Guyer, 2016-05-27 The present volume consists of a collection of essays written since the economic crash of 2007-8 by the eminent Africanist and economic anthropologist Jane Guyer In a substantial Introduction written especially for this volume and eleven chapters two of which are also new divided into four parts Public Economic Cultures Cultures of Calculation Platforms and Toward Ethnography and the People's Economies Guyer gives a comparative analysis of different aspects of public culture during recent economic transformations in West Africa primarily Nigeria Britain and the United States Her analysis is at once deeply comparative and historically and theoretically wide ranging The emphasis is not on the power of things or concepts to shape economies or markets but on the effectuation of those things the making of the elements their own composition and their concatenation into new compositions always tenuous destined eventually to fall apart but not fade away entirely from the earth This places the focus on those makings the craft involved the coordination needed to make the elements work and do work even though they might not always fit so nicely together For the economy is a platform lashed together from often unlikely incongruous elements duct tape where screws and nails are required Far more than the sum of its parts this book will help set the stage for what may well be some of the most exciting adventures of an anthropology in the making *Modern Construction Economics* Gerard de Valence, 2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics **China's Rise in the World ICT Industry** Lutaoning, 2009-06-04 China is the world's largest ICT exporter having overtaken Japan the European Union and the United States and China's ICT industry is the largest manufacturing sector within the Chinese economy This book examines how China has attained this leading position in one of the most capital and high technology intensive industries *European Bloc Imperialism* Dennis Canterbury, 2010-07-07 The reinvigorated debate on imperialism in the last two decades focuses on the means by which Euro American capital is currently spread around the globe and the different ways it pillages the wealth of the developing countries The Economic Partnership Agreements being foisted on the African Caribbean and Pacific countries by the European Union however has been under the radar of the debate on imperialism This book draws on the experiences of the Caribbean Forum EU EPA to fill that void by bringing into focus the economic partnership agreement as a conduit of

European imperialism Critical Global Studies vol 1      *Literature and the Idea of Luxury in Early Modern England* Alison V. Scott, 2016-05-06 Exploring the idea of luxury in relation to a series of neighboring but distinct concepts including avarice excess licentiousness indulgence vitality abundance and waste this study combines intellectual and cultural historical methods to trace discontinuities in luxury's conceptual development in seventeenth century England The central argument is that as luxury was gradually Englished in seventeenth century culture it developed political and aesthetic meanings that connect with eighteenth century debates even as they oppose their so called demoralizing thrust Alison Scott closely examines the meanings of luxury in early modern English culture through literary and rhetorical uses of the idea She argues that while luxury could and often did denote merely lust or licentiousness as it tends to be glossed by modern editors of contemporary works its cultural lexicon was in fact more complex and fluid than that at this time Moreover that fuller understanding of its plural and shifting meanings as they are examined here has implications for the current intellectual history of the idea in Western thought The existing narrative of luxury's conceptual development is one of progressive upward transformation beginning with the rise of economic liberalism amidst eighteenth century debates it is one that assumes essential continuity between the medieval treatment of luxury as the sin of luxuria and early modern notions of the idea even as social practises of luxury explode in early seventeenth century culture      Keynes and Friedman on Laissez-Faire and Planning Sylvie Rivot, 2013-08-21 The 2008 crisis has revived debates on the relevance of laissez faire and thus on the role of the State in a modern economy This volume offers a new exploration of the writings of Keynes and Friedman on this topic highlighting not only the clear points of opposition between them but also the places in which their concerns were shared This volume argues that the parallel currently made with the 1929 financial crisis and the way the latter turned into the Great Depression sheds new light on the proper economic policy to be conducted in both the short and the long run in a monetary economy In light of the recent revival in appreciation for Keynes ideas Rivot investigates what both Keynes and Friedman had to say on key issues including their respective interpretations of both the 1929 crisis and the Great Depression their advocacy of the proper employment policy and the theoretical underpinnings of the latter The book asks which lessons should be learnt from the Thirties And what is the relevance of Keynes and Friedman's respective pleas for today      **The Rise of Western Power** Jonathan Daly, 2013-12-19 The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world The Rise of Western Power charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two frighteningly destructive World Wars the Holocaust imperialistic domination and the Atlantic slave trade Adopting a global perspective Jonathan Daly explores the contributions of other cultures and civilizations to the West's emergence Historical geographical and cultural factors all unfold in the narrative Adopting a thematic structure the book traces the rise of Western power through a series of revolutions social political technological military commercial and

industrial among others The result is a clear and engaging introduction to the history of Western civilization The History of the Future in Colonial Mexico Matthew D. O'Hara, 2018-11-20 A prominent scholar of Mexican and Latin American history challenges the field's focus on historical memory to instead examine colonial era conceptions of the future Going against the grain of most existing scholarship Matthew D O'Hara explores the archives of colonial Mexico to uncover a history of futuremaking While historians and historical anthropologists of Latin America have long focused on historical memory O'Hara a Rockefeller Foundation grantee and the award winning author of *A Flock Divided: Race, Religion and Politics in Mexico* rejects this approach and its assumptions about time experience Ranging widely across economic, political and cultural practices O'Hara demonstrates how colonial subjects used the resources of tradition and Catholicism to craft new futures An intriguing innovative work this volume will be widely read by scholars of Latin American history, religious studies and historical methodology

**The Routledge Handbook of Poverty in the United States** Stephen Haymes, Maria Vidal de Haymes, Reuben Miller, 2014-12-17 In the United States the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty The *Routledge Handbook of Poverty in the United States* provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization Reorienting its national economy towards a global logic US domestic policies have promoted a market based strategy of economic development and growth as the obvious solution to alleviating poverty affecting approaches to the problem discursively, politically, economically, culturally and experientially However the handbook explores how rather than alleviating poverty it has instead exacerbated poverty and pre-existing inequalities privatizing the services of social welfare and educational institutions transforming the state from a benevolent to a punitive state and criminalizing poor women, racial and ethnic minorities and immigrants Key issues examined by the international selection of leading scholars in this volume include income distribution, employment, health, hunger, housing and urbanization With parts focusing on the lived experience of the poor, social justice and human rights frameworks as opposed to welfare rights models and the role of helping professions such as social work, health and education this comprehensive handbook is a vital reference for anyone working with those in poverty whether directly or at a macro level
