on internationalisation and decentralisation are opposed to the nature of the most important resource knowledge. The acquisition and exchange of tacit knowledge relies on interpersonal interactions and is thus time and place dependent. Given that the combination of heterogeneous knowledge stocks furthers innovation, organisations develop strategies to ensure the transfer of knowledge. To enable intra-organisational knowledge flows, spatial mobility at the workplace affects a wide range of employees. The study examines in which ways spatially mobile employees, i.e. expatriates, contribute to those knowledge flows. The study of ego networks reveals not only social dynamics of knowledge transfer but the geographical framework allows to discuss knowledge flows from a spatial perspective. On the one hand, the empirical results confirm their knowledge transfer function. On the other hand, the relational geographical perspective reveals that expatriates do not represent a homogeneous group but their roles in the knowledge transfer process, the geographical reach of their networks and their knowledge resources depend on job knowledge, individual and space-related factors.

Trade-Offs Harold Winter, 2022-12-22 How economists analyze real world issues from overeating to organ transplants A wonderful introduction to economics for the layperson Choice When economists wrestle with issues such as unemployment inflation or budget deficits they do so by incorporating an impersonal detached mode of reasoning But economists also analyze issues that to others typically do not fall within the realm of economic reasoning such as organ transplants cigarette addiction overeating and product safety Trade Offs is an introduction to the economic approach to analyzing these controversial public policy issues Harold Winter provides readers with the analytical tools needed to identify and understand the trade offs associated with these topics By considering both the costs and benefits of potential policy solutions Winter stresses that real world decision making is best served by an explicit recognition of as many trade offs as possible This new edition incorporates recent developments in policy debates including the rise of new paternalism or policies designed to protect people from themselves alternative ways to increase the supply of organs available for transplant and economic approaches to controlling infectious disease Intellectually stimulating yet accessible and entertaining Trade Offs will be appreciated by students of economics public policy health administration political science and law as well as by anyone who follows current social policy debates This precious little book will become widespread reading in basic courses on economics
