Manoeli,2019-12-04 The book offers a history of the discourses and diplomacies of Sudan s civil wars It explores the battle for legitimacy between the Sudanese state and Southern rebels In particular it examines how racial thought and rhetoric were used in international debates about the political destiny of the South By placing the state and rebels within the same frame the book uncovers the

competition for Sudan's reputation. It reveals the discursive techniques both sides employed to elicit support from diverse audiences amidst the intellectual ferment of Pan Africanism, the Cold War and Black liberation politics. It maintains that the interplay of silences and articulations in both the rebels and the state's texts concealed and complicated aspects of the country's political conflict. In sum, the book demonstrates that the war of words waged abroad represents a strategic but often overlooked aspect of the Sudanese civil wars.

Power Of Ideas, The: The Rising Influence Of Thinkers And Think Tanks In China Cheng Li, 2017-03-14 China's momentous socioeconomic transformation is not taking place in an intellectual vacuum. Chinese scholars and public intellectuals are actively engaged in fervent discussions about the country's domestic and foreign policies, demographic constraints and ever growing integration into the world community. This book focuses on China's major think tanks where policies are initiated and on a few prominent thinkers who influence the way in which elites and the general public understand and deal with the various issues confronting the country. The book examines a number of factors contributing to the rapid rise of Chinese think tanks in the reform era. These include the leadership's call for scientific decision making, the need for specialized expertise in economics and finance as China becomes an economic powerhouse, the demand for opinion leaders in the wake of a telecommunication revolution driven by social media, the accumulation of human and financial capital and the increasing utility of the revolving door nature of think tanks. It has been widely noted that think tanks and policy advisors have played an important role in influencing the strategic thinking of the top leadership, including the formation of ideas such as the Three Represents, China's peaceful rise, One Belt One Road and the founding of the Asian Infrastructure Investment Bank AIIB. In 2014, President Xi Jinping made think tank development a national strategy and he claimed that building a new type of think tank with Chinese characteristics is an important and pressing mission. Though the media outside China has often reported on this important development, it has all but escaped rigorous scholarly scrutiny. This book will categorize Chinese think tanks by their various forms such as government agencies, university based think tanks, private think tanks, business research centers or consultancies and civil society groups. It will not only analyze the problems and challenges in China's think tank development but also reveal the power of ideas.
