Alternative Careers In Science Leaving The Ivory Tower:

Alternative Careers in Science Cynthia Robbins-Roth, 2011-04-28 Many science students find themselves in the midst of graduate school or sitting at a lab bench and realize that they hate lab work Even worse is realizing that they may love science but science at least academic science is not providing many job opportunities these days What s a poor researcher to do This book gives first hand descriptions of the evolution of a band of hardy scientists out of the lab and into just about every career you can imagine Researchers from every branch of science found their way into finance public relations consulting business development journalism and more and thrived there Each author tells their personal story including descriptions of their career path a typical day where to find information on their job opportunities to career growth and more This is a must read for every science major and everyone who is looking for a way to break out of their career rut An insider s look at the wide range of job opportunities for scientists yearning to leave the lab First person stories from researchers who successfully made the leap from science into finance journalism law public policy and more Tips on how to track down and get that job in a new industry Typical day scenarios for each career track List of resources websites associations etc to help you in your search Completely revised this latest edition includes six entirely new chapters *Alternative Careers in Science*

, 2006 **The Chicago Guide to Your Career in Science** Victor A. Bloomfield, Esam E. El-Fakahany, 2008-11-15 Embarking upon research as a graduate student or postdoc can be exciting and enriching the start of a rewarding career But the world of scientific research is also a competitive one with grants and good jobs increasingly hard to find The Chicago Guide to Your Career in Science is intended to help scientists not just cope but excel at this critical phase in their careers Victor A Bloomfield and Esam E El Fakahany both well known scientists with extensive experience as teachers mentors and administrators have combined their knowledge to create a guidebook that addresses all of the challenges that today s scientists in training face They begin by considering the early stages of a career in science deciding whether or not to pursue a PhD choosing advisors and mentors and learning how to teach effectively Bloomfield and El Fakahany then explore the skills essential to conducting and presenting research The Chicago Guide to Your Career in Science offers detailed advice on how to pursue research ethically manage time and communicate effectively especially at academic conferences and with students and peers Bloomfield and El Fakahany write in accessible straightforward language and include a synopsis of key points at the end of each chapter so that readers can dip into relevant sections with ease From students prepping for the GRE to postdocs developing professional contacts to faculty advisors and managers of corporate labs scientists at every level will find The Chicago Guide to Your Career in Science an unparalleled resource The Chicago Guide to Your Career in Science is a roadmap to the beginning stages of a scientific career I will encourage my own students to purchase it Dov F Sax assistant professor of ecology and evolutionary biology Brown University Step by step Victor Bloomfield and Esam El Fakahany provide sound thorough yet succinct advice on every issue a scientist in training is likely to encounter Young

readers will welcome the authors advice on choosing a graduate school for example while senior scientists will probably wish that a book like this had been around when they were starting out With down to earth and occasionally humorous advice The Chicago Guide to your Career in Academic Biology belongs on the bookshelf of every graduate student and advisor Norma Allewell Dean College of Chemical and Life Sciences University of Maryland Guide to Non-Traditional Careers in Science Karen Y. Kreeger, 2013-01-11 Offering practical advice and stories from scientists and professionals this guidebook aids the reader in evaluating and finding career opportunities in non academic research fields It demonstrates that choices are available providing many examples of fields for example publishing law public policy and business in which people can use their scientific training to nurture a satisfying professional life Yet it also acknowledges that there are trade offs involved with any veer from the traditional path **The Academic Job Search Handbook** Julia Miller Vick, Jennifer S. Furlong, 2013-06-12 For more than 15 years The Academic Job Search Handbook has assisted job seekers in all academic disciplines in their search for faculty positions The guide includes information on aspects of the search that are common to all levels with invaluable tips for those seeking their first or second faculty position This new edition provides updated advice and addresses hot topics in the competitive job market of today including the challenges faced by dual career couples job search issues for pregnant candidates and advice on how to deal with gaps in a CV The chapter on alternatives to academic jobs has been expanded and sample resumes from individuals seeking nonfaculty positions are included The book begins with an overview of the hiring process and a timetable for applying for academic positions It then gives detailed information on application materials interviewing negotiating job offers and starting the new job Guidance throughout is aimed at all candidates with frequent reference to the specifics of job searches in scientific and technical fields as well as those in the humanities and social sciences Advice on seeking postdoctoral opportunities is also included Perhaps the most significant contribution is the inclusion of sample vitas The Academic Job Search Handbook describes the organization and content of the vita and includes samples from a variety of fields In addition to CVs and research statements new in this edition are a sample interview itinerary a teaching portfolio and a sample offer letter The job search correspondence section has also been updated and there is current information on Internet search methods and useful websites Career Opportunities in Science Susan Echaore-McDavid, 2008 Discusses more than ninety career possibilities in the field of science including information on education training and salaries *The Academic Job Search Handbook* Mary Morris Heiberger, Julia Miller Vick, 2001 An examination of organizational dynamics as they are affected by internal creative processes using the example of a regional state university campus which dynamics the authors believe are applicable to other public institutions or possibly organizations of any kind Emphasis is on the utilization of planning and implementation skills already present within the organization and the means of activating such resources The authors are experienced academics and university administrators A practical and comprehensive overview of the process involved in searching for and obtaining an academic

position based on the authors experience advising graduate students at the Career Planning and Placement Service U of Pennsylvania Annotation copyrighted by Book News Inc Portland OR *Life Science Careers* Jasna Markovac, Kim E. Barrett, Howard Garrison, 2024-05-09 This book is written for the many Life Science PhD students who may pursue careers outside of academic research Even though the biggest portion of students will ultimately pursue other paths university education trains them mostly for the academic track Students often miss information resources contacts or opportunities to explore other options In response the editors assembled a diverse group of authors from all fields related to Life Science research The chapters offer a peek behind the curtain of each industry and offer guidance on how to move towards such roles Through a high level of uniformity students will get a plethora of career stories each providing job opportunities job descriptions resources and useful contact information The purpose of this volume is to illustrate the many excellent opportunities that are available to life science PhDs which will still allow them to make significant contributions to science
