Altered Egos:

Altered Egos Todd E. Feinberg, 2002 One of the great unsolved mysteries is how the brain creates the subjective sense of a unified self In Altered Egos Feinberg a psychiatrist and neurologist addresses this question by considering how the human brain functions and malfunctions in patients with neurological perturbations of the self He goes on to present a new theory of the self that links the brain with unique characteristics of the mind such as meaning purpose and being He explains why the self and the mind are uniquely personal constituents of the life of the individual

Altered Egos H. Heaberlin, 2005-02 The old woman stirred and with reluctance raised her head saying I can tell you this as she strained to sit up straight The man with you now will always serve you well There is another a flamboyant person in much distress who will come to you very shortly who will prove to be invaluable She paused to take some more breaths before continuing There is yet another a very powerful soul a male who is now a child As an adolescent he will come to you seeking information and again as a young man seeking guidance These people are your family you are soul mates and as a group you will be a remarkable force With that said Charlene again slumped back into her chair In Altered Egos four unique individuals join forces for an exciting adventure into the realm of the paranormal Introducing Leola an exceptional psychic and intellectual who has raised herself since she was a child Claude the gentle giant and faithful friend Zah the flamboyant former barmaid whose gender is sometimes difficult to define Wesley the handsome virile yet troubled young man who can hear what people are thinking

Misanthropy in the Age of Reason Joseph Harris, 2022-11-10 Ever since Timon of Athens shunned his fellow countrymen and went to live out in the wilderness the misanthrope has proved to be a fascinating but troubling figure for writers and thinkers This comparative study brings together a range of material from various genres periods and countries to explore the developing status of misanthropy in the European literary and intellectual imagination from the late Renaissance to the dawn of Romanticism During this period the term misanthropy shifts from being an obscure Greek calque to being almost banal in its ubiquity In order to trace the contours of the period s evolving attitudes towards misanthropy this study takes a combined thematic and historical approach After two chapters offering close readings of the period s key icons of misanthropy Shakespeare s Timon of Athens and Moli re s Alceste the remaining six chapters each explore different thematic issues of misanthropy as they surface across the period Drawing on works by Shakespeare Moli re Hobbes Pascal Rochester Swift Rousseau Kotzebue Schiller Wollstonecraft and Leopardi as well as countless less canonical writers this study demonstrates that the misanthrope is not a fixed stable figure in early modern literature Rather he or very occasionally she emerges in many guises from philosopher to comic grouch from tragic hero to moral censor from cynical villain to disappointed idealist from quasi bestial outsider to worldly satirist As both critic of humanity and object of critical scrutiny the misanthrope challenges straightforward oppositions between individual and society virtue and vice reason and folly human and animal

eTrust Karen S. Cook, Chris Snijders, Vincent Buskens, Coye Cheshire, 2009-10-22 There is one thing that moves online consumers to click add to cart that allows sellers to accept certain forms of online payment and that makes online product reviews meaningful trust Without trust online interactions can t advance But how is trust among strangers established on the Internet What role does reputation play in the formation of online trust In eTrust editors Karen Cook Chris Snijders Vincent Buskens and Coye Cheshire explore the unmapped territory where trust reputation and online relationships intersect with major implications for online commerce and social networking eTrust uses experimental studies and field research to examine how trust in anonymous online exchanges can create or diminish cooperation between people The first part of the volume looks at how feedback affects online auctions using trust experiments Gary Bolton and Axel Ockenfels find that the

availability of feedback leads to more trust among one time buyers while Davide Barrera and Vincent Buskens demonstrate that in investment transactions the buyer's own experience guides decision making about future transactions with sellers. The field studies in Part II of the book examine the degree to which reputation facilitates trust in online exchanges. Andreas Diekmann, Ben Jann and David Wyder identify a reputation premium in mobile phone auctions which not only drives future transactions between buyers and sellers but also payment modes and starting bids. Chris Snijders and Jeroen Weesie shift focus to the market for online programmers where tough competition among programmers allows buyers to shop around. The book's third section reveals how the quality and quantity of available information influences actual marketplace participants. Sonja Utz finds that even when unforeseen accidents hinder transactions (lost packages, computer crashes) the seller is still less likely to overcome repercussions from the negative feedback of dissatisfied buyers. So much of our lives are becoming enmeshed with the Internet where ordinary social cues and reputational networks that support trust in the real world simply don't apply. eTrust breaks new ground by articulating the conditions under which trust can evolve and grow online providing both theoretical and practical insights for anyone interested in how online relationships influence our decisions. A Volume in the Russell Sage Foundation Series on Trust Imperative Life Questions of Truth and Consciousness Kevin McCorkle & Stephen Williams, 2014-09-23 In each of our experiences we come into this realm of being with a very limited remembrance or consciousness of the reality of who and what we truly are both on an individual and collective basis. We are thrust headlong into a world full of other beings that suffer from this same truth amnesia. From here we start the journey of our true self remembrance. A journey of our own creation of life experience divinely designed to lead us back to the home that we only believed we left. Back to the internal knowing of our connection to all of life. All of creation that collectively make up this creative force from which we are fooled into believing we are separate from that which we call God. The journey of creation. The journey that is ever changing but never ending A Con Artist in Paris Franklin W. Dixon, 2017-09-05 The Hardy brothers investigate after the world's most expensive pen is stolen from their hotel in Paris. Everyone thinks that the thief is the celebrated graffiti artist Le Stylo but the brothers are not convinced *Conducting Personal Network Research* Christopher McCarty, Miranda J. Lubbers, Raffaele Vacca, José Luis Molina, 2019-04 Written at an introductory level and featuring engaging case examples, this book reviews the theory and practice of personal and egocentric network research. This approach offers powerful tools for capturing the impact of overlapping, changing social relationships and contexts on individuals' attitudes and behavior. The authors provide solid guidance on the formulation of research questions, research design, data collection including decisions about survey modes and sampling frames, the measurement of network composition and structure including the use of name generators and statistical modeling from basic regression techniques to more advanced multilevel and dynamic models. Ethical issues in personal network research are addressed. User friendly features include boxes on major published studies, end of chapter suggestions for further reading and an appendix describing the main
