Conceptualizing Technological Change:

Conceptualizing Technological Change Govindan Parayil, 2002 Technological change has been rightfully identified as the single most important factor for improving material well being Yet despite its centrality in our lives we seem to know very little about technology and how it develops and changes both spatially and temporally In this original and thoughtful book Govindan Parayil draws together current scholarship from disciplines ranging from history to economics to sociology as he develops a cohesive theory of technological change Drawing on a detailed case study of the Green Revolution in Indian agriculture Parayil convincingly argues that technological change is contingent upon the social historical process of knowledge change Thus he explores the policy implications of analyzing technological change as a problem solving activity An innovative contribution to the literature on technological change this ambitious book will also be valuable for those interested in such practical applications as understanding the process of technology transfer

Workers, Managers, and Technological Change Daniel B. Cornfield, 2013-11-11 Workers Managers and Technological Change Emerging Patterns of Labor Relations contributes significantly to an important subject Technological change is one of the most powerful forces transforming the American industrial relations In fact the synergistic relationships between technology and indus system trial relations are so complex that they are not well or completely understood We know that the impact of technology while not independent of social forces already has been profound it has transformed occupations creating new skills and destroying others altered the power relationships between workers and managers and changed the way workers learn and work Tech nology also has made it possible to decentralize some economic activities out of large metropolitan areas and into small towns rural areas and other coun tries Most important information technology makes it possible for interna tional corporations to operate on a global basis Indeed some international corporations especially those based in the United States are losing their national identities detaching the welfare of corporations from that of particu lar workers and communities Internationalization facilitated by information technology has trans formed industrial relations systems A major objective of the traditional American industrial relations system was to take labor out of competition

The Technology Trap Carl Benedikt Frey, 2020-09-22 From the Industrial Revolution to the age of artificial intelligence Carl Benedikt Frey offers a sweeping account of the history of technological progress and how it has radically shifted the distribution of economic and political power among society s members As the author shows the Industrial Revolution created unprecedented wealth and prosperity over the long run but the immediate consequences of mechanization were devastating for large swaths of the population These trends broadly mirror those in our current age of automation But just as the Industrial Revolution eventually brought about extraordinary benefits for society artificial intelligence systems have the potential to do the same Benedikt Frey demonstrates that in the midst of another technological revolution the lessons of the past can help us to more effectively face the present From publisher description

Behavioral Norms, Technological Progress, and Economic Dynamics Ernst Helmstädter, Mark Perlman, 1996 Schumpeter was interested in dynamic economics rather than the economics of stagnation in the economics of the creation of wealth rather than the economics of the redistribution of wealth in the economics of technological innovation rather than the economics of industrial management The major thrust of the volume then concerns studies of industrial change with emphasis both on analysis of the impact of innovation and on the interrelatedness of industries viewed through the process of innovation
