herramienta muy común en los estudios de arqueología a las producciones cerámicas y en este caso las del yacimiento arqueológico de El Tolmo de Minateda. El estudio de la cerámica se aborda desde una perspectiva contextual y estratigráfica dos elementos que han permitido situar las producciones cerámicas dentro de un marco cronológico preciso y por lo tanto identificar las producciones que caracterizan el principio del siglo VII respecto a las de su segunda mitad así como reconocer con claridad cómo evoluciona el material cerámico a lo largo de los siglos VIII y IX. En el caso de El Tolmo de Minateda, gracias a la gran cantidad de información reunida, ha sido posible estudiar unas producciones que por su cronología cuentan con pocos casos de estudio con los que compararlas. Por ello, la parte final del trabajo se ha utilizado no solo como espacio conclusivo sino también como un lugar de debate de ideas y planteamiento de preguntas que caracterizan las cerámicas de los siglos VII, VIII o IX y cuáles las diferencian por qué llegan productos orientales de importación en la segunda mitad del siglo VII. Allí cuando se detectan los primeros elementos reconocidos como indicadores de islamización o cómo se reconoce el proceso de islamización social a través de la cerámica. Los argumentos que se plantean en este libro ayudan a reconocer la cerámica de época altomedieval y su evolución pero también a ver la huella de una sociedad que plasma sus necesidades, usos y costumbres en estos simples objetos y que ahora nos permiten reconstruir en cierta medida la historia de estas gentes.

Monjes y monasterios hispanos en la Alta Edad Media, **La Alta Edad Media** Jacques Verger, 1985 *La construcción de la territorialidad en la Alta Edad Media*

Iñaki Martín Viso, 2020. Las sociedades humanas han concebido su relación con el espacio físico en el que habitaban en términos territoriales. Este concepto dota a la noción de territorio de una serie de significados sociales y culturales, convirtiéndolo así en un instrumento de articulación de las complejas y cambiantes relaciones entre grupos sociales y medio natural. Generalmente la territorialidad se examina desde el prisma de los estados modernos como zonas perfectamente delimitadas tanto desde un punto de vista topográfico como desde una óptica del significado político. Sin embargo, se trata de una visión parcial que no toma en consideración la existencia de otras formas de territorialidad existentes en sociedades preindustriales. La Alta Edad Media, un periodo que cubrió los siglos VI al XI aproximadamente, fue un auténtico laboratorio de territorialidad. Los modelos romanos fuertemente condicionados por el poder imperial se diluyeron y surgieron nuevas y muy diversas formas de articulación del territorio. Las sociedades locales se convirtieron en protagonistas activas al crear patrones territoriales que sirvieron de escenario para implementar las relaciones con la autoridad central al tiempo que se fueron construyendo los espacios episcopales y se crearon lugares centrales de nuevo cuño. Esta compleja relación entre lo local y lo englobante se aborda en este volumen a través de un conjunto de estudios que cubren la Península Ibérica, Inglaterra e Irlanda.

Text and Textuality in Early Medieval Iberia Graham Barrett,2023-06-20 Text and Textuality in Early Medieval Iberia is a study of the functions and conceptions of writing and reading documentation and archives and the role of literate authorities in the Christian kingdoms of the northern Iberian Peninsula between the Muslim conquest of 711 and the fall of the Islamic caliphate at C rdoba in 1031 Based on the first complete survey of the over 4 000 surviving Latin charters from the period it is an essay in the archaeology and biography of text part one concerns materiality tracing the lifecycle of charters from initiation and composition to preservation and reuse while part two addresses connectivity delineating a network of texts through painstaking identification of more than 2 000 citations of other charters secular and canon law the Bible liturgy and monastic rules Few may have been able to read or write yet the extent of textuality was broad and deep in the authority conferred upon text and the arrangements made to use it Via charter and scribe society and social arrangements came increasingly to be influenced by norms originating from a network of texts By profiling the intersection and interaction of text with society and culture Graham Barrett reconstructs textuality how the authority of the written and the structures to access it framed and constrained actions and cultural norms and proposes a new model of early medieval reading As they cited other texts charters circulated fragments of those texts we must rethink the relationship of sources and audiences to reflect fragmentary transmission in a textuality of imperfect knowledge *La ciudad de Santiago de Compostela en la alta Edad Media* Fernando L opez Alsina,1988 **Galicia y los gallegos en la Alta Edad Media** Manuel Ruben Garc a Alvarez,1975

The History of Courts and Procedure in Medieval Canon Law Wilfried Hartmann,Kenneth

Pennington,2016-09-09 By the end of the thirteenth century court procedure in continental Europe in secular and ecclesiastical courts shared many characteristics As the academic jurists of the Ius commune began to excavate the norms of procedure from Justinian s great codification of law and then to expound them in the classroom and in their writings they shaped the structure of ecclesiastical courts and secular courts as well These essays also illuminate striking differences in the sources that we find in different parts of Europe In northern Europe the archives are rich but do not always provide the details we need to understand a particular case In Italy and Southern France the documentation is more detailed than in other parts of Europe but here too the historical records do not answer every question we might pose to them In Spain detailed documentation is strangely lacking if not altogether absent Iberian conciliar canons and tracts on procedure tell us much about practice in Spanish courts As these essays demonstrate scholars who want to peer into the medieval courtroom must also read letters papal decretals chronicles conciliar canons and consilia to provide a nuanced and complete picture of what happened in medieval trials This volume will give sophisticated guidance to all readers with an interest in European law and courts
