**Organizational Behavior : Concepts and Controversies** S. P. Robbins,1979 *Making Sense of Organizational Change* Jean Helms-Mills,2003-12-16 Applying an invaluable sensemaking framework to organizational change and combining the theory and practice of implementing change this book represents an instructive and informative view on change in business Its strength lies in two key areas the discussion and explanation of a strategic sensemaking approach for helping managers management educators and students to understand organizational change a longitudinal study of a major company which underwent several organizational changes revealing some of the key problems and challenges that managers face when introducing implementing and managing change Rather than being structured as a how to book this outstanding text provides the reader with practical insights and skills for managing or resisting change Applying Weick s famous sensemaking approach it offers a unique way to understand the processes involved in organizational change Organisational Culture: Concept, Context, And Measurement (In Two Volumes) Elizabeth Kummerow,Neil Kirby,2013-09-12 In 1989 the prominent organisational culture scholar Stephen Ott lamented what he saw as the failure of the organisational culture perspective to have the kind of lasting influence whether empirical or in terms of its contribution to practice that had been hoped for In attempting to explain this state of affairs Ott observed that Some of the most important unanswered questions are methodological and without methodological advancement the perspective will not achieve maturity The situation today more than two decades after Ott voiced these concerns is that academics researchers and practitioners alike continue to struggle with the question of how best to decipher and measure an organisation s culture *Organisational Culture Concept Context and Measurement In Two Volumes* aims to encourage an agenda for organisational culture research that gives a renewed emphasis to methodological issues In pursuit of this aim consideration is given to both conceptual questions and questions of

measurement In Volume I of the book the main focus is on the concept of organisational culture Based on an analysis and critique of existing treatments as well as a comparison of organisational culture with a number of closely related concepts consideration is given to how the concept might usefully be elaborated and further refined In Volume II of the book the focus is on methodological issues Drawing on the findings of a series of empirical studies conducted over a number of years consideration is given to what would be required to develop a measure for organisational culture that is practically useful and also capable of accessing culture at its deepest and arguably most influential yet most elusive level In particular an approach is advocated that seeks to contextualise organisational culture in terms of various time and experience domains and that also promotes the use of attributions analysis as a means whereby to further understand culture at this level A valuable resource for scholars and practitioners alike the book provides readers who are interested in understanding the role and influence of culture in organisations with a comprehensive analysis of the development and application of the organisational culture concept For readers who are interested in conducting research into the measurement and practical application of organisational culture the book provides a methodological approach that can be used to guide their research

Understanding College and University Organization James L. Bess, Jay R. Dee, 2023-07-03 Now available in paperback this two volume work is intended to help readers develop powerful new ways of thinking about organizational principles and apply them to policy making and management in colleges and universities The book is written with two audiences in mind administrative and faculty leaders in institutions of higher learning and students both doctoral and Master s degree studying to become upper level administrators leaders and policy makers in higher education It systematically presents a range of theories that can be applied to many of the difficult management situations that college and university leaders encounter It provides them with the theoretical background to knowledgeably evaluate the many new ideas that emerge in the current literature and in workshops and conferences The purpose is to help leaders develop their own effective management style and approaches and feel confident that their actions are informed by appropriate theory and knowledge of the latest research in the field Without theory organizational leaders are forced to treat each problem that they encounter as unique as if it were a first time occurrence While leaders may have some experience with a particular issue their solutions are usually not informed by the accumulated wisdom of others who have already encountered and resolved similar situations The authors approach the theory of the organization and administration of colleges and universities from three quite different perspectives or paradigms each relying on different assumptions about the reality of organizational life in colleges and universities The positivist paradigm primarily an omnibus systems theory integrates the chapters into a comprehensive yet easily accessible whole Social constructionism the second paradigm is introduced in each chapter to illuminate the difficulty of seeking and finding meaningful consensus on problems and policies while also addressing important ethical issues that tend to be overlooked in leadership thought and action The third paradigm postmodernism draws attention to difficulties of

logic and communication under the constraints of strictly linear thinking that authorities at all levels attempt to impose on organizations. This multiple paradigm approach enables readers to become more cognizant of their own assumptions, how they may differ from those of others in their organization, and how those differences may both create difficulties in resolving problems and expand the range of alternatives considered in organizational decision making. The book offers readers the tools to balance the real world needs to succeed in today's challenging and competitive environment with the social and ethical aspirations of all its stakeholders and society at large. The authors' aim is to elucidate how administration can be made more efficient and effective through rational decision making while also respecting humanistic values. This approach highlights a range of phenomena that require attention if the institution is ultimately to be considered successful.

Heidi Dahles, Loh Wei Leng, 2014-02-04. A new study of how Asian Pacific organizations and private enterprises are expanding into markets beyond their national bases by transforming themselves in multinational and transnational directions. It shows how multicultural relations are fundamental to such shifts. It explains the organizational processes that characterize economic restructuring and the transgression of state borders by organizations seeking economic opportunities. It shows how these ambitions require boundaries to be overcome both inside and outside of organizations. This study also details the trend towards fluidity and complexity of boundaries both physical and symbolic within and without of organizations due to the speeding up of key processes. This however does not imply that boundaries are disappearing. Organizational change always challenges identities and sets new targets for this very identification. Mergers, acquisitions, and strategic alliances all generate new organizational forms and necessitate the redefinition and renegotiation of organizational boundaries. The manifold ways in which organizational boundaries are affected by economic restructuring and at the same time affect social processes within and between organizations, in particular in the context of the booming economies of the Asia Pacific area, is the focus of this volume. This book was previously published as a special issue of the *Asian Pacific Business Review*. *Managing Employee Attitudes and Behaviors in the Tourism and Hospitality Industry*.
