When the Machine Made Art Grant D. Taylor, 2014-04-10 Considering how culturally indispensable digital technology is today it is ironic that computer generated art was attacked when it burst onto the scene in the early 1960s. In fact no other twentieth century art form has elicited such a negative and hostile response. When the Machine Made Art examines the cultural and critical response to computer art or what we refer to today as digital art Tracing the heated debates between art and science the societal anxiety over nascent computer technology and the myths and philosophies surrounding digital computation Taylor is able to identify the destabilizing forces that shape and eventually fragment the computer art movement.

Computers and Art Stuart Mealing, 2002 Computers and Art provides insightful perspectives on the use of the computer as a tool for artists. The approaches taken vary from its historical philosophical and practical implications to the use of computer technology in art practice. The contributors include an art critic an educator a practising artist and a researcher. Mealing looks at the potential for future developments in the field looking at both the artistic and the computational aspects of the field.

Using Computers to Create Art Tracey Bowen, 2006 As artists increasingly integrate digital procedures into their art making processes they are confronted with the need to transform older practices often working through challenging phases of translation. This study examines the ways in which six artists whose practices are based primarily on hand making methods are exchanging hands on engagement using traditional materials with digital manipulation programs.
