un Christian behavior When the church s interest in discipline coincided with the interest of village groups in restraining profligacy or laxity the church had greater success The Wurttemberg records reveal that parishioners showed only moderate zeal in attending the principal Sunday morning service and that weekday and Sunday afternoon services were poorly attended For communion many of the laity seem to have felt that an annual participation at Easter services fulfilled their religious obligation Young people and single adults appeared most often negligent in their attendance at church sometimes because of the demands of seasonal agriculture but more often because of general indifference to the church or active resistance to the church s efforts to discipline such festive pastimes as dancing and berry picking In the process of investigating the relationship between parishioners and the state church the author presents information on the clergy s social and geographic origins education and culture and economic conditions He analyzes the attitudes and behavior surrounding popular religious practices and evaluates the church s attempts to reform and regulate family life and social mores
