Exodus 20:25

And if you make Me an altar of stone, you shall not build it of hewn stone; for if you use your tool on it, you have profaned it.

Isaiah 65:2-3

I have stretched out My hands all day long to a rebellious people, Who walk in a way *that is* not good, According to their own thoughts; A people who provoke Me to anger continually to My face; Who sacrifice in gardens, And burn incense on altars of brick.

Finding the Walls of Troy Susan Heuck Allen, 2023-09-01 The relentlessly self promoting amateur archaeologist Heinrich Schliemann took full credit for discovering Homer's Troy over one hundred years ago and since then generations have thrilled to the tale of his ambitions and achievements But Schliemann gained this status as an archaeological hero partly by deliberately eclipsing the man who had launched his career Now at long last Susan Heuck Allen puts the record straight in this fascinating archaeological adventure that restores the British expatriate Frank Calvert to his rightful place in the story of the identification and excavation of Hisarlık the site now thought to be Troy as described in the Iliad Frank Calvert had lived in the Troad in the northwest corner of Asia Minor excavating there for fifteen years before Schliemann arrived and learning the local topography well He was the first archaeologist to test the hypothesis that Hisarlık was the Troy of Hector and Helen So that he would have unrestricted access to the site he purchased part of the mound and was the first archaeologist to conduct excavations there Running out of funds he later interested Schliemann in the site The thankless Schliemann stole Calvert's ideas exploited his knowledge and advice and finally stole Calvert's glory in part by slandering him and denigrating his work Allen corrects the record and does justice to a man who was a victim of his own integrity while giving a balanced treatment of Schliemann's true accomplishments This meticulously researched book tells the story of Frank Calvert's development as an archaeologist his adventures and discoveries It focuses on the twists and turns of his turbulent relationship with the perfidious Schliemann the resulting gains for archaeology and the successful conclusion of their common quest Allen has brought together a wide range of relevant published material as well as unpublished sources from archives diaries letters and personal interviews to tell this gripping story The relentlessly self promoting amateur

Kennett,2004-03-22 Contents Lecture 1 The Nucleus of the Book of Isaiah Lecture 2 Enlargement of the Original Book of Isaiah by the Addition of Prophecies composed in the Babylonian and Persian Periods Lecture 3 Modification of the Enlarged Book of Isaiah during the Maccabean Period and Addition to It of Prophecies Recently Composed This volume contains three lectures from the second annual Schweich Lectures of 1909 Written clearly and with the English reader in mind Kennett's work investigates the redactional history of the book of Isaiah Among his conclusions is the assignment of over half of the book to the Maccabean era These lectures serve as a good review of Isaiah scholarship at the turn of the twentieth century History of Science, History of Text Karine Chemla,2005-08-01 two main interacting ways They constitute that with which exploration into problems or questions is carried out But they also constitute that which is exchanged between scholars or in other terms that which is shaped by one or by some for use by others In these various dimensions texts obviously depend on the means and technologies available for producing reproducing using and organizing writings In this regard the contribution of a history of text is essential in helping us approach the various historical contexts from which our sources originate However there is more to it While shaping texts as texts the practitioners of the sciences may create new textual resources that intimately relate to the research carried on One may think for instance of the process of introduction of formulas in mathematical texts This aspect opens up a whole range of extremely interesting questions to which we will return at a later point But practitioners of the sciences also rely on texts produced by themselves or others which they bring into play in various ways More generally they make use of textual resources of every kind that is available to them reshaping them restricting or enlarging them Among these one can think of ways of naming syntax of statements or grammatical analysis literary techniques modes of shaping texts or parts of text genres of text and so on In this sense the practitioners depend on and draw on the textual cultures available to the social and professional groups to which they belong **Morning light [afterw.] The New-Church weekly** ,1886 The Book of Exodus Brevard S. Childs,2004-01-01 Taking a pioneering approach to commentary writing Brevard Childs gives an entirely original treatment to the book of Exodus Apart from the philological notes and translation this commentary includes a form critical section looking at the growth of the tradition in its previous stages a consideration of the meaning of the text in its present form and a consideration of its meaning in its total Old Testament context The Old Testament Library provides fresh and authoritative treatments of important aspects of Old Testament study through commentaries and general surveys The contributors are scholars of international standing *A Commentary, Critical, Experimental, and Practical on the Old and New Testaments* Robert Jamieson (D.D.),1866 *Mysteries and Discoveries of Archaeoastronomy* Giulio Magli,2009-04-09

The book is divided into two parts. In the first, the reader is taken on an ideal world tour of many wonderful and enigmatic places in almost every continent in search of traces of astronomical knowledge and lore of the sky. In the second part, Giulio Magli uses the elements presented in the tour to show that the fundamental idea which led to the construction of the astronomically related giant monuments was the foundation of power, a foundation which was exploited by replicating the sky. A possible interpretive model then emerges that is founded on the relationship the ancients had with nature in the sense of everything that surrounded them, the cosmos. The numerous monumental astronomically aligned structures of the past then become interpretable as acts of will, expressions of power on the part of those who held it, the will to replicate the heavenly plane here on earth and to build sacred landscapes. Finally, having formulated his hypothesis, Professor Magli returns to visit one specific place in detail, searching for proof. This in-depth examination studies the most compelling, the most intensively studied, the most famous and until recently the most misunderstood sacred landscape on the planet: Giza in Egypt. The archaeoastronomical analysis of the orientation of the Giza pyramids leads to the hypothesis that the pyramids of Cheops and Chephren belong to the same construction project.
