Alpha Centauri The Nearest Star

TD Snyder

Alpha Centauri The Nearest Star:

Alpha Centauri, the Nearest Star Isaac Asimov, 1976 Discusses the constellations and stars their distance luminosity and size steller astronomy starlight and life on other planetary systems with special reference to the third brightest and also the nearest star Alpha Centauri

Alpha Centauri, the Nearest Star Isaac Asimov, 1976 Discusses the constellations and stars their distance luminosity and size steller astronomy starlight and life on other planetary systems with special reference to the third brightest and also the nearest star Alpha Centauri

Proxima Ian S. Glass, 2008

Atlas of Astronomical Discoveries Govert Schilling, 2011-04-11 Offers a unique combination of informative text magnificent illustrations and stylish design Examines the 100 most important discoveries since the invention of the telescope Features spectacular photographs taken with the largest telescopes on Earth and in space that portray distant corners of the universe Author Govert Schilling is a renowned astronomy journalist and science communicator In his Atlas of Astronomical Discoveries astronomy journalist Govert Schilling tells the story of 400 years of telescopic astronomy He looks at the 100 most important discoveries since the invention of the telescope Doing what Schilling does best he takes the reader on an adventure through both space and time Photographs and amazing pictures line the pages of this book offering the reader an escape from this world and an invitation to a world far beyond what the unaided human eye can detect

Knack Night Sky Nicholas Nigro, 2010-07-13 Knack Night Sky is an ode to the solar system in its awe inspiring complexity This book shows you ways to find stars constellations and other celestial objects photos comets and meteor showers from the past and comets and meteor showers to come

The Amateur Astronomer's Introduction to the Celestial Sphere William Millar, William Charles Millar, 2006-06-08 Introduction to the night sky and the principles of naked eye astronomy using only elementary mathematics

Light Years Away Sudhir Routhay, 2004-12 Light Years Away covers the wonderful things of our universe and the possibilities beyond our visible range As the name suggests most of the subject matters of the book are of distant objects like our neighbouring stars star clusters nebulae galaxies galaxy clusters and superclusters In the final chapters the possibilities beyond the observable limit and beyond our universe have been looked at carefully But the facts of solar system and earth have not been ignored The whole view of the creation has been presented in a lucid format The basic questions that we encounter like where is the end boundary of the universe what can be the nature of the extra universal things is light the fastest why we are unable to explain the universe etc have been addressed in a scientific and logical but unsophisticated way Of course some back ground in the subjects like physics and astronomy can help in the better understanding into the matter But for any enthusiast of space and cosmos irrespective of the back ground and age Light Years Away will be a satisfactory text

Lawrence Wood, 2009-09-01 Numerous opinion polls reported from time to time in the daily newspaper reveal that approximately 40% of Americans believe in Creationism 40% in Intelligent Design and 20% in Evolution Have you ever wondered why there are three such drastically different explanations of our origin Evolution The Inevitable Consequence of the Need for Species

Survival explains why there are three and how and why three were developed Perhaps you are a Creationist you will meet Stephen Geoffrey who was once a Creationist He describes his agonizing reappraisal of his beliefs and eventual abandonment of Creationism Take a look it might change your views The Bible states in Genesis Chapter 7 verse 19 regarding the biblical Flood that the waters prevailed so mightily upon the earth that all the high mountains under the whole heaven were covered That s a lot of water did it really happen Chapter 9 answers this question by examining the biblical Flood in detail such as the 820 million cubic miles of water required to cover the highest mountains for which there is no credible source If you do not believe in Evolution the powerful and detailed facts in Evolution might cause you to pause and reconsider even if only for a moment

