European Folk Art in Europe and the Americas Hans Jürgen Hansen, Peter Anker, 1968

Overshadowed by the work of the great masters folk art was for centuries neglected by collectors and museums and scorned by connoisseurs Indeed it only began to attract serious critical attention and public appreciation during the nineteenth century while the spread of the Industrial Revolution was threatening it with extinction Since then though scholars have devoted much effort to the study of the subject on a national or regional basis and have published the fruits of their researches in monographs and specialist journals no major work of synthesis has appeared The field is vast for if we include those American communities which are of European origin it ranges in area from the Urals to the Catskills and from Norway to Peru and in time from the Middle Ages onwards This rich and varied body of anonymous achievement in the arts and crafts has now been made the subject of an exhaustive coordinated study under the editorship of H J Hansen The contributors are all specialists who are professionally concerned with the study and preservation of folk art and have been drawn from many countries In the text the subject is treated country by country In the illustrations the artifacts are arranged by category buildings furniture household utensils ceramics glass costume toys woodcarving and painting a uniquely comprehensive pictorial survey made possible by the generosity of museums and private collectors all over Europe who freely made their treasures available for the purpose The last chapter devoted to folk art on the market is a valuable guide to the collector and dealer Indispensable to the scholar this book will also be a revelation to anyone who has hitherto regarded folk art as being inevitably quaint or primitive It provides a remarkable record of the beauty and refinement of style which result from direct
