A Concept of Operations for a New Deep-diving Submarine F. W. LaCroix,Rand Corporation,2002 By 2012 the reactor on the U S Navy s only deep diving research submarine will be exhausted making it necessary to either refuel the reactor or replace the submarine If the Navy opts for a new submarine what capabilities should it retain and what capabilities should be added What would be its most important missions and what would be required for it to perform those missions In this report the authors worked with panels of qualified scientists defense experts and naval officers to develop a concept of operation for a possible replacement platform analyzing which military and scientific missions should have the highest priorities The authors conclude by offering a list of the highest priority missions and two design concepts that would best be able to achieve them

Special Warfare ,2006 *Submarine Cables* Douglas R. Burnett,Robert Beckman,Tara M. Davenport,2013-10-24 Submarine fiber optic cables are critical communications infrastructure for States around the world They are laid on the seabed are often no bigger than a garden hose and transmit immense amounts of data across oceans These cables are the backbone of the internet and phone services and underpin core State interests such as the finance sector shipping commerce and banking industries Without the capacity to transmit and receive data via submarine cables the economic security of States would be severely compromised Despite the fact that 95 per cent of all data and telecommunications between States are transmitted via submarine cables there is little

understanding of how these cables operate As a result some States have developed policies and laws that undermine the integrity of international telecommunications systems Submarine Cables The Handbook of Law and Policy provides a one stop shop of essential information relating to the international governance of submarine cables The Handbook is a unique collaboration between international lawyers and experts from the submarine cable industry It provides a practical insight into the law and policy issues that affect the protection of submarine cables as well as the laying maintenance and operation of such cables In addition the law and policy issues in relation to other special purpose cables such as power cables marine scientific research cables military cables and offshore energy cables are also addressed *Routledge Handbook of Ocean Resources and Management* Hance D. Smith, Juan Luis Suárez de Vivero, Tundi S. Agardy, 2015-10-16 This comprehensive handbook provides a global overview of ocean resources and management by focusing on critical issues relating to human development and the marine environment their interrelationships as expressed through the uses of the sea as a resource and the regional expression of these themes The underlying approach is geographical with prominence given to the biosphere political arrangements and regional patterns all considered to be especially crucial to the human understanding required for the use and management of the world's oceans Part one addresses key themes in our knowledge of relationships between people and the sea on a global scale including economic and political issues and understanding and managing marine environments Part two provides a systematic review of the uses of the sea grouped into food ocean space materials and energy and the sea as an environmental resource Part three on the geography of the sea considers management strategies especially related to the state system and regional management developments in both core economic regions and the developing periphery Chapter 23 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9780203115398.ch23>

**Navy Management Review**, 1967 *The Shadow Factory* James Bamford, 2008-10-14 James Bamford has been the preeminent expert on the National Security Agency since his reporting revealed the agency's existence in the 1980s Now Bamford describes the transformation of the NSA since 9/11 as the agency increasingly turns its high tech ears on the American public The Shadow Factory reconstructs how the NSA missed a chance to thwart the 9/11 hijackers and details how this mistake has led to a heightening of domestic surveillance In disturbing detail Bamford describes exactly how every American's data is being mined and what is being done with it Any reader who thinks America's liberties are being protected by Congress will be shocked and appalled at what is revealed here [A Survey of Missions for Unmanned Undersea Vehicles](#) Robert Button, 2009 Which military missions for unmanned undersea vehicles UUVs appear most promising to pursue in terms of military need operational and technical risks alternatives and cost To answer this question the authors assess risks associated with using UUVs for advocated missions identify non UUV alternatives that may be more appropriate for such missions and analyze potential costs associated with UUV development and use They conclude that

seven missions mine countermeasures deployment of leave behind surveillance sensors or sensor arrays near land and harbor monitoring oceanography monitoring undersea infrastructure anti submarine warfare tracking and inspection identification appear most promising Among other recommendations the authors suggest that the U S Navy consolidate its unmanned system master plans and establish relevant priorities in coordination with the Office of the Secretary of Defense Increased emphasis on the use of surface platforms rather than submarines as host platforms is recommended P 4 of cover
