Philosophical Foundation of Human Rights Paul Tiedemann, 2020-06-27 This textbook presents a range of classical philosophical approaches in order to show that they are unsuitable as a foundation for human rights Only the conception of human dignity based on the Kantian distinction between price and dignity can provide a sufficient basis The derivation of human rights from the principle of human dignity allows us to identify the most crucial characteristic of human rights namely the protection of personhood This in turn makes it possible 1 to distinguish between real moral human rights and spurious ones 2 to assess the scope of protection for many codified human rights according to the criteria of core and yard and 3 offers a point of departure for creating new unwritten human rights This philosophical basis supports a substantial reassessment of the case law on human rights which will ultimately allow us to improve it with regard to legal certainty clarity and cogency The textbook is primarily intended for advanced law students who are interested in a deeper understanding of human rights It is also suitable for humanities students and for anyone in the political or social arena whose work involves human rights and their enforcement Each chapter is divided into four parts Abstracts Lecture Recommended Reading and Questions to check reader comprehension Sample answers are included at the end of the book **On the Concept of Power** Guido Parietti, 2022 Power is the central organizing concept for politics However despite decades of debate across political science sociology and philosophy scholars have not yet settled on a proper definition of power Political science has looked at how power works but according to Guido Parietti fails to define what power means Bringing together different disciplinary discourses *On the Concept of Power* examines the conditions for power to have an actual referent in

other words for politics to appear in our world In this original and ambitious critique of the prevailing approaches to political theory and political science Parietti examines what it means to have power and what may endanger our access to and exercise of it

Hegel's Concept of God Quentin Lauer,1983-06-30 If one takes a panoramic view of Hegel's entire philosophical endeavor the endeavor to come to grips with and to be committed to reality in the concrete one is struck by one inescapable idea The Hegelian enterprise is an extraordinarily unified and grandiose attempt to elaborate one concept which Hegel sees as the root of all intelligibility the concept of God whatever that term is going to turn out to mean The question with which we are faced is neither whether Hegel is correct in what he says nor whether his interpreters are justified in what they say of him Rather the question is one of finding out just what Hegel does say and of determining what impact that can have on our own thinking Why then the Concept of God The answer is to be found in the culmination of the entire Hegelian system The Philosophy of Absolute Spirit Only in the light of absolute Spirit is anything Hegel says intelligible in Hegel's view absolute Spirit is in fact to be identified with God and that therefore only if Hegel's Concept of God is intelligible will anything Hegel says be intelligible from the Introduction

Philosophy in France Today Alan Montefiore,1983-01-13 Eleven leading contemporary French philosophers give here more or less direct presentations and exemplifications of their work All the essays with one exception were specifically written for this volume and for an English speaking readership the exception is the first publication anywhere of Jacques Derrida's defence of his thesis dated in 1980 based on his published works As a collection the essays convey the style tone and preoccupations as well as the range and diversity of French philosophical thinking as it is being practised today They will stimulate and inform the rapidly growing interest in this area outside France

Islamic Philosophy and Occidental Phenomenology on the Perennial Issue of Microcosm and Macrocosm

Anna-Teresa Tymieniecka,2006-09-22 By proposing the Microcosm and Macrocosm analogy for dialogue between Islamic Philosophy and Occidental Phenomenology the authors of this volume are reviving the perennial positioning of the human condition in the play of forces within and without the human being This theme has run from Plato through the Middle Ages Renaissance and Modernity and has been ignored by contemporaries It now acquires a new pertinence and striking significance due to the scientific discoveries into the infinitely small in life on the one hand and the prodigious technological discoveries of the infinitely great on the other Both open up undreamt of prospects for the continuing conquest of cosmic forces The human person thrown into turmoil by the new approaches to life and needing to acquire new habits of mind having lost security of all beliefs desperately seeks a new clarification of the Human Condition within the unity of everything there is of cosmic forces and of his destiny The dialogue between Islamic Philosophy and phenomenology of life can show the way
