**British Naval Trawlers and Drifters in Two World Wars** Steve Dunn,2021-12-30 John Lambert was a renowned naval draughtsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts By the time of his death in 2016 he had produced over 850 sheets of drawings many of which have never been published These were acquired by Seaforth and this title is the fourth of a planned series of albums on selected themes reproducing complete sheets at a large page size with expert commentary and captioning Trawlers and drifters served in both world wars in their thousands and in their tens of thousands so did their fishermen crews Indeed these humble craft were the most numerous vessel type used by the Royal Navy in both wars and were the answer to the strategic or tactical conundrums posed by new technology of mines and submarines In his accompanying text Steve Dunn examines the ships themselves their design construction arming operations and development and he also relates how the trawlermen and skippers from the age old fishing ports of Grimsby Hull Lowestoft ad Great Yarmouth Aberdeen and Fleetwood came to be part of the Royal Navy and describes the roles they played the conditions they served under and the bravery they showed The book takes some 30 large sheets of drawings which John Lambert completed of these vessels and divides into two sections The first part tells how the fishing fleet came to be an integral part of the Royal Navy s pre 1914 plans and details some of the activities and actions of trawlers and drifters at war in 1914 18 And the second investigates the armed fishing fleet in the struggle of 1939 45 These wonderfully detailed drawings which are backed by a selection of photographs and a detailed complementary text offer a superb technical archive for enthusiasts and ship modellers but the book also tells a fascinating story of the extraordinary contribution the vessels and their crews made to the defeat of Germany in two world wars      *A Military Atlas of the First World War* Arthur Banks,2000-09-13 With the ingenious use of maps diagrams and statistics this indispensable work explains the strategies of the combatants and the diplomatic history The Beacon This is a unique study of the conflict of 1914 18 on land sea and in the air through maps diagrams and illustrations Within the scope of some 250 maps Arthur Banks has presented both broad general surveys of political and military strategy and the most closely researched details of major individual campaigns and engagements These are supplemented by comprehensive analysis of military strengths and command structures and illustrations One of the best books of maps I ve seen about any war With 250 separate maps you get something on just about every aspect of the war from the familiar Western Front to the Zeppelin raids over Britain through to the campaigns in the Middle East and beyond History of War I am delighted that after being out of print from time to time this reprint has arrived to answer the prayers of teachers pupils researchers and others who need a quick and accurate reference guide Stand To journal of The Western Front Association      **Contributions to Naval History** ,1988      **The Modern Weaponry of the World's Armed Forces** Col. Y Udaya Chandar (Retd.),2017-04-24 The Modern Weaponry of the

World's Armed Forces is a treatise of military weaponry. It depicts about forty present-day weapon systems possessed by various nations, describing three to four weapons of each category with images, specifications, origin, development, and design briefly. The weapon systems presented are almost all from the twenty-first century or the weapons presently under development. Only a very few officers in the three services know the finer distinctions between, say, cruise missile and ballistic missile, fourth-generation jet fighter and fifth-generation jet fighter, and howitzer and a field gun. All such nuances are explained clearly. The beginning explains the history of military weapons briefly and ends with information on the missile shield erected by most countries, including India. The missile shield destroys the hostile incoming aircraft or missile automatically. The missile shield presented is real; it exists on the ground today and is not fictitious. The militaries win the war with the help of the man who stands erect in the face of the enemy fire and the weapon that is in his hands. All the students of military science must read this invaluable book about the gun in the hands of a soldier, what exactly it is, and how much it matters.

*Naval Ship Models of World War II in 1/1250 and 1/1200 Scales* Robert K. Liu, 2021-02-28. A guide for collectors and modelers packed with photos, technical information, practical advice, and history. The origins of 1/1250 and 1/1200 scale models can be traced back to the first years of the twentieth century, and their use as identification aids by the military during the First World War. When peace came, the manufacturers aimed their increasingly sophisticated products at collectors, and ever since then, acquiring, enhancing, modifying, or scratch building miniature ship models has been an avidly pursued hobby around the world. This new book focuses on models of the ships of the Second World War, and the author addresses all the practical issues that might confront collectors who like to enhance, convert, and modify their models or even scratch build models of ships not commercially available. The book covers both Allied and Axis warships, naval airplanes, merchant conversions, and even an Italian armed schooner, and provides historic and technical information on the ships represented, as well as practical advice on modeling them, including twenty-five chapters covering everything from initial production techniques such as spin casting, silicon mold casting, resin casting, die casting, plastic mold injection, and 3D printing, through techniques for enhancing and modifying models to eventually researching and scratch building an uncommon ship or type. The focus is always on particular vessels, and the vast array covered builds into a fascinating panorama of the vessels that fought across the world's oceans in that era. The combination of intriguing background and historical information combined with detailed practical information and more than 300 stunning photographs makes this book irresistible to collectors, modelers, or anyone with an interest in the navies of the Second World War.

Unable to Prevent Climate Change and World Wars?* Arnd Bernaerts, 2012 The Second World War stands for the criminal madness of German Nazi government Less known is their responsibility for the only climatic shift from warm to cold in an otherwise constantly warming world over the last 150 years Not knowing the reason for the biggest climatic shift since industrialization which started in winter 1939 40 rectifies to speak about failures of meteorology Only four months into Second World War Northern Europe experienced the coldest winter in 100 years The reason plain physics Naval war in Northern European seas released the summer heat too quickly Polar air got free access to Europe The same applies to the second and third war winter Europe was back in the Little Ice Age After Japan attacked Pearl Harbor on Dec 7th 1941 naval war became a global affair In close conformity with naval war in European seas and subsequently in the Pacific a pronounced global cooling took place which lasted until about the mid 1970s Furthermore a thorough research of strong warming in the Northern Hemisphere from winter 1918 19 to winter 1939 40 would have revealed a convincing link to naval war in Europe

from 1914 to 1918 But climatology does not care The connection between two naval wars and two climatic changes within 25 years has not yet been investigated and explained If they had warned governments about the threat of climate change as their successors currently do with the greenhouse effect naval activities in two World Wars may have been prevented or at least been limited Claims to understand climate should be regarded as a failure as long as meteorology is unable to explain the two most pronounced climatic shifts during the last century and the role two world wars had in this game These two events would show that the oceans have a dominate role in the climate system and man is able to change its direction by intensive activities in the marine environment It took four months to generate the extreme regional winter 19
