Sunal, Cynthia S Sunal, Emmett L. Wright, Cheryl L. Mason, Dean Zollman, 2014-07-01 Research in Science Education RISE Volume 6 Research Based Undergraduate Science Teaching examines research theory and practice concerning issues of teaching science with undergraduates This RISE volume addresses higher education faculty and all who teach entry level science The focus is on helping undergraduates develop a basic science literacy leading to scientific expertise RISE Volume 6 focuses on research based reforms leading to best practices in teaching undergraduates in science and engineering The goal of this volume is to provide a research foundation for the professional development of faculty teaching undergraduate science Such science instruction should have short and longterm impacts on student outcomes The goal was carried out through a series of events over several years The website at <http://nseus.org> documents materials from these events The international call for manuscripts for this volume requested the inclusion of major priorities and critical research areas methodological concerns and results of implementation of faculty professional development programs and reform in teaching in undergraduate science classrooms In developing research manuscripts to be reviewed for RISE Volume 6 researchers were asked to consider the status and effectiveness of current and experimental practices for reforming undergraduate science courses involving all undergraduates including groups of students who are not always well represented in STEM education To influence practice it is important to understand how researchbased practice is made and how it is implemented The volume should be considered as a first step in thinking through what reform in undergraduate science teaching might look like and how we help faculty to implement such reform Problem Solving Ability and Achievement in Physics: Effect of Mastery Learning Strategy Dr. Manoj Praveen G. & Prof. (Dr.) K. Sivarajan, 2020-12-25 Education has been considered as the most important input and the

most potent instrument for the development of an individual It is the key to national prosperity and welfare and that no investment is too great for it It is evident that education has a very important role to play in the economic and social development of the country in the building up of the truly democratic society in the promotion of national integration and unity and above all for the transformation of individual in the endless pursuit of excellence and perfection The students in a classroom have different socio economic status aptitudes interests attitudes etc and among them have different IQ levels In a classroom situation where the students are varied in learning levels i e average below average and above average most of the time teachers teach for the average neglecting the above average and below average in their hurry to finish the syllabus In the classroom the above average feel bored and the slow learners remain passive and day by day become poor in the subject
