The Paradox of Creativity in Art Education Kerry Thomas,2019-07-29 This book examines the paradox of creativity in art education and proposes a possible resolution Based on the findings of a longitudinal ethnographic study as a particular case of creative practice in art education this book is underpinned by Bourdieu s concepts of the habitus symbolic capital and misrecognition The author offers an insightful account of social reasoning within creative practice in the senior school art classroom examining ongoing exchanges between students and their teacher Ultimately these exchanges culminate in actions beliefs and desires about what is creatively conceivable in the making of art while providing confirmation without corruption of the pedagogical role of the art teacher Allowing the context of creative agency to emerge afresh this book will be of interest and value to art educators and teachers committed to fostering the creative performances of students in any field

Handbook of Research and Policy in Art Education Elliot W. Eisner,Michael D. Day,2004-04-12 This work provides an overview of the progress that has characterized the field of research and policy in art education It profiles and integrates history policy learning curriculum and instruction assessment and competing perspectives *Why Art Cannot Be Taught* James Elkins,2001-05-17 He also addresses the phenomenon of art critiques as a microcosm for teaching art as a whole and dissects real life critiques highlighting presuppositions and dynamics that make them confusing and suggesting ways to make them more helpful Elkins s no nonsense approach clears away the assumptions about art instruction that are not borne out by classroom practice For example he notes that despite much talk about instilling visual acuity and teaching technique in practice neither teachers nor students behave as if those were their principal goals He addresses the absurdity of pretending that sexual issues are absent from life drawing classes and questions the practice of holding up great masters and masterpieces as models for students capable of producing only mediocre art He also discusses types of art including art that takes time to complete and art that isn t serious that cannot be learned in studio art classes *Steppingstones* Paul E. Bolin,Ami Kantawala,Mary Ann Stankiewicz,2021 Representing the first extensive volume on the history of art education to be published in 20 years this book will generate new interpretations of both local and global histories for 21st century readers *Steppingstones* captures pivotal moments in art education history within the United States and globally Chapters are situated within the broad and active stream of history identified by the authors as places to pause step down and deeply explore these moments and the vibrant terrain that surrounds them Some steppingstones in the volume are new and fresh reappraisals of familiar and well recognized landing places in art education history Other steppingstones contain discussions of previously unknown or overlooked material uncovered by the authors Digging deep getting beneath and revealing

steppingstones that embrace a pathway through the past this book explores dynamic and spirited narratives about various people institutions events tensions and international perspectives that have shaped and continue to direct the course of art and design education Book Features Investigates contemporary issues through a lens toward the past including issues of race cultural protocols intersectionality international influence White privilege disability studies and other social concerns Presents contributions from well known senior scholars alongside new voices of several emerging scholars of color Includes biographical accounts of African American artists and educators and the role and influence of the Harlem Renaissance Contains discussion of art education in colonial India and explores complex relationships between colonizer colonized histories Focuses on art education in the United States with discussion of specific international influences Offers contemporary best practices for doing historical research and strategies for teaching art education history courses at the university level Highlights the significance of digital humanities and digital scholarship *Concept in Art Education* ,1971

Touching Eternity Tom Barone,2001 touching eternity explores how teachers can make a long term impact on the lives of their students Written in an accessible narrative style this case study of one high school art teacher and his former students invites readers to engage in fundamental and essential issues in teaching as well as in educational research Rather than drawing conclusions this book is uniquely designed to raise questions about the consequences of teaching and learning An extraordinary accomplishment I know of no other book like it in the field of education Its pages reflect Dewey s observation that one of the greatest of educational fallacies is that the student learns only what he or she is being taught at the time This book breaks new ground Elliot W Eisner Lee Jacks Professor of Education and Professor of Art Stanford University The strength of this masterfully written book lies in its determinate inconclusiveness It leaves many questions hauntingly unanswered so that they continue to gnaw at the reader long after the book has been put down Barone skillfully encourages teachers to debate these questions and interrogate these themes touching eternity is a book that demands our attention Peter McLaren Graduate School of Education and Information Studies UCLA and author of Che Guevara Paulo Freire and the Pedagogy of Revolution Now more than ever we need a book that shows us the subtle but long term effects of a teacher who tells students Follow your heart Susan Ohanian author of Caught in the Middle Nonstandard Kids and a Killing Curriculum

Perspectives on Creative Arts Education in Nigeria M. Segun Adejemilua,2002 *The Evolution of Imagination* Stephen T. Asma,2017-06-21 Consider Miles Davis horn held high sculpting a powerful musical statement full of tonal patterns inside jokes and thrilling climactic phrases all on the fly Or think of a comedy troupe riffing on a couple of cues from the audience until the whole room is erupting with laughter Or maybe it s a team of software engineers brainstorming their way to the next Google or the Einsteins of the world code cracking the mysteries of nature Maybe it s simply a child playing with her toys What do all of these activities share With wisdom humor and joy philosopher Stephen T Asma answers that question in this book imagination And from there he takes us on an extraordinary tour of the human creative spirit Guided by

neuroscience animal behavior evolution philosophy and psychology Asma burrows deep into the human psyche to look right at the enigmatic but powerful engine that is our improvisational creativity the source he argues of our remarkable imaginal capacity How is it he asks that a story can evoke a whole world inside of us How are we able to rehearse a skill a speech or even an entire scenario simply by thinking about it How does creativity go beyond experience and help us make something completely new And how does our moral imagination help us sculpt a better society As he shows we live in a world that is only partly happening in reality Huge swaths of our cognitive experiences are made up by what ifs almosts and maybes an imagined terrain that churns out one of the most overlooked but necessary resources for our flourishing possibilities Considering everything from how imagination works in our physical bodies to the ways we make images from the mechanics of language and our ability to tell stories to the creative composition of self consciousness Asma expands our personal and day to day forms of imagination into a grand scale as one of the decisive evolutionary forces that has guided human development from the Paleolithic era to today The result is an inspiring look at the rich relationships among improvisation imagination and culture and a privileged glimpse into the unique nature of our evolved minds

The History of American Art Education Peter Smith, 1996-07-22 The ideas people and events that developed art education are described and analyzed so that art educators and educators in general will have a better understanding of what has happened and is happening to visual art in the schools Peter Smith raises the issue of art education's inordinate emphasis on Eurocentric art He challenges the often expressed notion that the field of education is the cause of art education's problems and proposes that confused conceptions within the art world are just as much a root of the difficulty No other book in art education history gives such close and analytical attention to the careers of women in the field The materials on Germanic cultural and historical influences are unequalled as is the scholarly treatment of Viktor Lowenfeld probably the most influential single figure in 20th century American art education

The Educational Imagination Elliot W. Eisner, 1994 The Educational Imagination explores the current state of American education and provides a historical view of earlier efforts to reform our schools It describes the ideological positions of those who wish to shape the aims and content of school programs in ways that reflect their values

Aesthetics, Politics, and Educational Inquiry Tom Barone, 2000 This collection of essays explores the possibilities of studying educational matters with the tools of narrative and literature Written over the course of the 1980s and 1990s these essays trace the literary turn in educational research toward forms of literary journalism critical storytelling and postmodern narrative The articles are presented as biographical evidence of the author's ongoing quest for forms of educational research that are well suited to the enormously complex nature of educational encounters This collection includes both theoretical dissertations and actual case studies of
