,1990 A world list of books in the English language **Becoming Penn** John L. Puckett,Mark Frazier Lloyd,2015-05-22 After World War II the University of Pennsylvania became one of the world s most celebrated research universities John L Puckett and Mark Frazier Lloyd trace Penn s rise to eminence amid the postwar social institutional moral and civic contexts that shaped American research universities Teaching Science to Language Minority Students Judith W. Rosenthal,1996 In the USA the number of college students with limited English proficiency is increasing Even after successfully completing a course of English as a second language many face both linguistic and cultural barriers in mainstream classes This book focuses on both the theory and practice of assisting such students especially in the sciences As the number of non native English speaking students increases at colleges and universities innovative approaches are needed to successfully educate this population and how science is taught may be crucial Instruction in the students native language may become increasingly important in attracting and retaining non native English speakers in college This book is aimed primarily at staff who teach science to LEP undergraduates but others who should be interested include staff involved with postgraduate students and high school science teachers **Inertia of History** Yan Xuetong,2019-07-18 This book predicts possible international changes that may occur between 2013 and 2023 It forecasts that China will become a global superpower no later than 2023 and that a bipolar world will be formed with a strategic rivalry between China and the US China may also further reduce the disparity in capability with the US while other major powers will witness an enlarged capability gap with both China and the US Therefore this bipolarization will drive the world center to shift from Europe to East Asia In East Asia Japan will become a lesser state North Korea will keep its nuclear arsenal but stop nuclear tests and the maritime disputes in South China Sea will no longer be the major problem to ASEAN countries by 2023 In Europe Germany will dominate the EU while it is decentralized the UK will withdraw from the EU and Russia will deteriorate dramatically under Putin s rule Globalization will also worsen polarization at both domestic and international levels and India will lag behind China even further the Middle East will suffer from the rivalry among regional powers and Africa will be further marginalized
