Conceptualisation as a Biocognitive Phenomenon and Part of the Faculty of Language Jolanta Mazurkiewicz-Sokołowska, 2025-06-16 The volume addresses the issue of the faculty of language as a biocognitive phenomenon dealing with diverse aspects related to the category of prepositions on the basis of examples from selected languages The choice of this category was determined by the highly polysemous and fuzzy nature of prepositions Based on the empirical evidence concerning selected prepositions of some Slavic German and Romance languages individual chapters discuss i the status of the case assigned by a preposition ii learning and processing of prepositions iii prototypes and metaphorical extensions iv axiology and valuation as well as v category overlap The volume brings together the generative and cognitive perspectives both usually treated as opposing by demonstrating the central role of conceptualisation seen as a multisensory phenomenon including emotions in the faculty of language highlighting the notion of embodiment

Advances in Human Aspects of Transportation: Part III Neville Stanton, Steven Landry, Giuseppe Di Bucchianico, Andrea Vallicelli, 2022-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system

The Human Body: Concepts of Anatomy and Physiology Bruce Wingerd, Patty Bostwick Taylor, 2020-04-06 The new edition of Bruce Wingerd s The Human Body Concepts of Anatomy and Physiology helps encourage learning through concept building and is truly written with the student

in mind Learning Concepts divide each chapter into easily absorbed subunits of information making learning more achievable Since students in a one semester course may have little experience with biological and chemical concepts giving them tools such as concept statements concept check questions and a concept block study sheet at the end of each chapter help them relate complex ideas to simple everyday events The book also has a companion Student Notebook and Study Guide available separately that reinvents the traditional study guide by giving students a tool to help grasp information in class and then reinforce learning outside of class