Observing the Nearest Stars Robert Prokop,2012-06-04 Looking up into the Heavens on a clear night under a dark sky we can easily fool ourselves into thinking that the brightest stars we see are those closest to us The reality could not be more different In fact 19 of the 25 closest stars to the Sun are invisible to our naked eye and many are actually fo faint that even with the modest equipment owned by most amateur astronomers they can be supremely difficult to find Observing the Nearest Stars takes the reader on a one year guided tour through the region of the Milky Way galaxy closest to our own solar system concentrating on practical hints at observing this region for one s self 63 color illustrations and detailed star charts guide the viewer to find for themselves every star within 12 light years of the sun and visible from the Continental United States

Night Sky Nicholas Nigro,2021-03-01 The ultimate illustrated guide to the most spectacular objects in the night sky fully updated and revised Night Sky A Falcon Field Guide covers summer and winter constellations planets and stars found in the northern hemisphere Conveniently sized to fit in a pocket and featuring detailed photographs this informative guide makes it easy to identify objects in the night sky even from one s own backyard From information on optimal weather conditions preferred viewing locations and how to use key tools of the trade this handbook will help you adeptly navigate to and fro the vast and dynamic nighttime skies and you ll fast recognize that the night sky s the limit

Beyond UFOs Jeffrey Bennett,2011-05-02 The quest for extraterrestrial life doesn t happen only in science fiction This book describes the startling discoveries being made in the very real science of astrobiology an intriguing new field that blends astronomy biology and geology to explore the possibility of life on other planets Jeffrey Bennett takes readers beyond UFOs to discuss some of the tantalizing questions astrobiologists grapple with every day What is life and how does it begin What makes a planet or moon habitable Is there life on Mars or elsewhere in the solar system How can life be recognized on distant worlds Is it likely to be microbial more biologically complex or even intelligent What would such a discovery mean for life here on Earth Come along on this scientific adventure and learn the astonishing implications of discoveries made in this field for the future of the human race Bennett who believes that science is a way of helping people come to agreement explains how the search for extraterrestrial life can help bridge the divide that sometimes exists between science and religion defuse public rancor over the teaching of evolution and quiet the debate over global warming He likens humanity

today to a troubled adolescent teetering on the edge between self destruction and a future of virtually limitless possibilities Beyond UFOs shows why the very quest to find alien life can help us to grow up as a species and chart a course for the stars In a new afterword Bennett shares the most recent developments in extrasolar research and discusses how they might further our quest to find alien life

Demystifying Science Jerry Goldberg, 2024-12-06 Science today often seems incomprehensible to the general public filled with specialized jargon and baffling math that eludes most readers Consequently science is often held in low esteem despite being the foundation of all modern advancements To make matters worse a strong movement of science deniers has emerged escalating the problem to a dangerous level The public needs to grasp the basics of science to participate in and make informed decisions on the critical issues facing the US and the world today This book offers clear intelligible explanations of the fundamental ideas and rationales behind the theories of great scientists Written in an informal readable format it presents an imagined dialogue between the reader and the author The book explains the thought processes of some of history's greatest minds without heavy use of math or technical jargon It includes numerous images and sketches to illustrate concepts and portrays the lives of famous scientists showing that they too struggled with everyday problems just like everyone else Engage with this accessible guide to scientific thinking and discover how the great scientific minds developed their groundbreaking theories

The Cosmos Jay M. Pasachoff, Alex Filippenko, 2013-08-12 An exciting introduction to astronomy the fourth edition of this book uses recent discoveries and stunning photography to inspire non science majors about the Universe Written by two highly experienced and engaging instructors each chapter has been fully updated with more than 200 new images throughout including recent images from space missions and the world's best observatories The newly redesigned text is organized as a series of stories each presenting the history of the field the observations made and how they fit within the process of science our current understanding and what future observations are planned Math is provided in boxes and easily read around making the book suitable for courses taking either mathematical or qualitative approaches New discussion questions encourage students to think widely about astronomy and the role science plays in our everyday lives and podcasts for each chapter aid studying and comprehension

Sun, Moon, and Stars Agnes Giberne, 1880
