Conditions of Knowledge Israel Scheffler, 1965 Conditions of Knowledge Israel Scheffler, 1965 **Conditions of Knowledge** Israel Scheffler, 1975 Fifty Modern Thinkers on Education Joy Palmer, David Edward Cooper, Liora Bresler, 2001 Looks at fifty of the twentieth century's most significant contributors to the debate on education Each essay gives key biographical information an outline of the individual's principal achievements and activities an assessment of his or her impact and influence and a list of their major writings and suggested further reading **Epistemologies and Ethics in Adult Education and Lifelong Learning** Richard G. Bagnall, Steven Hodge, 2022-02-17 This book presents and advocates for a framework of competing epistemologies and conceptions of ethics as a way of understanding modernist lifelong learning These epistemologies are grounded in a recognition of the normative nature of knowledge that informs lifelong learning each being framed by a different account of the sort of knowledge that is most valued and therefore foregrounded in lifelong learning policy provision and engagement informed by the epistemology Each epistemology is also characterised by its constituent conception of ethics Four such epistemologies and conceptions of ethics are here recognised as having been important in the lifelong learning movement to date disciplinary developmental emancipatory and design The authors argue that assumptions about knowledge and moral positions constitute a powerful but not well understood feature of such arguments awareness of these assumptions and positions could serve to powerfully advance the overall understanding of what is at stake in lifelong learning and adult education at all levels In Search of Music Education Estelle Ruth Jorgensen, 1997 What is music education and what ought it to be By challenging narrow and inadequate conceptions of the field Estelle Jorgensen raises the possibility of alternative views that can dignify the teacher's task enrich and enliven the profession and validate an exciting range of additional ways in which music education can be undertaken in the contemporary world One of the most respected leaders in music education Jorgensen emphasizes world music and ethnomusicology as equal partners alongside the more conventional sounds and styles that have dominated the classroom Exemplifying sound scholarship thorough research and compelling argument In Search of Music Education will be especially welcome wherever teachers strive to deal with requirements for responsible music education **The Epistemology of Experts** Peter Brössel, Anna-Maria Asunta Eder, Thomas Grundmann, 2025-08-28 This volume presents new research on the epistemology of experts It features original essays from leading epistemologists on this timely topic Modern societies benefit significantly from a certain kind of epistemic division of labor they outsource much of their epistemic work to well trained cognitive experts However due to their degree of specialization cognitive sophistication and highly privileged status cognitive experts tend to become alienated from laypeople This leads to what one may call the paradox of experts as experts become more competent specialized and sophisticated the harder it will be for laypeople to identify and trust experts The chapters in this volume explore the epistemology of expert judgment across several core themes and crucial questions Analysis of

Experts What does it take to be a cognitive expert Epistemic Authority How much should we concede experts over laypeople The Social Roles of Experts What role do experts play in society and what role should they play Challenges What problems arise from experts epistemic authority and societal role The Epistemology of Experts is an essential resource for scholars and advanced students working in epistemology philosophy of science political philosophy and the sociology of knowledge

DeNicola,2012-08-02 Learning to Flourish offers a lucid penetrating philosophical exploration of liberal learning a still evolving tradition of theory and practice that has dominated and sustained intellectual life and learning in much of the globe for two millennia Daniel R DeNicola weighs the views of both advocates and critics of the liberal arts and interprets liberal education as aimed supremely at understanding and living a good life as a vital tradition generating five competing but complementary paradigms that transcend theories of curriculum and pedagogy and are manifested in particular social contexts He examines the transformative power of liberal education and its relation to such values as freedom autonomy and democracy reflecting on the importance of intrinsic value and moral understanding Finally he considers age old obstacles and current threats to liberal education ultimately asserting its value for and urgent need in a global pluralistic technologically advanced society Offering a bold yet nuanced theory of liberal education this study will be of great interest to educators as well as those specializing in Philosophy of Education *Subject Knowledge and Teacher Education* Viv Ellis,2009-06-10 Viv Ellis traces the development of three beginning teachers thinking about their subject knowledge in the context of the teaching standards and the practice of auditing student teachers subject knowledge **An Analysis of Edmund Gettier's Is Justified True Belief Knowledge?** Jason Schukraft,2017-07-05 For 2 000 years the standard philosophical model of knowledge was that it could be defined as a justified true belief According to this way of thinking we can know for example that we are human because 1 we believe ourselves to be human 2 that belief is justified others treat us as humans not as dogs and 3 the belief is true This definition which dates to Plato was challenged by Edmund Gettier in one of the most influential works of philosophy published in the last century a three page paper that produced two clear examples of justified true beliefs that could not in fact be considered knowledge Gettier s achievement rests on solid foundations

provided by his mastery of the critical thinking skill of analysis By understanding the way in which Plato and every other epistemologist had built their arguments he was able to identify the relationships between the parts and the assumptions that underpinned them That precise understanding was what Gettier required to mount a convincing challenge to the theory one that was bolstered by a reasoning skill that put his counter case pithily and in a form his colleagues found all but unchallengeable *Philosophy, Science, Education and Culture* Robert Nola, Gürol Irzik, 2006-02-22 Currents such as epistemological and social constructivism postmodernism and certain forms of multiculturalism that had become fashionable within science education circles in the last decades lost sight of critical inquiry as the core aim of education In this book we develop an account of education that places critical inquiry at the core of education in general and science education in particular Since science constitutes the paradigm example of critical inquiry we explain the nature of science paying particular attention to scientific methodology and scientific modeling and at the same time showing their relevance in the science classroom We defend a universalist rationalist and objectivist account of science against epistemological and social constructivist views postmodernist approaches and epistemic multiculturalist accounts *Philosophy of Education* John Percival Powell, 1974
