Concrete Abstractions:

Concrete Abstractions Max Hailperin, Barbara Kaiser, Karl Knight, 1999 CONCRETE ABSTRACTIONS offers students a hands on abstraction based experience of thinking like a computer scientist This text covers the basics of programming and data structures and gives first time computer science students the opportunity to not only write programs but to prove theorems and analyze algorithms as well Students learn a variety of programming styles including functional programming assembly language programming and object oriented programming OOP While most of the book uses the Scheme programming language Java is introduced at the end as a second example of an OOP system and to demonstrate concepts of concurrent programming

Forming Abstraction Adele Nelson, 2022-02-22 Art produced outside hegemonic centers is often seen as a form of derivation or relegated to a provisional status Forming Abstraction turns this narrative on its head In the first book length study of postwar Brazilian art and culture Adele Nelson highlights the importance of exhibitionary and pedagogical institutions in the development of abstract art in Brazil By focusing on the formation of the S o Paulo Biennial in 1951 the early activities of artists Geraldo de Barros Lygia Clark Waldemar Cordeiro H lio Oiticica Lygia Pape and Ivan Serpa and the ideas of critics like M rio Pedrosa Nelson illuminates the complex strategic processes of citation and adaption of both local and international forms The book ultimately demonstrates that Brazilian art institutions and abstract artistic groups and their exhibitions of abstract art in particular served as crucial loci for the articulation of societal identities in a newly democratic nation at the onset of the Cold War

Marx, Engels and the Philosophy of Science David Bedford, Thomas Workman, 2022-12-31 This book expounds the dialectical conception of science largely implicit in the writings of Marx and Engels offering a sympathetic reconstruction of a philosophy of science commensurate with Marx s thought Drawing on a reading of dialectics found in Plato and Hegel it recasts Marx s implicit ontology in terms of dialectical conceptions of the world as these conceptions have responded to the growing sophistication of modern science It thus deepens our understanding of materialist philosophy as it relates to science and draws out Marx s logic of science in light of continuing discussions As such it will appeal to philosophers with interests in the nature and development of science and Marxist thought

Critical Social Research Lee Harvey, 2025-07-11 Originally published in 1990 Critical Social Research is a unique methodology textbook that provides students lecturers and indeed all those involved in social research with an invaluable illustrative guide The author argues that critical social research offers a perspective and a methodology that transcends divisions between quantitative and qualitative approaches At the heart of critical social research is the idea that knowledge is structured by existing sets of social relations its aim is to provide knowledge that engages with and challenges prevailing oppressive social structures This book is divided into three sections each addressing a different form of oppression those based on class gender and race Case studies from research published for the most part in North America and Britain are used extensively to demonstrate how empirical critical social research has been done The case studies consisting of

evaluative summaries of important published research will in themselves form a useful resource for students They reveal a variety of techniques including historical analysis critical ethnography and semiological and structuralist approaches Critical social research is extremely varied and may often appear complex this text provides a cogent explanation of its methodological operation that links epistemological underpinnings to practical techniques

Henri Lefebvre and the Theory of the Production of Space Christian Schmid, 2022-11-29 Shortlisted for the Deutscher Memorial Prize 2023 This book presents an encompassing detailed and thorough overview and reconstruction of Lefebvre's theory of space and of the urban Henri Lefebvre belongs to the generation of the great French intellectuals and philosophers together with his contemporaries Michel Foucault and Jean Paul Sartre His theory has experienced a remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life

