especially powerful cognitive resource **Psychology & Christianity Integration** Daryl H. Stevenson, Brian E. Eck, Peter C. Hill, 2007 *Development of Person-context Relations* Thomas A. Kindermann, Jaan Valsiner, 2013-06-17 Traditionally developmental psychology has its focus on individuals Developmentalists aim to describe regularities in individuals change and development across time to explain the processes and mechanisms that are involved in producing change and regularity and eventually to design strategies for optimization and modification of developmental pathways Although the role of contexts has always been of central concern for these purposes it is nevertheless quite surprising to note that compared to the effort devoted to individuals relatively little attention has been paid to the study of the nature and organization of their contexts This volume is an exploration of the idea that how we describe and explain human development will be closely tied to our understanding of what contexts are how individuals and contexts become influential for one another what contexts do to and with individuals and how contexts and their influences change themselves across time A major theme is whether the traditional dichotomy between individuals and their contexts may be artificial perhaps culturally biased and after psychologists have adhered to it for about a century may have become an impediment to increasing our understanding of developmental processes With this volume the editors contribute a serious consideration of development and systematic change to emerging models of person context relations and provide suggestions about how it may be possible to incorporate these notions in developmental research and theorizing **The Psychology of Personhood** Jack Martin, Mark H. Bickhard, 2012-11-29 What is a person Surprisingly little attention is given to this question in psychology For much of the past century psychology has tended to focus on the systematic study of processes rather than on the persons who enact and embody them In contrast to the reductionist picture of much mainstream theorising which construes persons as their mental lives behaviours or neurophysiological particulars *The Psychology of Personhood* presents persons as irreducibly embodied and socially situated beings Placing the study of persons at the centre of psychology this book presents novel insights on the typical everyday actions and experiences of persons in relation to each other and to the broader society and culture Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary historical cultural developmental and everyday contexts **Economic Psychology** Erich Kirchler, Erik Hoelzl, 2018 Written by two leading psychologists this timely publication is the only up to date English language textbook on economic psychology Focused on application it is an essential resource for advanced undergraduate and postgraduate courses on economic psychology behavioural economics and social psychology in both business and psychology departments **The Self-Concept** Louis Oppenheimer, 2012-12-06 From the Preface The purpose of this book is to present the state of the art of the study of the self concept in Eastern and Western Europe It offers an overview of the type of questions points of emphasis employed methodologies and major findings in the various European countries while some of the issues treated in this book relate to well researched areas in the study of the self concept others present new ideas approaches and methodologies
