Conceptual Issues In Evolutionary Biology 2nd Edition:

Conceptual Issues in Evolutionary Biology Elliott Sober, 1994 There has been debate in philosophy of biology over the decade since the first edition of this anthology appeared Changes and additions in the new edition reflect the ways in which the subject has broadened and deepened on several fronts more than half of the chapters are new In all twenty three selections take up fitness function and teleology adaptationism units of selection essentialism and population thinking species systematic philosophies phylogenetic inference reduction of Mendelian genetics to molecular biology ethics and sociobiology and cultural evolution and evolutionary epistemology *The Blackwell Companion to Philosophy* Nicholas Bunnin, Eric Tsui-James, 2003 An introduction to philosophy looks at key issues figures and movements in the field [Creation, Evolution and Meaning](#) Robin Attfield, 2018-07-17 This book presents the case for belief in both creation and evolution at the same time as rejecting creationism Issues of meaning supply the context of inquiry the book defends the meaningfulness of language about God and also relates belief in both creation and evolution to the meaning of life Meaning it claims can be found in consciously adopting the role of stewards of the planetary biosphere and thus of the fruits of creation Distinctive features include a sustained case for a realist understanding of language about God a contemporary defence of some of the arguments for belief in God and in creation a sifting of different versions of Darwinism and their implications for religious belief a Darwinian account of the relation of predation and other apparent evils to creation a new presentation of the argument from the world's value to the purposiveness of evolution and discussions of whether or not meaning itself evolves and of religious and secular bases for belief in stewardship [Theory and Method In The Neurosciences](#) Peter Machamer, Rick Grush, Peter McLaughlin, 2017-03-15 Theory and Method in the Neurosciences surveys the nature and structure of theories in contemporary neuroscience exploring many of its methodological techniques and problems The essays in this volume from the Pittsburgh Konstanz series explore basic questions about how to relate theories of neuroscience and cognition the multilevel character of such theories and their experimental bases Philosophers and scientists and some who are both examine the topics of explanation and mechanisms simulation and computation imaging and animal models that raise questions about the forefront of research in cognitive neuroscience Their work will stimulate new thinking in anyone interested in the mind or brain and in recent theories of their connections [The Oxford Handbook of Philosophy of Biology](#) Michael Ruse, 2008-07-10 This handbook covers the history of philosophy of biology then moves on to evolutionary theory It continues with discussions of molecular biology and ecology and covers biology and ethics as well as biology and religion

Handbook of Experimental Phenomenology Liliana Albertazzi, 2013-03-15 While the scientific study of vision is well advanced a universal theory of qualitative visual appearances texture shape colour and so on is still lacking This interdisciplinary handbook presents the work of leading researchers around the world who have taken up the challenge of defining and formalizing the field of experimental phenomenology Presents and discusses a new perspective in vision science

and formalizes a field of study that will become increasingly significant to researchers in visual science and beyond The contributors are outstanding scholars in their fields with impeccable academic credentials including Jan J Koenderink Irving Biederman Donald Hoffmann Steven Zucker and Nikos Logothetis Divided into five parts Linking Psychophysics and Qualities Qualities in Space Time and Motion Appearances Measurement and Qualities Science and Aesthetics of Appearances Each chapter will have the same structure consisting of topic overview historical roots debate new perspective methods results and recent developments

Einstein Meets Magritte: An Interdisciplinary Reflection Diederik Aerts, Jan Broekaert, Ernest Mathijs, 2012-12-06 Einstein Meets Magritte An Interdisciplinary Reflection presents insights of the renowned key speakers of the interdisciplinary Einstein meets Magritte conference 1995 Brussels Free University The contributions elaborate on fundamental questions of science with regard to the contemporary world and push beyond the borders of traditional approaches All of the articles in this volume address this fundamental theme but somewhere along the road the volume expanded to become much more than a mere expression of the conference s dynamics The articles not only deal with several scientific disciplines they also confront these fields with the full spectrum of contemporary life and become new science As such this volume presents a state of the art reflection of science in the world today in all its diversity The contributions are accessible to a large audience of scientists students educators and everyone who wants to keep up with science today

Social Philosophy of Science for the Social Sciences Jaan Valsiner, 2019-12-11 This is an international and interdisciplinary volume that provides a new look at the general background of the social sciences from a philosophical perspective and provides directions for methodology It seeks to overcome the limitations of the traditional treatises of a philosophy of science rooted in the physical sciences as well as extend the coverage of basic science to intentional and socially normative features of the social sciences The discussions included in this book are divided into four thematic sections Social and cognitive roots for reflexivity upon the research process Philosophies of explanation in the social sciences Social normativity in social sciences Social processes in particular sciences Social Philosophy of Science for the Social Sciences will find an interested audience in students of the philosophy of science and social sciences It is also relevant for researchers and students in the fields of psychology sociology economics anthropology education and political science