Philosophy and Ideology Z.A. Jordan, 2012-12-06 The purpose of this study is to describe the development of philosophy in Poland since the end of the Second World War and the development of Marxist Leninist philosophy which owing to international political events has assumed an important role in the intellectual life of contemporary Poland This task could not have been accomplished without relating post war developments to those of the inter war period Consequently the period studied covers the years 1918-1958 Yet another extension was necessary Marxism Leninism regards sociology as a part of philosophy Moreover Marxism Leninism often resorts to sociology to support or justify some of its philosophical views Finally its criticism of bourgeois philosophy is often concerned with social philosophy and sociological theories which supposedly are implicit or explicit in bourgeois philosophy For this reason it was desirable to consider in this study some theoretical and methodological problems of the social sciences They are taken into account when they illuminate philosophical controversies or the evolution of Marxist Leninist philosophy Marxism Leninism is not only a new line of development but also a new point of departure in Polish philosophy It provides a striking contrast with the established philosophical tradition which originated roughly at the time when G.E. Moore and Bertrand Russell initiated the analytical trend in English philosophy The contrast can be epitomised by the contradistinction of philosophy and ideology chosen as the title of this study

Hegel, Marx, Nietzsche Henri Lefebvre, 2020-02-11 The great French Marxist philosopher weighs up the contributions of the three major critics of

modernity With the translation of Lefebvre s philosophical writings his stature in the English speaking world continues to grow Though certainly within the Marxist tradition he consistently saw Marx as an unavoidable necessary but insufficient starting point Unsurprisingly Lefebvre always insisted on the importance of Hegel to understanding Marx But the imposing Metaphilosophy also suggested the significance he ascribed to Nietzsche in the realm of shadows through which philosophy seeks to think the world Lefebvre proposes here that the modern world is at the same time Hegelian in terms of the state Marxist in terms of the social and society and Nietzschean in terms of civilization and its values As early as 1939 Lefebvre pioneered a French reading of Nietzsche that rejected the philosopher s appropriation by fascism bringing out the tragic implications of Nietzsche s proclamation that God is dead long before this approach was followed by such later writers as Foucault Derrida and Deleuze Forty years later in the last of his philosophical writings Lefebvre juxtaposes the contributions of the three great thinkers in a text whose themes remain surprisingly relevant today

New Urban Spaces Neil Brenner, 2019 The urban condition is today being radically transformed Urban restructuring is accelerating new urban spaces are being consolidated and new forms of urbanization are crystallizing In New Urban Spaces Neil Brenner argues that understanding these mutations of urban life requires not only concrete research but new theories of urbanization To this end Brenner proposes an approach that breaks with inherited conceptions of the urban as a bounded settlement unit the city or the metropolis and explores the multiscalar constitution and periodic rescaling of the capitalist urban fabric Drawing on critical geopolitical economy and spatialized approaches to state theory Brenner offers a paradigmatic account of how rescaling processes are transforming inherited formations of urban space and their variegated consequences for emergent patterns and pathways of urbanization The book also advances an understanding of critical urban theory as radically revisable key urban concepts must be continually reinvented in relation to the relentlessly mutating worlds of urbanization they aspire to illuminate

Bohm-Biederman Correspondence Charles Biederman, David Bohm, 2002-03-11 It was sheer chance that I encountered David Bohm s writing in 1958 I knew nothing about him What struck me about his work and

prompted my initial letter was his underlying effort to seek for some larger sense of reality which seemed a very humanized search Charles Biederman from the foreword of the book This book marks the beginning of a four thousand page correspondence between Charles Biederman founder of Constructivism in the 1930s and David Bohm the prestigious physicist known for his interpretation of quantum theory Available for the first time we are given a rare opportunity to read through and engage in a remarkable transatlantic intellectual discussion on art and science creativity and theory

