and the ways in which the urban plan conformed to the notion of sacred geography
