Nowak, 2012-12-06 Evaluation repair and rehabilitation of bridges are increasingly important topics in the effort to deal with the deteriorating infrastructure For example in the United States about 40 percent of the nation's 570 000 bridges are classified according to the Federal Highway Administration's FHWA criteria as deficient and in need of rehabilitation and replacement In other countries the situation is similar FHWA estimates the cost of a bridge replacement and rehabilitation program at 50 billion dollars The major factors that have contributed to the present situation are the age inadequate maintenance increasing load spectra and environmental contamination The deficient bridges are posted repaired or replaced The disposition of bridges involves clear economical and safety implications To avoid high costs of replacement or repair the evaluation must accurately reveal the present load carrying capacity of the structure and predict loads and any further changes in the capacity deterioration in the applicable time span Accuracy of bridge evaluation can be improved by using the recent developments in bridge diagnostics structural tests material tests structural analysis and probabilistic methods There is a need for an international exchange of advanced experience to increase the research efficiency The Workshop is organized on the premise that the exchange of existing American and European experience in the area of bridge evaluation repair and rehabilitation is beneficial for both parties involved *Diagnostic and Proof Load Tests on Bridges* Fikret Necati Catbas, Eva Lantsoght, 2020-12-11 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **The Manual for Bridge Evaluation**, 2010 *Advances in Marine Structures* Carlos Guedes Soares, Wolfgang Fricke, 2011-03-14 In recent years significant advances have been made in the development of methods and modeling procedures for structural assessment of marine structures Various assessment methods are incorporated in the methods used to analyze and design efficient ship structures as well as in the methods of structural reliability to be used to ensure the safety **Management, Maintenance and Strengthening of Concrete Structures** fib Fédération internationale du