The Legacy of Friedrich Von Hayek Peter J. Boettke, 1999 This major three volume collection offered in the centenary year of Hayek s birth celebrates a lifetime of scholarship and original contributions that cross the disciplines of politics philosophy and economics Hayek rose to fame as a young technical economist engaged in debate with Keynes and became infamous in middle age for his harsh critique of socialist planning For much of the 1950s and 1960s Hayek was ignored as a relic of 19th century economic liberalism as the tide of intellectual and political fashion moved against both his warnings about Keynesian demand management and his critique of socialist planning Late in life Hayek was celebrated as a prescient scholar who foresaw the decline in both the Keynesian and socialist systems of economic control Hayek made major analytical contributions which

have yet to be appreciated by either friend or foe Through this selection of classic articles The Legacy of Friedrich von Hayek attempts to place Hayek s contributions to political economy in a proper perspective Evolution and the Big Questions David N. Stamos,2011-09-23 Evolution and the Big Questions David N Stamos s Evolution and the Big Questions delivers what its title promises you get to look at all of the issues such as race and ethics and religion that make the study of evolution so interesting and more than just a science The book is written in a clear and friendly manner and deserves a very wide readership Michael Ruse Florida State University This provocative text considers whether evolutionary explanations can be used to clarify some of life s biggest questions It offers a lively informative and timely look at a wide variety of key issues facing all of us today including questions of race sex gender the nature of language religion ethics knowledge consciousness and ultimately the meaning of life Some of the questions examined are Did evolution make men and women fundamentally different Is the concept of race merely a social construction Is morality including universal human rights a mass delusion Can religion and evolution really be harmonized Docs evolution render life meaningless Designed for students and anyone with an interest in the relationship between evolutionary heritage and human nature the text takes an interdisciplinary approach and offers direction for further reading and research Each chapter presents a main topic together with discussion of related ideas and arguments from various perspectives Along the way it poses life s biggest questions pulling no punches and presenting a challenge to thinkers on all levels **Darwinian Social Evolution and Social Change** William Kerr,2021-07-29 This book introduces the value of a Darwinian social evolutionary approach to understanding social change The chapters discuss several different perspectives on social evolutionary theory and go on to link these with comparative and historical sociological theory and two case studies Kerr brings together social change theory and theories on nationalism whilst also providing concrete examples of the theories at work The book offers a vision of rapprochement between these different areas of theory and study and to where this could lead future studies of comparative history and sociology As such it should be useful to scholars and students of nationalism and social change sociologists political scientist and historians **Federico Barocci and the Oratorians** Ian F. Verstegen,2015-07-01 In 1586 Federico Barocci delivered his Visitation of the Virgin and St Elizabeth to the Chiesa Nuova in Rome For the next quarter century Barocci dominated the art scene in Rome there was no other artist from whom it was harder to get work and no other artist charged such high prices Having two important altarpieces in the Chiesa Nuova and two additional commissions discussed was an impressive feat for an artist living exclusively in Urbino Why did the Oratorians monopolize Barocci s talents in Rome and why does it seem that Barocci was their first choice when considering artists to decorate their church What was it about Barocci s art that appealed to Oratorian sensibilities and their vision of the artistic program for decoration of their church This book examines the relationship between Barocci and the Congregation of the Oratory arguing for a distinct physiognomy of Oratorian patronage and exposing the function the Oratorians expected of religious imagery in contrast to other groups of their time While

explaining Oratorian patronage it thus deals with a thorny question in social science how can a collective body have unified intentions and actions The result is a contribution both to the history of Italian painting and to art historical methodology

Ornithology, Evolution, and Philosophy Jürgen Haffer, 2007-11-19 This book is the first detailed biography of Ernst Mayr He was an architect of the Synthetic Theory of Evolution and the greatest evolutionary biologist since Charles Darwin He is one of the most widely known biologists of the 20th century