in our scholarly thinking and everyday lives Everyday Life and the State Peter Bratsis, 2016-01-08 Peter Bratsis breaks new ground forcing us to think of the connections between big structures and our most intimate inner lives A fascinating and erudite book Frances Fox Piven CUNY Nearly four centuries ago liberal political thought asserted that the state was the product of a distant pre historical social contract Social science has done little to overcome this fiction Even the most radical of theories have tended to remain silent on the question of the production of the state preferring instead to focus on the determinations and functions of state actions Bratsis argues that the causes of the state are to be found within everyday life Building upon insights from social political and anthropological theories his book shows how the repetitions and habits of our daily lives lead to our nationalization and the perception of certain interests and institutions as public Bratsis shows that only by seeking the state s everyday material causes can we free ourselves from the pitfalls of viewing the state as natural inevitable and independent from social relations *Time for Eternity* Susan Renee Wilford W. Spradlin, 2011-03-23 Joe Pitts a brilliant if somewhat obsessive and cynical graduate student from a wealthy dysfunctional family lashes out under pressure against what he sees as the hypocrisy of society and the futility of his life in it Briefly committed to a psychiatric ward in the aftermath of an altercation with one of his professors he meets Dr Margaret Wright a resident and Susan Holland a somewhat mystical nursing student Just as Joe begins to believe that his intellect and his Ego can overcome what he sees as a minor troubling interlude in his life he receives a shock It is a diagnosis of terminal testicular cancer With the aid of Dr Wright Susan Roberta Turner a philosophical fellow student and Dr Shultz the very professor with whom his altercation began this odyssey and a man whose wife has just made the final passage Joe learns in the hospice to revere his own now fleeting existence and gains the humility necessary to face the next and final stage of his life **Comparative Urbanism** Jennifer Robinson, 2022-07-25 COMPARATIVE URBANISM Comparative Urbanism fully transforms the scope and purpose of urban studies today distilling innovative conceptual and methodological tools The theoretical and empirical scope is astounding enlightening emboldening Robinson peels away conceptual labels that have anointed some cities as paradigmatic and left others as mere copies She recalibrates overly used theoretical perspectives resurrects forgotten ones long in need of a dusting off and brings to the fore those often marginalised Robinson s approach radically re distributes who speaks for the urban and which urban conditions shape our theoretical understandings With Comparative Urbanism in our hands we can start the practice of urban studies anywhere and be relevant to any number of elsewheres Jane M Jacobs Professor of Urban Studies Yale NUS College Singapore How to think the multiplicity of urban realities at the same time across different times and rhythmic arrangements how to move with the emergences and stand stills with conceptualisations that do justice to all things gathered under the name of the urban How to imagine comparatively amongst differences that remain different individualised outcomes but yet exist in common No book has so carefully conducted a specifically urban philosophy on these matters capable of beginning and ending anywhere AbdouMaliq Simone Senior Research Fellow Urban Institute University of

Sheffield The rapid pace and changing nature of twenty first century urbanisation as well as the diversity of global urban experiences calls for new theories and new methodologies in urban studies In *Comparative Urbanism Tactics for Global Urban Studies* Jennifer Robinson proposes grounds for reformatting comparative urban practice and offers a wide range of tactics for researching global urban experiences The focus is on inventing new concepts as well as revising existing approaches Inspired by postcolonial and decolonial critiques of urban studies she advocates for an experimental comparative urbanism open to learning from different urban experiences and to expanding conversations amongst urban scholars across the globe The book features a wealth of examples of comparative urban research concerned with many dimensions of urban life A range of theoretical and philosophical approaches ground an understanding of the radical revisability and emergent nature of concepts of the urban Advanced students urbanists and scholars will be prompted to compose comparisons which trace the interconnected and relational character of the urban and to think with the variety of urban experiences and urbanisation processes across the globe to produce the new insights the twenty first century urban world demands

Arctic Abstractive Industry Arthur Mason, 2022-04-08 Through diverse engagements with natural resource extraction and ecological vulnerability in the contemporary Arctic contributors to this volume apprehend Arctic resource regimes through the concept of abstraction Abstraction refers to the creation of new material substances and cultural values by detaching parts from existing substances and values The abstractive process differs from the activity of extractive industries by its focus on the conceptual resources that conceal processes of exploitation associated with extraction The study of abstraction can thus help us attune to the formal operations that make appropriations of value possible while disclosing the politics of extraction and of its representation

Quantum Learning Beyond Duality Conrad P. Pritscher, 2001 This book shows quantum learning is the resource that unites parts into wholes and then wholes into continually larger wholes Just as quantum computers can regard sub atomic particles as a wave and as particles quantum learning can understand learners as simultaneously nondual whole and dual part The study includes a reconsideration of clarity in expression and thought