Philosophy of Biology Brian Garvey, 2014-12-05 This major new series in the philosophy of science aims to provide a new generation of textbooks for the subject The series will not only offer fresh treatments of core topics in the theory and methodology of scientific knowledge but also introductions to newer areas of the discipline Furthermore the series will cover topics in current science that raise significant foundational issues both for scientific theory and for philosophy more generally Biology raises distinct questions of its own not only for philosophy of science but for metaphysics epistemology and ethics This comprehensive new textbook for a rapidly growing field of study provides students new to the subject with an up to date presentation of the key philosophical issues Care is taken throughout to keep the technicalities accessible to the non biologist but without sacrificing the philosophical subtleties The first part of the book covers the philosophical challenges posed by evolution and evolutionary biology beginning with Darwin's central argument in the Origin of the Species Individual chapters cover natural selection the selfish gene alternative units of selection developmental systems theory adaptionism and issues in macroevolution The second part of the book examines philosophical questions arising in connection with biological traits function nature and nurture and biological kinds The third part of the book examines metaphysical questions biology's relation with the traditional concerns of philosophy of science and how evolution has been introduced into epistemological debates The final part considers the relevance of biology to questions about ethics religion and human nature

Ecological Understanding Steward T.A. Pickett, Jurek Kolasa, Clive G. Jones, 2013-10-22 Ecology is an historical science in which theories can be as difficult to test as they are to devise This volume intended for ecologists and evolutionary biologists reviews ecological theories and how they are generated evaluated and categorized Synthesizing a vast and sometimes labyrinthine literature this book is a useful entry into the scientific philosophy of ecology and natural history The need for integration of the contributions to theory made by different disciplines is a central theme of this book The authors demonstrate that only through such integration will advances in ecological theory be possible Ecologists evolutionary biologists and other serious students of natural history will want this book

The Process of Science N.J. Nersessian, 2012-12-06 For some time now the philosophy of science has been undergoing a major transformation It began when the received view of scientific knowledge that developed by logical positivists and their intellectual descendants was challenged as bearing little resemblance to and having little relevance for the understanding of real science Subsequently an overwhelming amount of criticism has been added One would be hard pressed to find anyone who would support the received view today Yet in the search for a new analysis of scientific

knowledge this view continues to exert influence over the tenor of much of present day philosophy of science in particular over its problems and its methods of analysis There has however emerged an area within the discipline called by some the new philosophy of science that has been engaged in transforming the problems and methods of philosophy of science While there is far from a consensus of beliefs in this area most of the following contentions would be affirmed by those working in it that science is an open ended on going activity whose character has changed significantly during its history that science is not a monolithic enterprise that good science can lead to false theories that science has its roots in everyday circumstances needs methods concepts etc

Recipes for Science Angela Potochnik, Matteo Colombo, Cory Wright, 2024-04-22 Scientific literacy is an essential aspect of any undergraduate education Recipes for Science responds to this need by providing an accessible introduction to the nature of science and scientific methods appropriate for any beginning college student The book is adaptable to a wide variety of different courses such as introductions to scientific reasoning methods courses in scientific disciplines science education and philosophy of science Special features of Recipes for Science include contemporary and historical case studies from many fields of physical life and social sciences visual aids to clarify and illustrate ideas text boxes to explore related topics plenty of exercises to support student recall and application of concepts suggestions for further readings at the end of each chapter a glossary with helpful definitions of key terms and a companion website with course syllabi internet resources PowerPoint presentations lecture notes additional exercises and original short videos on key topics Key Updates to the Second Edition 13 short chapters of uniform length that make it easier to adapt to a college semester Case studies and examples featuring new research and important historical research across many fields of science Added discussion of timely topics including large research collaborations trust and distrust of science machine learning and other technology driven advances diversity in science and connections to indigenous knowledge Streamlined and simplified discussion of some topics such as experimentation and statistical hypothesis testing Exercises that are clearly aligned with learning goals and sorted into types Recall Apply and Think Additional online exercises and a series of original videos on key topics Exercise solutions available on an instructor only section of the website

Evolutionary Interpretations of World Politics William R. Thompson, 2016-05-06 The field of international relations is often stagnated in realism and liberalism Groundbreaking and guaranteed to stir debate this work will move the field of international relations beyond its current and often inadequate assumptions The contributors describe how states ideologies and other areas of analysis evolve conquer others or disappear entirely Change and the fluid nature of history though so clearly a part of historical reality are not so deeply embedded in other paradigms as they are in the variation and selection model of evolutionary international relations Some contributors lay out the various controversies inherent to the new theory while others apply the paradigm to specific problems in IR theory Regardless of the approach the presentation of this entirely new perspective and method succeeds in forming a new paradigm of international relations Contributors include William R Thompson George Modelski

Vincent S E Falger David P Rapkin Jennifer Sterling Folker Hendrik Spruyt Stewart Patrick Paul Hensel Karen Rasler Craig N Murphy Jeffrey A Hart Sangbae and Brian Pollins **Bioregionalism and Global Ethics** Richard Evanoff, 2010-09-13

While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),
